Outsourcing Rulemaking Powers Cedric Jenart, 2022 Outsourcing Rulemaking Powers identifies the shared constitutional principles that determine the limits to the outsourcing of rulemaking powers Through the examination of multiple countries this book argues that there should be minimal legal safeguards to which all rules must heed in particular those made by autonomous public or private actors The Evolution of EU Law Paul Craig, Gráinne De Búrca, 2021 This last decade has been particularly turbulent for the EU Beset by crises the financial crisis the rule of law crisis the migration crisis Brexit and the pandemic European Law has had to adapt and change in a way not previously seen First published in 1999 the goal then was to reflect on the important developments that had been made since the creation of the EEC That goal has not changed From EU Administrative Law through to the Regulation of Network Industries each chapter in this seminal work assesses the legal and political forces that have shaped the evolution of EU law With new chapters covering the Rule of Law Judicial Reform Brexit Constitutional and Legal Theory Refugee and Asylum law and Data Governance this third edition of The Evolution of EU Law is a must read for any student or academic of EU law Comparative Administrative Law: Legal relations Frank J. Goodnow, 1893 **Our Selfish Tax Laws** Anthony C. Infanti, 2018-10-02 Why tax law is not just a pocketbook issue but a reflection of what and whom we as a society value Most of us think of tax as a pocketbook issue how much we owe how much we'll get back how much we can deduct In *Our Selfish Tax Laws* Anthony Infanti takes a broader view considering not just how taxes affect us individually but how the tax system reflects our culture and society He finds

that American tax laws validate and benefit those who already possess power and privilege while starkly reflecting the lines of difference and discrimination in American society based on race ethnicity socioeconomic class gender sexual orientation and gender identity immigration status and disability Infanti argues that instead of focusing our tax reform discussions on which loopholes to close or which deductions to allow we should consider how to make our tax system reflect American ideals of inclusivity rather than institutionalizing exclusion After describing the theoretical and intellectual underpinnings of his argument Infanti offers two comparative case studies examining the treatment of housing tax expenditures and the unit of taxation in the United States Canada France and Spain to show how tax law reflects its social and cultural context Then drawing on his own work and that of other critical tax scholars Infanti explains how the discourse surrounding tax reform masks the many ways that the American tax system rewards and reifies privilege To counter this Infanti urges us to work together to create a society with a tax system that respects and values all Americans

Global Securities Litigation and Enforcement Pierre-Henri Conac, Martin Gelter, 2019-01-03 *Global Securities Litigation and Enforcement* provides a clear and exhaustive description of the national regime for the enforcement of securities legislation in cases of misrepresentation on financial markets It covers 29 jurisdictions worldwide some of them are important although their law is not well known It will be an invaluable resource for academics and students of securities litigation as well as for lawyers policy makers and regulators The book also provides a comprehensive contribution debate on whether public or private enforcement is preferable in terms of development of securities markets It will appeal to those interested in the legal origins theory and in comparative securities law and shows that the classification of jurisdictions within legal families does not explain the differences in legal regimes While US securities law often serves as a model for international convergence some of its elements such as securities class actions have not been adopted worldwide
