B. Dynkin with Commentary Evgenii Borisovich Dynkin, Gary M. Seitz, 2000 Eugene Dynkin is a rare example of a contemporary mathematician who has achieved results in two quite different areas of research algebra and probability In both areas his ideas constitute an essential part of modern mathematical knowledge and form a basis for further development Although his last work in algebra was published in 1955 his contributions continue to influence current research in algebra and in the physics of elementary particles His work in probability is part of both the historical and the modern development of the topic *Selected Questions of Mathematical Physics and Analysis* I. V.
