**The Descent of Man, and Selection in Relation to Sex ... Second Edition, Revised and Augmented, with Illustrations. Tenth Thousand** Charles Darwin, 1874      **Facts, Conventions, and the Levels of Selection** Pierrick Bourrat, 2021-09-23 Debates concerning the units and levels of selection have persisted for over fifty years One major question in this literature is whether units and levels of selection are genuine in the sense that they are objective features of the world or merely reflect the interests and goals of an observer Scientists and philosophers have proposed a range of answers to this question This Element introduces this literature and proposes a novel contribution It defends a realist stance and offers a way of delineating genuine levels of selection by invoking the notion of a functional unit      **Evolution and the Levels of Selection** Samir Okasha, 2006-11-16 Does natural selection act primarily on individual organisms on groups on genes or on whole species The question of levels of selection on which biologists and philosophers have long disagreed is central to evolutionary theory and to the philosophy of biology Samir Okasha s comprehensive analysis gives a clear account of the philosophical issues at stake in the current debate      *Textbook Selection* Raymond Franzen, Frederic Butterfield Knight, 1922      1833-1860 Oliver Joseph Thatcher, 1902      The History and Philosophy of Science: A Reader Daniel McKaughan, Holly VandeWall, 2018-01-11 The History and Philosophy of Science A Reader brings together seminal texts from antiquity to the end of the nineteenth century and makes them accessible in one volume for the first time With readings from Aristotle Aquinas Copernicus Galileo Descartes Newton Lavoisier Linnaeus Darwin Faraday and Maxwell it analyses and discusses major classical medieval and modern texts and figures from the natural sciences Grouped by topic to clarify the development of methods and disciplines and the unification of theories each section includes an introduction suggestions for further reading and end of section discussion questions allowing students to develop the skills needed to read interpret and critically engage with central problems and ideas from the history and philosophy of science understand and evaluate scientific material found in a wide variety of professional and popular settings appreciate the social and cultural context in which scientific ideas emerge identify the roles that mathematics plays in scientific inquiry Featuring primary sources in all the core scientific fields astronomy physics chemistry and the life sciences The History and Philosophy of Science A Reader is ideal for students looking to better understand the origins of natural science and the questions asked throughout its history By taking a thematic approach to introduce influential assumptions methods and answers this reader illustrates the implications of an impressive range of values and ideas across the history and philosophy of Western science      *On the Origin of Species* Charles Darwin, 2018-08-20 In this groundbreaking scientific study Charles Darwin introduces his theory of evolution and the process of natural selection The seminal work went on to form the foundation of the modern understanding of biology and natural science First published in 1859 On the Origin of Species presents Darwin s scientific study of the process of natural selection Illustrating his evolutionary theory and the interrelatedness of heritable variation and the

evolution of humans animals and plant life Darwin wrote for non specialist readers aiding the book in reaching a wide audience By the 1870s Darwin s theory of evolution was commonly regarded as fact within the scientific community The book includes his own sketches of evolution to support his theory as well as abstracts of his experiments and research The chapters in this volume include Variation Under Domestication Variation Under Nature Struggle for Existence Natural Selection Laws of Variation Preserving a key scientific text for future generations On the Origin of Species has been proudly republished by Read Co Books featuring a specially commissioned biography of the author An essential read for those with an interest in the groundbreaking work of Charles Darwin and the study of the history of evolution

**Social Issues in Sport, Leisure, and Health** Sine Agergaard,David Karen,2023-10-03 This book examines how social issues shape and influence our engagement with sport leisure time physical activity and health promoting exercise Connecting the personal with the public it helps the reader understand how individual exercise leisure and sport participation are both facilitated and constrained by their social contexts Presenting a series of in depth descriptions of grassroots sport urban lifestyle sport physical activity across the life course sport for children with special needs and the development of creative climates in sport this book seeks to encourage what C Wright Mills described as the sociological imagination Every chapter begins with an individual level account centred on everyday challenges with accessing sport partaking in leisure activities and meeting guidelines for daily exercise before exploring the larger socially determined patterns in which those experiences are located establishing a vital template for the

social scientific study of sport leisure and health Touching on key contemporary themes including diversity inclusion health inequalities and physical inactivity as well as selection and intensification in sports this book offers new case material and theoretical tools for understanding the relationships between sport leisure health and the wider society This is an indispensable companion for any course on the sociology of sport exercise leisure or physical activity and health *The Descent of Man and Selection in Relation to Sex* Charles Darwin,2023-01-29 Reprint of the original The publishing house Anatiposi publishes historical books as reprints Due to their age these books may have missing pages or inferior quality Our aim is to preserve these books and make them available to the public so that they do not get lost **Current Perspectives**

