**Routledge Handbook on the Politics of Global Health** Richard Parker, Jonathan García, 2018-12-07 In the early twenty first century key public health issues and challenges have taken centre stage on the global scene and health has been placed at the heart of our collective aspirations for human development and well being But significant debate exists not only about the causes but also about the possible solutions for nearly all of the most important global health challenges Competing visions of the values and perspectives that should underlie global health policies have emerged ranging from an emphasis on cost effectiveness and resource constraints on one extreme to new calls for health and human rights and renewed calls for health and social justice on the other The role of different intergovernmental agencies bilateral or unilateral donors public or private institutions and initiatives has increasingly been called into question whilst the spread of neoliberal policies and programmes and existing international trade regimes and intellectual property rights are deeply implicated in relation to global health responses This volume critically evaluates how the global health industry has evolved and how the interests of diverse political and economic stakeholders are shaping the context of a rapidly changing institutional landscape Bringing together leading authors from across the world the Handbook s eight sections

neoliberalization of food politics navigated the funding constraints of philanthropy and the welfare state and opposed the entrance of a Walmart into their community Through telling this story *Growing Gardens Building Power* offers insights into how the food justice movement is challenging the major structures and institutions that seek to curtail the transformative power of the food justice movement and its efforts to build a more just and sustainable world *Making a Living, Making a Life* Sara James, 2017-09-22 In a world in which individuals will undergo multiple career changes is it possible any longer to conceive of a job as a meaningful vocation Against the background of fragmentation and rationalisation of work this book explores the significance and meaning of work in contemporary life raising the question of whether people continue to feel motivated to dedicate their lives to their work or must now look to other areas of life for meaning Based on rich in depth interviews conducted with workers of different ages and across a broad range of occupations in the major city of Melbourne *Making a Living Making a Life* reveals that work continues to be a source of pride passion and purpose the author shedding light on the ways in which cultural narratives collective meanings and structural factors influence people's feelings about work An engaging and empirically grounded examination of the meaning and centrality of work to people's lives in today's liquid modern world this book will appeal to sociologists with interests in cultural sociology social theory ethics the sociology of work and questions of identity **Free Market Missionaries** Sharon Beder, 2012-06-25 In her recent book *Suited to Themselves* bestselling author Sharon Beder exposed how the global corporate elite have brazenly rewritten the rules of the global economy to line their pockets In this new book she turns her sights on the insidious underbelly of this global trend to show how they have also orchestrated a mass propaganda campaign to manipulate community values and convince us that their interest co-opting and controlling all of us in the name of the free market is in our interest During the 20th century business associations coordinated mass propaganda campaigns combining 20th century American PR methods with revitalized free market ideology from 18th century Europe The aim was to persuade people to eschew their own power as workers and citizens and forego their democratic power to restrain and regulate business activity Sophisticated corporate funded think tanks augmented these campaigns in the 1970s and 1980s promoting free enterprise and business friendly policies These free market missionaries now seek to change individual and institutional values through bolder strategies such as expanding share ownership and manipulating wider public concerns In each case the goal is the same the triumph of business values over community values Beder's is an intellectual call to arms challenge the ideology of the free market missionaries or be converted to it Capitalism, Social Privilege and Managerial Ideologies Ernesto R. Gantman, 2019-06-04 Originally published in 2005 This book analyzes the evolution of administrative thought from the nineteenth century to the present considering it as ideological discourse Rather than merely being a succession of fads Gantman shows how each successive discourse about the organization of work serves to legitimate social interests The book's compelling conclusion is that instead of a tendency towards increasing theoretical refinement what is more evident is a trend towards fictionalization

which ends in the contemporary paradigm of flatter more participative and democratic organizational forms Students and scholars interested in organization theory management history the sociology of work or critical management will gain many new insights from this historical reconstruction of the evolution of management thought **Working Without**
