

DETERMINISM (SOCIOLOGY)

In sociology, determinism proposes that everything we do, in terms of our social conduct, is pre-determined by biological factors, like our DNA.

DEFINITION

Determinists, whether in the field of philosophy, sociology, or psychology have a belief that our actions, and in turn, reactions, are in some way predetermined by either biology, our environment, or in many cases both. Moreover, they assert that it is highly unlikely that a person would be able to alter their inevitable path or choices due to their biological or environmental conditions.

EXAMPLES

Determinism and Social Deviance: Assuming that a child who grows up in a violent household is predestined to commit violent crime.

Technological Determinism: The idea that advances in technology will fundamentally determine how society progresses and changes.

Cahill, 2021-01-24 This book explores the question of what it means to be a human being through sustained and original analyses of three important philosophical topics relativism skepticism and naturalism in the social sciences Kevin M Cahill s approach involves an original employment of historical and ethnographic material that is both conceptual and empirical in order to address relevant philosophical issues Specifically while Cahill avoids interpretative debates he develops an approach to philosophical critique based on Cora Diamond s and James Conant s work on the early Wittgenstein This makes possible the use of a concept of culture that avoids the dogmatism that not only typifies traditional metaphysics but also frequently mars arguments from ordinary language or phenomenology This is especially crucial for the third part of the book which involves a cultural historical critique of the

ontology of the self in Stanley Cavell's work on skepticism. In pursuing this strategy, the book also mounts a novel and timely defense of the interpretivist tradition in the philosophy of the social sciences. *Towards a Philosophical Anthropology of Culture* will be of interest to researchers working on the philosophy of the social sciences. Autoethnography as Method Heewon Chang, 2016-07-01. This methods book will guide the reader through the process of conducting and producing an autoethnographic study through the understanding of self, other, and culture. Readers will be encouraged to follow hands-on, though not prescriptive steps in data collection, analysis, and interpretation with self-reflective prewriting exercises and self-narrative writing exercises to produce their own autoethnographic work. Chang offers a variety of techniques for gathering data on the self, from diaries to culture grams to interviews with others, and shows how to transform this information into a study that looks for the connection with others present in a diverse world. She shows how the autoethnographic process promotes self-reflection, understanding of multicultural others, qualitative inquiry, and narrative writing. Samples of published autoethnographies provide exemplars for the novice researcher to follow.

On Creating a Usable Culture Maureen A. Molloy, 2008-02-20 Margaret Mead s career took off in 1928 with the publication of *Coming of Age in Samoa* Within ten years she was the best known academic in the United States a role she enjoyed all of her life In *On Creating a Usable Culture* Maureen Molloy explores how Mead was influenced by and influenced the meanings of American culture and secured for herself a unique and enduring place in the American popular imagination She considers this in relation to Mead s four popular ethnographies written between the wars *Coming of Age in Samoa* *Growing Up in New Guinea* *The Changing Culture of an Indian Tribe* and *Sex and Temperament in Three Primitive Societies* and the academic middle brow and popular responses to them Molloy argues that Mead was heavily influenced by the debates concerning the forging of a distinctive American culture that began around 1911 with the publication of George Santayana s *The Genteel Tradition* The creation of a national culture would solve the problems of alienation and provincialism and establish a place for both native born and immigrant communities Mead drew on this vision of an integrated culture and used her primitive societies as exemplars of how cultures attained or failed to attain this ideal Her ethnographies are really about America the peoples she studied serving as the personifications of what were widely understood to be the dilemmas of American selfhood in a materialistic individualistic society Two themes subtend Molloy s analysis The first is Mead s articulation of the individual s relation to his or her culture via the trope of sex Each of her early ethnographies focuses on a character and his or her problems as expressed through sexuality This thematic ties her work closely to the popularization of psychoanalysis at the time with its understanding of sex as the key to the self The second theme involves the change in Mead s attitude toward and definition of culture from the cultural determinism in *Coming of Age* to culture as the enemy of the individual in *Sex and Temperament* This trend parallels the consolidation and objectification of popular and professional notions about culture in the 1920s and 1930s *On Creating a Usable Culture* will be

eagerly welcomed by those with an interest in American studies and history cultural studies and the social sciences and most especially by readers of American intellectual history the history of anthropology gender studies and studies of modernism
