Self-Motioned Atomic Dialectical Materialist Logic H. Dallalbashi, 1979-07 **Self-Motioned Atomic Dialectical Materialist Logic** Hossein Dallalbashi, 2017-08-04 The Vantage Press which published this book in 1979 wrote this review on the book Most people think of science and philosophy as two separate and unrelated subjects The author of this book Hossein Dallalbashi shows how this need not be so and offers a through analysis of the relation between natural sciences and scientific materialistic philosophy He begins by showing how Karl Marx and Fredrick Engels took the mechanical materialist philosophy of their time and applied the idea of evolution to it thereby developing dialectical materialist logic The author points out how in order to be relevant philosophy must constantly assimilate the discoveries of natural sciences Lenin said such changes did not constitute revisionism a deviation from dialectical materialist logic but in fact were essential in Marxism The author believes the gap between science and philosophy is caused by scientists who are ignorant of scientific materialistic philosophy and philosophers who think they can continue philosophizing making sense and relating to people without having to acquire a comprehensive understanding of natural sciences and un interruptedly incorporate the new scientific discoveries into philosophy Mr Dallalbashi points out how the separation has been harmful to both Einstein claimed that his best students in atomic physics were those with having strong interest in scientific philosophy The author discusses the atomic structure as the building blocks of the Universe and how motion is inherent in all atoms He then promotes the notion of self motioned atomic dialectical materialist logic Throughout the book appropriate quotations are utilized from different famous philosophers and natural scientists supporting the author s thesis This book is scholarly and yet written in a vivid style with much original thinking by the author *Books Out-of-print* ,1986 **Bulletin of the Atomic Scientists** ,1954-05 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world *Books in Print* ,1982 *The Power of Negativity* Raya Dunayevskaya, 2002-01-01 Raya Dunayevskaya is hailed as the founder of Marxist Humanism in the United States In this new collection of her essays co editors Peter Hudis and Kevin B Anderson have crafted a work in which the true power and originality of Dunayevskaya s ideas are displayed This extensive collection of writings on Hegel Marx and dialectics captures Dunayevskaya s central dictum that contrary to the established views of Hegelians and Marxists Hegel was of signal importance to the theory and practice of Marxism The Power of Negativity sheds light not only on Marxist Humanism and the rooting of Dunayevskaya s Marxist Humanist theories in Hegel but also on the life of one of America s most penetrating and provocative critical thinkers *Bulletin of the Atomic Scientists* ,1994-11 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world *The Human Eros* Thomas M.
