SELECTED TOPICS IN MOLECULAR PHYSICS- PROCEEDINGS OF AN INTERNATIONAL SYMPOSIUM. , *Selected topics in molecular physics* ,1972 Selected Topics in Applications of Quantum Mechanics Mohammad Reza Pahlavani,2015-05-13 This book has two sections The section Selected Topics in Applications of Quantum Mechanics provides seven chapters about different applications of quantum mechanics in science and technology The section Selected Topics in Foundations of Quantum Mechanics provides seven chapters about the foundations of quantum mechanics This book is written by a community of expert scientists from different research institutes and universities from all over the world Without a doubt quantum mechanics is the greatest discovery of the 20th century Therefore its history and foundations are of great interest to scientists and students This book covers some of the applications of quantum mechanics in nuclear physics medical science information technology atomic physics and material science as well as selected topics of quantum mechanics through different bases and ideas about quantum mechanics The basic idea of the publication of this book is to make scientists and researchers as well as graduate students familiar with the foundations of quantum mechanics **Select Topics of Econophysics** Amit Sinha,2024-11-04 Economics requires understanding and analyzing forces that bring buyers and sellers to a market place who then negotiate exchanges of goods and services based on a mutually agreeable price Economists have their own method of modeling whereby models are first conceived of some notion of economic and financial thinking before being empirically tested and anomalies are then recognized if the observed data is inconsistent with the hypothetical underpinning This is in inherent contradiction with the modeling approaches of physicists who develop their theories principle and laws after observing empirical data The awareness that physics can enlighten the understanding of human behavior and thus economics and the interest of physicists in applying their training and models to understanding the complexities of finance and economics led to the creation of a new field of study appropriately termed as Econophysics Selected Topics on Econophysics is a collection of essays on topics that enhance and enrich our understanding of economic modeling when the same rigor of modelling used by physicists is brought to developing financial and economic theories These articles include discussions on modeling bitcoins stock index modeling using geometric Brownian motion agent based modeling wealth distribution modeling as well as modeling related to fractal regression and chaotic processes This interdisciplinary book will interest researchers graduate students and professionals in the fields of economics finance as well as physics Special Topics H. S. W. Massey,E. W. McDaniel,B. Bederson,2013-10-22 Applied Atomic Collision Physics Volume 5 Special Topics deals with topics on applications of atomic collisions that were not covered in the first four volumes of the treatise The book opens with a chapter on ultrasensitive chemical detectors This is followed by separate chapters on lighting magnetohydrodynamic electrical power generation gas breakdown and high voltage insulating gases thermionic energy converters and charged particle detectors Subsequent chapters deal with the operation of multiwire drift and

proportional chambers and streamer chambers and their use in high energy physics experiments photoelectron spectroscopy of negative ions and the chemical information that can be obtained from such studies and the determination of intermolecular potentials Also discussed are studies on the determination of ion molecular potential curves using photodissociative processes determination of negative ion thermo chemical data using ion neutral reactions gas phase chemical reactions collision phenomena in electrical discharge lamps and military applications of atomic and molecular physics

Selected Bibliography of Research Materials on Education in the USSR, 1958 *Selected Scientific Papers of E.U. Condon* E.U. Condon, 2012-12-06

E U Condon's major contributions were in atomic and molecular physics and spectroscopy his book with G H Shortley on The Theory of Atomic Spectra dominated the field of spectroscopy for half a century and remains an invaluable reference He also played an important role in the institutions of American science He served for many years as the editor of Reviews of Modern Physics and with Hugh Odishaw he edited the still widely used Handbook of Physics After World War II Condon became director of the National Bureau of Standards now NIST and helped to make it one of the premier research laboratories in the physical sciences in the world The Selected Scientific Papers reprint many of the most important contributions Condon made to atomic physics quantum theory nuclear physics condensed matter physics and other fields The Selected Popular Writings contain articles he wrote on technical topics for such journals as The American Journal of Physics Science and Nature as well as reflections on education UFO s and other topics

Selected Topics in the History of Biochemistry. Personal Recollections. Part III G. Semenza, R. Jaenicke, 2012-12-02 As in Volumes 35 and 36 the chapters in this new volume complement with personal recollections the History of Biochemistry that was covered in the Comprehensive Biochemistry Series Volumes 30-33 by M Florkin and Volume 34A by P Laszlo The biographical and autobiographical chapters will convey to the reader a lively albeit at times subjective view of the scientific and social environment in which the authors have worked resulting in new concepts and theories on the biological sciences

longer be contained within one volume and the series Specialist Periodical Reports was born The Annual Reports themselves still existed but were divided into two and subsequently three volumes covering Inorganic Organic and Physical Chemistry For more general coverage of the highlights in chemistry they remain a must Since that time the SPR series has altered according to the fluctuating degree of activity in various fields of chemistry Some titles have remained unchanged while others have altered their emphasis along with their titles some have been combined under a new name whereas others have had to be discontinued The current list of Specialist Periodical Reports can be seen on the inside flap of this volume
