## **Self Realization Success And Adjustment :**

**Self-Realization, Success, and Adjustment** Edgar Krau, 1989-11-16 This book challenges all existing theories which link self realization to wealth and honor to be achieved only when all other needs are fully satisfied This study is conducted by an international group of leading psychologists It argues that existing pyramidal theories are not only unfair to all strata of society but also not defensible in light of scientific research The authors put forward a new theory of self realization based mainly on empirical research but also on the analysis of past literature and the study of famous people They contend that self realization functions within the framework of adjustment This theory allows for the self realization of the ordinary man not just the elite In this framework the individual selects and defines what constitutes his her self realization Self Realization Success and Adjustment will be of particular interest to personality theorists occupational and career counselors and social psychologists Divided into two parts Part I of this book analyzes the meaning of self realization for the modern man Is it Success Is it money or access to power Is it the challenge of work At the conclusion of this section the authors present their new theory based on the framework of adjustment Part II gives a theoretical and practical analysis of the means toward self realization participation in the social process the development of cognitive effective and motivational dimensions of personality the planning and realization of life long careers and above all the plan project of one s life

**Social and Economic Management in the Competitive Society** Edgar Krau, 2012-12-06 In many countries of the world there is a growing feeling of uneasiness about the economic situation and its related social consequences Every day the newspapers tell us that the recession is over but we see only that scores of organizations go bankrupt while others are struggling hard to stay in business that many people have lost their jobs but welfare measures are being reduced or abolished altogether By now we should have become aware that our society is not facing temporary market difficulties but a much deeper and wider crisis with only one root in worldwide economic developments while other roots are social and psychological in nature These factors are intertwined and therefore the answer to the crisis cannot merely be an economic cost benefit analysis of organizational management Sociocultural factors participate in the economic process even at the level of individual organizations and what happens in them has backlash influences on the entire society Therefore the problem is not the management of the individual organization but the macroconception of management which in the Western world of today separates the economic aspects from the social ones and the individual organizations from society Social and Economic Management in the Competitive Society begins by analyzing the management models of today to determine which characteristics yield the best results on the economic and social levels The second step is to indicate the necessary changes of managerial thinking and acting in order to boost economic results with reasonable profits while minimizing social costs Finally the potential ramifications of such changes are explored
