Dōgen Studies William R. LaFleur, 2021-05-25 The induction of Dōgen into the modern academic world or perhaps more accurately the academic world's first real engagement with Dōgen came about 1924 when Watsuji Tetsurō 1889-1960 published a provocative essay entitled Shōman Dōgen It was this essay that to many of Watsuji's contemporaries seemed to rescue Dōgen from what they considered to be his entrapment for nearly seven centuries in the sectarian embrace of the Sōtō school Watsuji insisted that Dōgen no longer should be thought of as belonging exclusively to the monastic community Claiming instead that Dōgen belongs to mankind Watsuji with this declaration initiated the non-sectarian study of this thirteenth-century figure and in effect commenced what are called Dōgen Studies Dōgen kenkyū in modern times As one way of exploring what it might possibly mean to say that Dōgen belongs to mankind the Kuroda Institute held a conference on Dōgen at Tassajara Springs California from October 8 to 10 1981 The essays of this volume are a part of its result

Office of Education,1930 Movement Theory of Control Norbert Hornstein,Maria Polinsky,2010 Natural languages offer many examples of displacement i e constructions in which a non local expression is critical for some grammatical end Two central examples include phenomena such as raising and passive on the one hand and control on the other Though each phenomenon is an example of displacement they have been theoretically distinguished Movement rules have generated the former and formally very different construal rules the latter The Movement Theory of Control challenges this differentiation and argues that the operations that generate the two constructions are the same the differences arising from the positions through which the displaced elements are moved In the context of the Minimalist Program reducing the class of basic operations is methodologically prized This volume is a collection of original papers that argue for this approach to control on theoretical and empirical grounds as well The papers also develop and constrain the movement theory to account for novel phenomena from a variety of languages Controversies in Analytical Psychology Robert Withers,2003-09-02 Picks up on divisions within the area of analytical psychology and explores many of the most hotly contested issues with a group of leading international Jungian authors contributing papers from contrasting perspectives Works Ezekiel Hopkins,1863

The Gospel of Buddha Paul Carus, 1895 The best evidence that this book characterizes the spirit of Buddhism correctly can be found in the welcome it has received throughout the entire Buddhist world It has even been officially introduced in Buddhist schools and temples of Japan and Ceylon The eminent feature of the work is its grasp of the difficult subject and the clear enunciation of the doctrine of the most puzzling problem of tman as taught in Buddhism So far as we have examined the question of tman ourselves from the works of the Southern canon the view taken by Dr Paul Carus is accurate and we venture to think that it is not opposed to the doctrine of Northern Buddhism
