modern European thought *The Aeneid of Virgil: book vi, ed. by H.B. Cotterill* Publius Vergilius Maro, Virgil, 1901

David Lynch Swerves Martha P. Nochimson, 2013-04-15 Beginning with *Lost Highway* director David Lynch swerved in a new direction one in which very disorienting images of the physical world take center stage in his films Seeking to understand this unusual emphasis in his work noted Lynch scholar Martha Nochimson engaged Lynch in a long conversation of unprecedented openness during which he shared his vision of the physical world as an uncertain place that masks important universal realities He described how he derives this vision from the Holy Vedas of the Hindu religion as well as from his layman's fascination with modern physics With this deep insight Nochimson forges a startlingly original template for analyzing Lynch's later films the seemingly unlikely combination of the spiritual landscape envisioned in the Holy Vedas and the material landscape evoked by quantum mechanics and relativity In *David Lynch Swerves* Nochimson navigates the complexities of *Lost Highway* *The Straight Story* *Mulholland Drive* and *Inland Empire* with uncanny skill shedding light on the beauty of their organic compositions their thematic critiques of the immense dangers of modern materialism and their hopeful conceptions of human potential She concludes with excerpts from the wide ranging interview in which Lynch discussed his vision with her as well as an interview with Columbia University physicist David Albert who was one of Nochimson's principal tutors in the discipline of quantum physics *On the Literature and Thought of the German Classical Era* Hugh Barr Nisbet, 2021-05-20 This volume provides a valuable contribution to our knowledge of eighteenth and nineteenth century intellectual life inside and outside Germany Prof Karl S Guthke Harvard University This elegant collection of essays ranges across eighteenth and nineteenth century thought covering philosophy science literature and religion in the Age of Goethe A recognised authority in the field Nisbet grapples with the major voices of the Enlightenment and gives pride of place to the figures of Lessing Herder Goethe and Schiller These eleven essays range widely in their compass of thought and intellectual discourse dealing incisively with themes including the philosophical implications of literature and the relationship between religion science and politics The result is an accomplished reflection on German thought but also on its rebirth as Nisbet argues for the relevance of these Enlightenment thinkers for the readers of today The first half of this collection focuses predominantly on eighteenth century thought where names like Lessing Goethe and Herder but also Locke and Voltaire feature The second has a wider chronological scope discussing authors such as Winckelmann and Schiller while branching out from discussions of religion philosophy and literature to explore the sciences Issues of biology early environmentalism and natural history also form part of this volume The collection concludes with an examination of changing attitudes towards art in the aftermath of the Age of Goethe The essays in this volume have been previously published separately but are brought together in this collection to present Nisbet's widely acclaimed perspectives on this fascinating period of German thought It will be of interest to scholars and students of the intellectual life of Europe during the Enlightenment while its engaging and lucid style will also appeal to the general reader *Science and Civilisation in China:*

Volume 2, History of Scientific Thought Joseph Needham, Ling Wang, 1956-01-03 The second volume of Dr Joseph Needham's great work *Science and Civilisation in China* is devoted to the history of scientific thought Beginning with ancient times it describes the Confucian milieu in which arose the organic naturalism of the great Taoist school the scientific philosophy of the Mohists and Logicians and the quantitative materialism of the Legalists Thus we are brought on to the fundamental ideas which dominated scientific thinking in the Chinese middle ages The author opens his discussion by considering the remote and pictographic origins of words fundamental in scientific discourse and then sets forth the influential doctrines of the Two Forces and the Five Elements Subsequently he writes of the important sceptical tradition the effects of Buddhist thought and the Neo Confucian climax of Chinese naturalism Last comes a discussion of the conception of Laws of Nature in China and the West

Through the Daemon's Gate Dean Swinford, 2013-10-08 This book tells the story of the early modern astronomer Johannes Kepler's *Somnium* which has been regarded by science historians and literary critics alike as the first true example of science fiction Kepler began writing his complex and heavily footnoted tale of a fictional Icelandic astronomer as an undergraduate and added to it throughout his life The *Somnium* fuses supernatural and scientific models of the cosmos through a satirical defense of Copernicanism that features witches lunar inhabitants and a daemon who speaks in the empirical language of modern science Swinford's looks at the ways that Kepler's *Somnium* is influenced by the cosmic dream a literary genre that enjoyed considerable popularity among medieval authors including Geoffrey Chaucer Dante John of Salisbury Macrobius and Alan of Lille He examines the generic conventions of the cosmic dream also studying the poetic and theological sensibilities underlying the categories of dreams formulated by Macrobius and Artemidorus that were widely used to interpret specific symbols in dreams and to assess their overall reliability Swinford develops a key claim about the form of the *Somnium* as it relates to early science Kepler relies on a genre that is closely connected to a Ptolemaic or earth centered model of the cosmos as a way of explaining and justifying a model of the cosmos that does not posit the same connections between the individual and the divine that are so important for the Ptolemaic model In effect Kepler uses the cosmic dream to describe a universe that cannot lay claim to the same correspondences between an individual's dream and the order of the cosmos understood within the rules of the genre itself To that end Kepler's *Somnium* is the first example of science fiction but the last example of Neoplatonic allegory
