Self-representation Seymour L. Zelen, Edward Ellsworth Jones, California School of Professional Psychology (Los Angeles, Calif.), 1986 **Self-Representation** Seymour L. Zelen, 2011-10-08 This volume reports recent results of investigations into the role of attributional processes in self presentation The volume casts a wide net with work of interest to both clinicians and cognitive theorists Self presentation self enhancement defensiveness and self handicapping are all important concepts for clinical treatment as well as for attribution theory The excuses people make for their actions and the morality of blaming and responsibility also fit into this link between attribution and personality This volume addresses such issues with an up to date presentation of current research by the leading investigators of cognitive approaches to the self

Self-Representation Seymour L. Zelen, 1988-10-17 This volume reports recent results of investigations into the role of attributional processes in self presentation The volume casts a wide net with work of interest to both clinicians and cognitive theorists Self presentation self enhancement defensiveness and self handicapping are all important concepts for clinical treatment as well as for attribution theory The excuses people make for their actions and the morality of blaming and responsibility also fit into this link between attribution and personality This volume addresses such issues with an up to date presentation of current research by the leading investigators of cognitive approaches to the self *Self-Representation* Seymour L. Zelen, 2012-12-06 This volume reports recent results of investigations into the role of attributional processes in self presentation The volume casts a wide net with work of interest to both clinicians and cognitive theorists Self presentation self enhancement defensiveness and self handicapping are all important concepts for clinical treatment as well as for attribution theory The excuses people make for their actions and the morality of blaming and responsibility also fit into this link between attribution and personality This volume addresses such issues with an up to date presentation of current research by the leading investigators of cognitive approaches to the self Self-Handicapping Raymond L. Higgins, C.R. Snyder, Steven Berglas, 2013-11-11 The concept of self handicapping can be legitimately anchored in a variety of intellectual contexts some old and some newer As this volume reminds us Alfred Adler was perhaps the first to articulate the significance of various self defeating claims and gestures for protecting the self concept Thus the apparent paradox of defeat in the interests of protection More recently but still more than 30 years ago Heider's naive psychology added attributional rhetoric to the description of self defeating strategies While predominantly cognitive in its thrust the attributional approach incorporated several motivational influences especially those involving egocentric concerns Heider hardly violated our common sense when he suggested that people are inclined to attribute their performances in a self serving manner the good things I caused the bad things were forced upon me The notion of self handicapping strategies proposed by Berglas and myself a little more than a decade ago capitalized on these homely truths while adding a particular proactive twist We not

only make excuses for our blunders we plan our engagements and our situational choices so that self protective excuses are unnecessary In doing so we use our attributional understanding to arrange things so that flawed and failing performances will not be interpreted in ways that threaten our self esteem Self-Defeating Behaviors Rebecca C. Curtis,2013-11-11 In the desert I saw a creature naked bestial Who squatting upon the ground Held his heart in his hands And ate of it I said Is it good friend It is bitter bitter he answered But I like it Because it is bitter And because it is my heart Stephen Crane The Black Riders and Other Lines It is the function of great art to purge and give meaning to human suffering wrote Bernard Knox 1982 p 149 in his introduction to Oedipus Rex This is done by showing some causal connection between the hero's free will and his suffering by bringing to the fore the interplay of the forces of destiny and human freedom Knox states that Freud was wrong when he suggested that it was the particular nature of the material in Oedipus that makes the play so deeply moving and not the contrast between destiny and human will Knox believes that this play has an overpowering effect upon us not only because we share the tendency of Oedipus to direct our first sexual impulse towards our mother and our first murderous wish against our father as Freud tells us but also because the theological modification of the legend introduced by Sophocles calls into question the sacred beliefs of our time Knox 1982 pp 133 137 **Handbook of Social and Clinical Psychology** C. R. Snyder, Donelson R. Forsyth, 1991 *Tohoku Psychologica Folia* ,2003 Japanese Apology Across Disciplines Naomi Sugimoto, 1999 The purpose of this intriguing book is to bring together various approaches to the study of Japanese apology in an attempt to answer some of the critical questions currently being raised in this subject a how Japanese apology differs from that of other cultures b what seems to cause such differences and c how these cultural differences in apology effect communication across cultural boundaries Chapters included in this book represent such disciplinary affiliations as social psychology rhetoric conversation analysis and interpersonal communication Accordingly the critical issues concerning Japanese apology are examined from diverse methodological perspectives experiment survey text analysis media analysis and interview Self-handicapping Carla Mazzoleni, Fabienne Lauber Pedroni, 2015-11-17 Le persone vivono senza saperlo o senza ammetterlo nella mente degli altri in quanto anticipano continuamente il loro sguardo vedendosi osservate e viste da punti di vista esterni Gli individui non sono tuttavia semplici passivi osservatori delle reazioni degli altri poichè avvertono che il modo in cui si presentano e le immagini di sé che trasmettono sono in grado di determinare le relazioni sociali e il loro successo Tali processi sono l'oggetto del presente volume nelle forme specifiche assunte dall'Impression Management azioni di promozione difesa ricostruzione della propria immagine sembrano attraversare profondamente le conversazioni quotidiane rappresentando l'obiettivo indiretto e non dichiarato delle esposizioni ed incursioni dei soggetti nelle interazioni Alcune di queste strategie sono spiccatamente autopromozionali altre invece sfruttano un processo paradossale il self handicapping Il volume mira ad insegnare loro come fornire e mantenere un'immagine positiva delle proprie abilità e competenze per trarne grossi vantaggi a livello personale e interpersonale **International Books in**

