Semantic Theory A Linguistic Perspective:

Semantic Theory Don Lee Fred Nilsen, Alleen Pace Nilsen, 1975 *Linguistic Perspectives on Literature* Marvin K.L. Ching, Michael C. Haley, Ronald F. Lunsford, 2014-01-10 Although linguistics is often a technical and increasingly abstruse discipline many linguists retain a concern for the way in which linguistics can shed light on literature and literary problems In their introductory chapter the editors of this collection of essays by linguists on either side of the Atlantic enunciate a bold stance that defines the theoretical relationship between linguistics and literature delimits what should be considered a linguistic analysis of literature and explains how such an analysis is related to current theories of readership and literary criticism The editors theory of the relationship between linguistic and literary studies stipulates an eclectic rather than a holistic approach and the essays they have gathered together reflect this belief The contributions include such varied approaches as transformational grammar text grammar and speech act theory and the topics analysed include many that are at the heart of literature such as topicalization imagery figurative language ambiguity and the play on words through puns The anthology as a whole illustrates how linguistic theory illuminates the very nature of literary language It also gives evidence of the new insights into literature that have arisen from a close analysis of the language in which the literature is encoded

Foundations of Speech Act Theory S.L. Tsohatzidis, 2002-09-11 Foundations of Speech Act Theory investigates the importance of speech act theory to the problem of meaning in linguistics and philosophy The papers in this volume written by respected philosophers and linguists significantly advance standards of debate in this area Beginning with a detailed introduction to the individual contributors this collection demonstrates the relevance of speech acts to semantic theory It includes essays unified by the assumption that current pragmatic theories are not well equipped to analyse speech acts satisfactorily and concludes with five studies which assess the relevance of speech act theory to the understanding of philosophical problems outside the area of philosophy of language

Claudia Maienborn, Klaus Heusinger, Paul Portner, 2019-02-19 Now in paperback for the first time since its original publication the material gathered here is perfect for anyone who needs a detailed and accessible introduction to the important semantic theories Designed for a wide audience it will be of great value to linguists cognitive scientists philosophers and computer scientists working on natural language The book covers theories of lexical semantics cognitively oriented approaches to semantics compositional theories of sentence semantics and discourse semantics This clear elegant explanation of the key theories in semantics research is essential reading for anyone working in the area *The Language of Memory in a Crosslinguistic Perspective* Mengistu Amberber, 2007 This book offers for the first time a detailed comparative study of how speakers of different languages express memory concepts While there is a robust body of psycholinguistic research that bears on how memory and language are related there is no comparative study of how speakers themselves conceptualize memory as reflected in their use of language to talk about memory This book addresses a key question how do speakers of different languages talk about the experience of having prior experiences coming to mind remembering or failing to come to mind forgetting A complex array of answers is provided through detailed grammatical and semantic investigation of different languages including English German Polish Russian and also a number of non Indo European languages Amharic Cree Dalabon Korean and Mandarin In addition the book calls for a broader interdisciplinary engagement by urging that cognitive semantics be integrated with other sciences of memory *Demonstratives in Cross-Linguistic Perspective* Stephen C. Levinson, Sarah Cutfield, Michael J. Dunn, N. J. Enfield, Sérgio Meira, 2018-07-19 Demonstratives play a crucial role in the acquisition and use of language Bringing together a team of leading scholars this detailed study a first of its kind explores meaning and use across fifteen typologically and geographically unrelated languages to find out what cross linguistic comparisons and generalizations can be made and how this might challenge current theory in linguistics psychology anthropology and philosophy Using a shared experimental task rounded out with studies of natural language use specialists in each of the languages undertook extensive fieldwork for this comparative study of semantics and usage An introduction summarizes the shared patterns and divergences in meaning and use that emerge *Chinese Syntax in a Cross-linguistic Perspective* Yen-hui Audrey Li, Andrew Simpson, Wei-Tien Dylan Tsai, 2015 Chinese Syntax in a Cross linguistic Perspective collects twelve new papers that explore the syntax of Chinese in comparison with other languages *Cognitive Neural Mechanism of Semantic Rhetoric* Qiaoyun Liao, Lijun Meng, 2022-10-21 This book is a necessary supplement to the theoretical exploration into semantic rhetoric particularly a breakthrough in the study of the relationship between the source domain and target domain involved in the construction of semantic rhetorical discourse The study focuses on rhetorical expressions constructed by means of semantic variation or deviation of concepts Based on the holistic cognitive pragmatic model and the framework of impartment and inheritance of connotation and denotation this book constructs a new framework the Annotation Denotation Relevance Inheritance Model ADRIM to explain the construing of

