Selected Writings of T.C. Schneirla Lester R. Aronson,1972 **Selected Writings of T.C. Schneirla, Edited by Lester R. Aronson, Ethel Tobach ... Jay S. Rosenblatt, Daniel S. Lehrman** Theodore Christian SCHNEIRLA,1972 Patterns of Behavior Richard W. Burkhardt,2005-03-15 Publisher Description *Portraits of Pioneers in Psychology* Gregory A. Kimble,Michael Wertheimer,2000-11-01 This fourth book in the series continues the tradition of the popular earlier volumes by offering lively and entertaining information about some of contemporary psychology s most illustrious ancestors The 21 chapters many of them written by today s most visible and eminent authors concentrate on the lives and achievements of major psychologists from a variety of areas Created for undergraduate and graduate courses in the history of psychology the variety of pioneers represented provide enough flexibility to also use it as a supplemental reader in other psychology courses Each of the five volumes in this series contains different profiles thereby bringing more than 100 of the pioneers in psychology more vividly to life **Behavioral Development** Kathryn E. Hood,Gary Greenberg,Ethel Tobach,2013-11-26 First Published in 1995 Behavioral Development is Volume 1 in the Research and Developmental and Comparative Psychology series dedicated to honour the contributions of T C Schneirla This volume represents the substantive content of the Fifth T C Schneirla Conference held in November of 1989 The volume is divided into three parts the significance of the intensity of the adequate stimulus the process of development and the concept of integrative levels Schneirla is still recognized as one of the foremost theoreticians in comparative psychology and the rebirth of interest in comparative psychology is evident **Cognition, Language, and Consciousness** Gary Greenberg,Ethel Tobach,1987 First published in 1987 Routledge is an imprint of Taylor Francis an informa company **Individuals as Producers of Their Development** Richard M Lerner,Nancy A. Busch-Rossnagel,2013-09-03 Individuals as Producers of Their Development A Life Span Perspective provides an assessment of the usefulness of viewing the individual as an active contributor to his or her development It extends the breadth of organism environment reciprocities beyond those involved with the child and family On the one hand this extension involves a consideration of the role of evolutionary biological processes on the other it pertains to the broader ecology of human development the social network lying outside the family and the physical environmental contexts of development Person context reciprocities linked to variables that may play their greatest role in the extrafamilial context are also considered Variables such as physical attractiveness race and physical handicap are examples of those discussed in this regard Finally because of the greater scope of the analysis a potentially greater data base is examined in a search for documentation of the presence and role of dynamic person context interactions *Individual Development from an Interactional Perspective (Psychology Revivals)* David Magnusson,2015-03-27 Originally published in 1988 this title presents a longitudinal research project Individual Development and Adjustment IDA planned and implemented at the Department of Psychology University of Stockholm This title concerns the theoretical background of the

project the planning and collecting of data during the second phase of the project when the participants had reached adulthood and the presentation of some empirical illustrative studies based on the collected data **Before Speech**

Margaret Bullowa,1979-09-27 Long before they can make any sounds approaching language infants can share in communication though what this means is the subject of much scrutiny This 1979 volume deliberately draws on people whose different backgrounds have brought them to explore questions that have a bearing on communication in this earliest phase of human infancy This is then as Dr Bullowa says in her introduction primarily a book about how scientists go about finding out how infants and adults communicate with one another It is nowhere dogmatic contributors have all been encouraged to say why they came to do the research reported how they set about it and what they discovered Dr Bullowa herself provides a useful introduction which makes its own substantial contribution while surveying the broad context of the particular research discussing some of the themes that recur in the book and relating them to the wider literature *Emergent Evolution* David

Blitz,2013-03-09 Emergent evolution combines three separate but related claims whose background origin and development I trace in this work firstly that evolution is a universal process of change one which is productive of qualitative novelties secondly that qualitative novelty is the emergence in a system of a property not possessed by any of its parts and thirdly that reality can be analyzed into levels each consisting of systems characterized by significant emergent properties In part one I consider the background to emergence in the 19th century discussion of the philosophy of evolution among its leading exponents in England Charles Darwin Herbert Spencer T H Huxley Alfred Russel Wallace and G J Romanes Unlike the scientific aspect of the debate which aimed to determine the factors and causal mechanism of biological evolution this aspect of the debate centered on more general problems which form what I call the philosophical framework for evolutionary theory This considers the status of continuity and discontinuity in evolution the role of qualitative and quantitative factors in change the relation between the organic and the inorganic the relation between the natural and the supernatural the mind body problem and the scope of evolution including its extension to ethics and morals *Cognitive and Affective Growth (PLE: Emotion)* Shapiro Edna,Evelyn Weber,2014-11-20 Originally published in 1981 this title is a collection of chapters based on papers presented at a conference called to explore what the editors called a developmental interaction point of view an approach to developmental psychology and education that stresses these interactive and reciprocal relations The contributors although from diverse professional backgrounds are united in their commitment to an integrative view of developmental phenomena one that highlights relationships among different aspects of development and the reciprocal nature of relations between people and their environments **The Handbook of Life-Span Development, Volume 1**

