Sustainability of Microfinance Self Help Groups in India Ajai Nair, 2005 The major form of microfinance in India is that based on women s Self Help Groups SHGs which are small groups of 10 20 members These groups collect savings from their members and provide loans to them However unlike most accumulating savings and credit associations ASCAs found in several countries these groups also obtain loans from banks and on lend them to their members By 2003 over 700 000 groups had obtained over Rs 20 billion US 425 million in loans from banks benefiting more than 10 million people Delinquencies on these loans are reported to be less than 5 percent Savings in these groups is estimated to be at least Rs 8 billion US 170 million Despite these considerable achievements sustainability of the SHGs has been suspect because several essential services required by the SHGs are provided free or at a significantly subsidized cost by organizations that have developed these groups A few promoter organizations have however developed federations of SHGs that provide these services and others that SHG members need but which SHGs cannot feasibly provide Using a case study approach Nair explores the merits and constraints of federating Three SHG federations that provide a wide range of services are studied The findings suggest that federations could help SHGs become institutionally and financially sustainable because they provide the economies of scale that reduce transaction costs and make the provision of these services viable But their sustainability is constrained by several factors both internal related to the federations themselves and external related to the other stakeholders The author concludes by recommending some actions to address these constraints This paper a product of the Finance and Private Sector Development Unit South Asia Region is part of a larger effort in the region to study access to