semantic rhetoric Besides rooted in the Index Hypothesis Theory and the research paradigm of affordance derivation in language comprehension three ERP experiments on metaphor irony and pun are conducted to demonstrate the psychological reality that people activate possible feature extraction in the process of understanding semantic rhetoric With those sample analyses and experiments the feasibility and operability of ADRIM are proved The book unfolds a combined approach of speculative research and empirical research and can provide a new methodological alternative for semantic rhetorical studies in different languages This title will be an essential read to students and scholars of Linguistics East Asian Studies and social workers who are interested in Language Studies in general Perspectives on Aspect H. Dekker, 2012-07-03 The

integrated theory of dynamic interpretation set out here will be a surprise to advanced researchers in linguistics. It combines classical formal semantics and modern dynamic semantics without altering the fundamental paradigm. At the book's core lies a pragmatically motivated notion of a dynamic conjunction of meanings, an idea that is worked out in full formal detail. This is applied to linguistic phenomena that involve anaphora, quantification and modality. The author demonstrates that in each area of application existing data can be neatly combined with new dynamic insights, but more importantly there is a genuine further payoff: the work generates treatments of phenomena that were not initially intended with functional readings of pronouns and quantifiers, Hobnob sentences and insights into what we now call Pierce's Puzzle. The outcome of a decade of work by the Amsterdam School of dynamic semantics, this volume condenses and reflects upon a vital body of research.

Words and the Mind Barbara Malt, Phillip Wolff, 2010-03. The study of word meanings promises important insights into the nature of the human mind by revealing what people find to be most cognitively significant in their experience. However, as we learn more about the semantics of various languages we are faced with an interesting problem. Different languages seem to be telling us different stories about the mind. For example, important distinctions made in one language are not necessarily made in others. What are we to make of these cross-linguistic differences? How do they arise? Are they created by purely linguistic processes operating over the course of language evolution? Or do they reflect fundamental differences in thought? In this sea of differences, are there any semantic universals? Which categories might be given by the genes, which by culture and which by language? And what might the cross-linguistic similarities and differences contribute to our understanding of conceptual and linguistic development? The kinds of mapping principles, structures and processes that link language and non-linguistic knowledge must accommodate not just one language but the rich diversity that has been uncovered. The integration of knowledge and methodologies necessary for real progress in answering these questions has happened only recently, as experimental approaches have been applied to the cross-linguistic study of word meaning. In *Words and the Mind*, Barbara Malt and Phillip Wolff present evidence from the leading researchers who are carrying out this empirical work on topics as diverse as spatial relations, events, emotion, terms, motion, events, objects, body part terms, causation, color categories and relational categories. By bringing them together, Malt and Wolff highlight some of the most exciting cross-linguistic and cross-cultural work on the language-thought interface from a broad array of fields including linguistics, anthropology, cognitive and developmental psychology and cognitive neuropsychology. Their results provide some answers to these questions and new perspectives on the issues surrounding them.

Where Semantics meets Pragmatics Klaus von Stechow, Ken Turner, 2021-10-25. The Current Research in the Semantic Pragmatics Interface series has carved out a new and vibrant area of research. This volume offers the reader a state-of-the-art record of new and established research in this area. Von Stechow and Turner's careful selection of topics and contributors ensures that each chapter integrates semantic and pragmatic facts into a single theory that each finds an adequate division of theoretical labour and that each attempts to

design and corroborate an elegant account of meaning and use that would be compatible with other aspects of human behaviour. Importantly, each paper in the volume focuses on linguistic detail, not merely abstract discussions of a theoretical nature. Thus, each paper makes extensive reference to the semantic and pragmatic facts of English and also other languages. This reference gives each of the proposed analyses a more adequate empirical edge and a sharper theoretical focus. This book is a must for all scholars and students interested in the new and vibrant discipline of semantics/pragmatics and to anyone who is fascinated by the prospect of working beyond the traditional disciplinary boundaries of linguistics and the philosophy of language. The chapters in this volume originate from a workshop at the Linguistic Society of America Summer Institute held at Michigan State University.