Richard M. Lerner,Willis F. Overton,2010-12-14 In the past fifty years scholars of human development have been moving from studying change in humans within sharply defined periods to seeing many more of these phenomenon as more profitably studied over time and in relation to other processes The Handbook of Life Span Development Volume 1 Cognition

Biology and Methods presents the study of human development conducted by the best scholars in the 21st century Social workers counselors and public health workers will receive coverage of of the biological and cognitive aspects of human change across the lifespan Survivor Personality Al Siebert,2010-07-06 The classic guide to what makes people survivors now in a revised and updated new edition Who survives Who thrives As a psychologist who spent more than forty years studying the phenomenon of survival Al Siebert gained valuable insight into the qualities and habits that help human beings overcome difficult situations from everyday conflicts to major life stresses In this revised and updated edition he delineates the survivor personality and examines the latest research to show how survival skills can be learned leading to better coping increased success in work and relationships and a vastly brighter outlook on the future **Learning and Emotion: Evolutionary processes** Peter J. The Heredity Hoax Richard M. Lerner,Gary Greenberg,2025-01-30 This innovative and thought provoking book integrates both new authored material and reprints of existing literature that together provide a compelling narrative that reveals the fatally flawed science associated with genetic reductionist accounts of human behavior and development Through an interdisciplinary lens it illuminates the dynamic nature of human development empowering readers to question established notions and embrace the complexity of our potential Across the book the work of top tier scientists from developmental comparative educational and biological science illuminates theory and research converging on the conclusion that the multiple egregiously flawed work of genetic reductionists should be expunged from research pertinent to human development The book challenges the prevailing reductionist narratives and their application to social policies programs and uses in media Theoretically based and empirically rigorous this multidisciplinary approach to human development will shine a light on the inequities in individuals or groups that suggest that specific genes do not enable them to succeed in life The Heredity Hoax invites graduate programs and advanced undergraduate courses on human development human potential epigenetics and more to delve into the intricate interplay between genes environment and personal growth This will also serve as an unimpeachable source of evidence for researchers educators and social policymakers

In the Hearts of the Beasts Anne C. Rose,2020-02-13 Animals cannot use words to explain whether they feel emotions and scientific opinion on the subject has been divided Charles Darwin believed animals and humans share a common core of fear anger and affection Today most researchers agree that animals experience comfort or pain Around 1900 in the United States however where intelligence was the dominant interest in the lab and field animal emotion began as an accidental question Organisms ranging from insects to primates already used to test learning displayed appetites and aversions that pushed psychologists and biologists in new scientific directions The Americans were committed empiricists and the routine of devising experiments observing and reflecting permitted them to change their minds and encouraged them to do so By 1980 the emotional behavior of predatory ants fearful rats curious raccoons resourceful bats and shy apes was part of American science In this open ended environment the scientists personal lives their families trips abroad and public service also affected their professional labor The Americans kept up with the latest intellectual trends in genetics evolution and ethology and they sometimes pioneered them But there is a bottom up story to be told about the scientific consequences of animals and humans brought together in the pursuit of knowledge The history of the American science of animal emotions reveals the ability of animals to teach and scientists to learn

Readings in Animal Cognition Marc Bekoff,Dale Jamieson,1996 This collection of 24 readings is the first comprehensive treatment of important topics by leading figures in the rapidly growing interdisciplinary field of animal cognition Taken together the essays provide the nucleus for an introductory course in animal cognition cognitive ethology and comparative psychology philosophy of biology or philosophy of mind Selections are grouped

in five sections Perspectives on Animal Cognition Cognitive and Evolutionary Explanations Recognition Choice Vigilance and Play Communication and Language and Animal Minds Seventeen essays are reprinted from the authors much cited two volume collection Interpretation and Explanation in the Study of Animal Behavior One essay taken from that book has been subsequently revised and five additional essays are recent examples of critical thinking in cognitive ethology The preface and final chapter Ethics and the Study of Animal Cognition are new A Bradford Book

Curiosity and Information Seeking in Animal and Human Behavior Wojciech Pisula, 2020-06-01 The purpose of the book is to deliver a critical review of the literature and author s research data relevant for understanding the phenomena of curiosity information seeking behavior and novelty seeking The book is designed to be a comprehensive and systematic lecture of areas related to the main subject in a way that will enable the reader to grasp the notion of development in terms of the evolutionary time scale and ontogenesis Each of the subjects is explained on the basis of three perspectives ultimate factors integrative levels and proximate mechanisms This work is intended to integrate approaches adopted within psychology ethology and behavioral neuroscience The major uniqueness is related to the integrative levels framework which is not very often utilized the the contemporary books on the subject This is why the book offers holistic complete presentation of the area that it does cover It should be of interests of students of psychology animal behavior as well teachers and educators It provides refreshing cues for creative thinking about human curiosity The present edition includes new data and the discussion of the new literature on the subject
