complemented the classical Hollywood filmmaking style while still offering innovative novelty By the end of the 1930s color in film was thoroughly harnessed to narrative and it became elegantly expressive without threatening the coherence of the film's imaginary world *Harnessing the Technicolor Rainbow* is the first scholarly history of Technicolor aesthetics and technology as well as a thoroughgoing analysis of how color works in film Scott Higgins draws on extensive primary research and close analysis of well known movies including *Becky Sharp* *A Star Is Born* *Adventures of Robin Hood* and *Gone with the Wind* to show how the Technicolor films of the 1930s forged enduring conventions for handling color in popular cinema He argues that filmmakers and designers rapidly worked through a series of stylistic modes based on the demonstration restraint and integration of color and shows how the color conventions developed in the 1930s have continued to influence filmmaking to the present day Higgins also formulates a new vocabulary and a method of analysis for capturing the often elusive functions and effects of color that in turn open new avenues for the study of film form and lay a foundation for new work on color in cinema

The Routledge Companion to American Film History Pamela Robertson Wojcik, Paula J. Massood, 2025-02-12. Presenting new and diverse scholarship, this collection brings together original essays that explore American film history from a fresh perspective. Comprising an introduction and 34 chapters written by leading scholars from around the globe and edited by Pamela Robertson Wojcik and Paula J. Massood, this collection offers discussions of the American film industry from previously unexplored vantage points. Rather than follow a chronological format as with most film histories, this Companion offers a multiplicity of approaches to historiography and is arranged according to often underdeveloped or overlooked areas in American film, including topics such as alternate archives, hidden labor histories, style, racialized technologies, cinema's material cultures, spectators and fans, transnational film production, intermedial histories, history in and about films, and the historical afterlives of cinema. An exciting collection for serious film studies students and scholars interested in new perspectives and fresh approaches to thinking about and doing American film history. *Storyboarding* Steven Price, Chris Pallant, 2015-10-08. This study provides the first book-length critical history of storyboarding from the birth of cinema to the present day and beyond. Graham Greene and the Politics of Popular Fiction and Film B. Thomson, 2009-08-26. One of the most popular, respected, and controversial writers of the twentieth century, Greene's work has still attracted relatively little scholarly comment. Thomson charts the intricate dance between his novels and screenplays, his many audiences, and an intellectual establishment reluctant to identify the work of a popular writer as literature. *Starmaker* Milan Hain, 2023-08-07. David O. Selznick (1902-1965) was one of the most prominent film producers of the Hollywood studio era, responsible for such artistic and commercial triumphs as *King Kong*, *David Copperfield*, *Anna Karenina*, *A Star Is Born*, *Gone with the Wind*, *Rebecca*, *Spellbound*, and *The Third Man*. However, film production was not his only domain. Starting in the late 1930s, he built an impressive stable of stars within his own independent company, including Ingrid Bergman, Vivien Leigh, Joan Fontaine, Jennifer Jones, and Gregory Peck. In *Starmaker*, David O. Selznick and the Production of Stars in the Hollywood Studio System, author Milan Hain reveals the mechanisms by which Selznick and his collaborators discovered and promoted new stars and describes how these personalities were marketed, whether for financial gain or symbolic recognition and prestige. Using a wide range of archival materials, the book significantly complements and reshapes our understanding of Selznick's celebrated career by focusing on heretofore neglected aspects of his creative and business activities. It also sheds light on the US film industry during the Golden Age of Hollywood studios and in the postwar period when the established order began to break down. By structuring the book around Selznick and his role as a starmaker,

Hain demonstrates that star production and development in the Hollywood studio system was a highly organized and systematic activity though the respective strategies and procedures were often hidden from the public eye *Human Foundations of Management* D. Melé, C. Cantón, César González Cantón, 2014-11-30 *Human Foundations of Management* explores the human foundation of management and economic activity in a way that is accessible to readers The structure and contents of this book examines those aspects of the human being which are relevant to management and economic activities

Editing and Special/Visual Effects Charlie Keil, Kristen Whissel, 2016-08-26 Most moviegoers think of editing and special effects as distinct components of the filmmaking process We might even conceive of them as polar opposites since effective film editing is often subtle and almost invisible whereas special effects frequently call attention to themselves Yet film editors and visual effects artists have worked hand in hand from the dawn of cinema to the present day *Editing and Special Visual Effects* brings together a diverse range of film scholars who trace how the arts of editing and effects have evolved in tandem Collectively the contributors demonstrate how these two crafts have been integral to cinematic history starting with the trick films of the early silent era which astounded audiences by splicing in or editing out key frames all the way up to cutting edge effects technologies and concealed edits used to create the illusions Throughout readers learn about a variety of filmmaking techniques from classic Hollywood's rear projection and matte shots to the fast cuts and wall to wall CGI of the contemporary blockbuster In addition to providing a rich historical overview *Editing and Special Visual Effects* supplies multiple perspectives on these twinned crafts introducing readers to the analog and digital tools used in each craft showing the impact of changes in the film industry and giving the reader a new appreciation for the processes of artistic collaboration they involve
