Modern Ninjutsu: a Definitive Guide to the Tactics, Concepts, and Spirit of the Unconventional Combat Arts J. Alaric Justice,2016-07-12 Modern Ninjutsu A Definitive Guide to the Tactics Concepts Spirit of Unconventional Combat Arts is a path guide to realistic training and mind set development for combat situations wherever they may occur J Alaric Justice is a military combat veteran and former anti terrorist as well as a former law enforcement defensive tactics instructor and crisis negotiator Perhaps most important to this work he has survived many violent street encounters fights and attempted crimes in gang infested areas Speaking as someone who has been exposed to violence and opponent force in myriad forms he offers a unique view to practitioners of any system of how to handle crisis situations and maintain realism in their training for generations to come Research Report ,2010 Counterinsurgency Lessons from Malaya and Vietnam John Nagl,2002-10-30 Armies are invariably accused of preparing to fight the last war Nagl examines how armies learn during the course of conflicts for which they are initially unprepared in organization training and mindset He compares the development of counterinsurgency doctrine and practice in the Malayan Emergency from 1948 1960 with that developed in the Vietnam Conflict from 1950 1975 through use of archival sources and interviews with participants in both conflicts In examining these two events he argues that organizational culture is the key variable in determining the success or failure of attempts to adapt to changing circumstances Differences in organizational culture is the primary reason why the British Army learned to conduct counterinsurgency in Malaya while the American Army failed to learn in Vietnam The American Army resisted any true attempt to learn how to fight an insurgency during the course of the Vietnam Conflict preferring to treat the war as a conventional conflict in the tradition of the Korean War or World War II The British Army because of its traditional role as a colonial police force and the organizational characteristics that its history and the national culture created was better able to quickly learn and apply the lessons of counterinsurgency during the course of the Malayan Emergency This is the first study to apply organizational learning theory to cases in which armies were engaged in actual combat Training for Operations Other Than War (stability Operations) Margaret S. Snow,2015-07-16 Since World War II military intervention in developing world internal conflicts DWIC has become the primary form of U S military activity and these interventions have proven unsuccessful in places like Vietnam Iraq and Afghanistan This book argues such failure was entirely predictable even inevitable due both to the nature and dynamics of foreign military intrusion in the affairs of other countries and especially the DWICs that provide the major contemporary form of potential U S military in the foreseeable future Basing its analysis in both human nature the adverse reaction to prolonged outsider intrusion and historical analogy the book argues strongly why military intervention should be avoided as a national security option and the implications of such a policy decision for national security strategy and policy