**on Sexual Selection** Thierry Hoquet,2015-01-28 This root and branch re evaluation of Darwin s concept of sexual selection tackles the subject from historical epistemological and theoretical perspectives Contributions from a wealth of disciplines have been marshaled for this volume with key figures in behavioural ecology philosophy and the history of science adding to its wide ranging relevance Updating the reader on the debate currently live in behavioural ecology itself on the centrality of sexual selection and with coverage of developments in the field of animal aesthetics the book details the current state of play while other chapters trace the history of sexual selection from Darwin to today and inquire into the neurobiological bases for partner choices and the comparisons between the hedonic brain in human and non human animals Welcome space is given to the social aspects of sexual selection particularly where Darwin drew distinctions between eager males and coy females and rationalized this as evolutionary strategy Also explored are the current definition of sexual selection as opposed to natural selection and its importance in today s biological research and the impending critique of the theory from the nascent field of animal aesthetics As a comprehensive assessment of the current health or otherwise of Darwin s theory 140 years after the publication of his *Descent of Man* the book offers a uniquely rounded view that asks whether sexual selection is in itself a progressive or reactionary notion even as it explores its theoretical relevance in the technical biological study of the twenty first century

**From Genes to Animal Behavior** Miho Inoue-Murayama,Shoji Kawamura,Alexander Weiss,2011-01-19 The biological and genetic bases of behavioral diversity have long been topics of study within many disciplines including evolutionary biology genetics ethology sociobiology and comparative psychology but only relatively recently have attempts been made to bring these different approaches together This volume covers a wide range of interdisciplinary research which uses some of the newest and most promising methods and technologies Presented here is an overview of findings in the ongoing search for the ultimate causes of behavior in several different species including primates dogs rodents birds and fish Divided into five parts the work describes research on sexual and kin selection personality and temperament molecular genetics of personality color vision and body coloration and the neurological underpinnings of complex behaviors Valuable for researchers as well as graduate students in a wide range of fields from neuroscience to ecology the book is also useful to those seeking to move beyond the boundaries of their own discipline and to expand their knowledge [The Selfish Gene](#)

Richard Dawkins, 2006-03-16 The million copy international bestseller critically acclaimed and translated into over 25 languages This 30th anniversary edition includes a new introduction from the author as well as the original prefaces and foreword and extracts from early reviews As relevant and influential today as when it was first published *The Selfish Gene* has become a classic exposition of evolutionary thought Professor Dawkins articulates a gene's eye view of evolution a view giving centre stage to these persistent units of information and in which organisms can be seen as vehicles for their replication This imaginative powerful and stylistically brilliant work not only brought the insights of Neo Darwinism to a wide audience but galvanized the biology community generating much debate and stimulating whole new areas of research

*Levels of Selection in Evolution* Laurent Keller, 2019-12-31 Ever since the groundbreaking work of George Williams W D Hamilton and Richard Dawkins evolutionary biologists have recognized that natural selection generally does not operate for the good of the group but rather for the good of lower level units such as the individual the cell even the gene One of the fundamental problems of biology is what keeps competition between these various levels of natural selection from destroying the common interests to be gained from cooperation In this volume twelve prominent scientists explore this question presenting a comprehensive survey of the current theoretical and empirical research in evolutionary biology Recent studies show that at many levels of biological organization mechanisms have evolved to prevent potential conflict in natural selection Editor Laurent Keller's aim in this book is to bring together leading researchers from all biological disciplines to outline these potential conflicts and discuss how they are resolved A multi level approach of this kind allows important insights into the evolution of life as well as bridging the long standing conceptual chasm between molecular and organismal biologists The chapters here follow a rigorous theoretical framework giving the book an overall synergy that is unique to multi authored books The contributors in addition to the editor are H Charles J Godfray Edward Allen Herre Dawn M Kitchen Egbert Giles Leigh Jr Catherine M Lessells Richard E Michod Leonard Nunney Craig Packer Andrew Pomiankowski H Kern Reeve John Maynard Smith and E rs Szathm ry