Self-representation Seymour L. Zelen,1988-01-01 Subject Guide to Children's Books in Print 1997 Bowker Editorial Staff,R R Bowker Publishing,1996-09 **German books in print** ,1988 Self-Awareness & Causal Attribution Thomas Shelley Duval,Paul J Silvia,Neal Lalwani,2012-12-06 Self awareness the ability to recognize one s existence is one of the most important variables in psychology Without self awareness people would be unable to self reflect recognize differences between the self and others or compare themselves with internalized standards Social clinical and personality psychologists have recognized the significance of self awareness in human functioning and have conducted much research on how it participates in everyday life and in psychological dysfunctions Self Awareness Causal Attribution A Dual Systems Theory presents a new theory of how self awareness affects thought feeling and action Based on experimental social psychological research the authors describe how several interacting cognitive systems determine the links between self awareness and organized activity This theory addresses when people become self focused how people internalize and change personal standards when people approach or avoid troubling situations and the nature of self evaluation Special emphasis is given to causal attribution the process of perceiving causality Self Awareness Causal Attribution will be useful to social clinical and personality psychologists as well as to anyone interested in how the self relates to motivation and emotion

Self-Representation Gary S. Gregg,1991-10-30 This innovative work offers a new approach to the study of self representation drawing on both the older study of lives tradition in personality psychology and recent work in narrative psychology Gary S Gregg presents a generative theory of self representation applying methods of symbolic analysis developed by cultural anthropologists to the texts of life historical interviews This model accounts for the continual shifting of identity among contradictory surface discourses about the self as it shows how each discourse is defined as a reconfiguration of a stable cluster of deep structurally ambiguous elements Gregg not only examines the nature of narrative but also addresses more mainstream issues in cognitive science such as How is knowledge of the self and its social world represented What are the elementary units of self cognition How are cognition and affect linked After a brief introduction the book raises critical questions about self representation by presenting re analyses of two famous case studies Freud s Rat Man and Mack and Larry from The Authoritarian Personality and initial observations from Gregg s fieldwork in Morocco A theoretical chapter then introduces the notion of structured ambiguity which enables a person to shift between identities by figure or ground like reversals of key symbols and metaphors Three original life narrative analyses follow which with increasing complexity develop the model via analogies to basic structures of tonal music The work concludes with a theoretical chapter that reexamines the ideas of William James George Herbert Mead and Erik Erikson about the self s unity and multiplicity and then summarizes a generative model The book presents a compelling alternative to prevailing views of self cognition and identity and will be a valuable resource for courses in psychology anthropology and sociology as well as an important tool for

researchers and professionals in these fields *Handbook of Self and Identity, Second Edition* Mark R. Leary, June Price Tangney, 2011-12-21 Widely regarded as the authoritative reference in the field this volume comprehensively reviews theory and research on the self Leading investigators address this essential construct at multiple levels of analysis from neural pathways to complex social and cultural dynamics Coverage includes how individuals gain self awareness agency and a sense of identity self related motivation and emotion the role of the self in interpersonal behavior and self development across evolutionary time and the lifespan Connections between self processes and psychological problems are also addressed New to This Edition Incorporates significant theoretical and empirical advances Nine entirely new chapters Coverage of the social and cognitive neuroscience of self processes self regulation and health self and emotion and hypoegeic states such as mindfulness Self and Identity--psychosocial Perspectives Krysia M. Yardley-Matwiejczuk, Krysia Yardley, Terry Honess, 1987 This study of self is a growing concern within psychology and related disciplines particularly in social and clinical psychology psychiatry and personality studies
