Human-Computer Interaction - INTERACT 2009 Tom Gross, Jan Gulliksen, Paula Kotzé, Lars Oestreicher, Philippe Palanque, Raquel Oliveira Prates, Marco Winckler, 2009-08-18 INTERACT 2009 was the 12th of a series of INTERACT international conferences supported by the IFIP Technical Committee 13 on Human Computer Interaction This year INTERACT was held in Uppsala Sweden organized by the Swedish Interdisciplinary Interest Group for Human Computer Interaction STIMDI in cooperation with the Department of Information Technology at Uppsala University Like its predecessors INTERACT 2009 highlighted both to the academic and to the industrial world the importance of the human computer interaction HCI area and its most recent breakthroughs on current applications Both experienced HCI researchers and professionals as well as newcomers to the HCI field interested in designing or evaluating interactive software developing new interaction technologies or investigating overarching theories of HCI found in INTERACT 2009 a great forum for communication with people of similar interests to encourage collaboration and to learn

INTERACT 2009 had Research and Practice as its special theme The reason we selected this theme is that the research within the field has drifted away from the practical applicability of its results and that the HCI practice has come to disregard the knowledge and development within the academic community

Leading Issues in Knowledge Management Research

Charles Despres, 2011 Knowledge management is one of the most enduring concepts aimed at how to improve management efficiency effectiveness and competitive advantage It was originally thought to be a fad but instead of being of interest for 5 to 10 years like other fads it has been at least 20 years since it became an issue in modern times Many researchers now believe that it is an important academic field of study which is essential to address from both a research point of view and a teaching perspective For that reason we have compiled 10 leading edge research papers which address some of the most important issues in that field This book represents a marker of our current state of knowledge in the knowledge management field

Designing Development Aditya Johri, Akshay Sharma, 2022-06-01 The creation of physical and material infrastructure is the cornerstone of human development not surprisingly engineers and designers are often motivated and inspired in their practice to improve the world around them to make things better for others and to apply their knowledge for the good of mankind These aspirations often get translated into engineering and design curricula where students and faculty work on development related projects usually under the category of community or service learning This book presents an overview of such an education and outreach program designed to empower stakeholders to improve their lives The project described here was an international multi institutional undertaking that included academic institutions non governmental organizations and private firms Within the academic setting an interdisciplinary set of actors that included engineering and industrial design students and faculty worked on the project We concretize our work by presenting a design case study that illustrates how different approaches can help guide

the works of engineers and designers as they create global infrastructures and localized artifacts We emphasize the importance of developing long term relationships with organizations on the ground in order to ensure appropriate design as well as successful transfer and long term use of designed artifacts We discuss the life trajectories of the authors to provide a grounded perspective on what motivated us to undertake this work and shaped our approach with the intention to demonstrate that there are multiple paths toward this goal Table of Contents Introduction Development of the Program Personal Trajectories Meet Professional Opportunities Intellectual Positioning of the Program Sociomaterial Infrastructures and Capable and Convivial Design Case Study Quick Response QR Code Based Immunization Solution Design for Development Course and Outreach Initiative Conclusion Lessons Learned

Configuring User-Designer Relations Alex Voss, Mark Hartswood, Rob Procter, Mark Rouncefield, Roger Slack, Monika Büscher, 2009-04-29 User designer relations concerns the sorts of working relationships that arise between developers and end users of IT products the different ways designers of IT products seek to engage with users and the ways users seek to influence product design It is through the shifting patterns of these relations that IT products are realised Although it has generally been accepted that achieving better user designer relations will improve the quality of IT products there has been little consensus on how this might be achieved This book aims to deepen our understanding of the relationships between users and designers both as they emerge in the wild and as a consequence of our attempts to intervene Through a series of case studies the book juxtaposes in depth explorations of different perspectives and approaches to thinking about and doing user designer relations considering important implications for design and computer science more generally

Designing Inclusive Systems Patrick Langdon, John Clarkson, Peter Robinson, Jonathan Lazar, Ann Heylighen, 2012-03-09 The Cambridge Workshops on Universal Access and Assistive Technology CWUAAT are a series of workshops held at a Cambridge University College every two years The workshop theme Designing inclusion for real world applications refers to the emerging potential and relevance of the latest generations of inclusive design thinking tools techniques and data to mainstream project applications such as healthcare and the design of working environments Inclusive Design Research involves developing tools and guidance enabling product designers to design for the widest possible population for a given range of capabilities There are five main themes Designing for the Real World Measuring Demand And Capabilities Designing Cognitive Interaction with Emerging Technologies Design for Inclusion Designing Inclusive Architecture In the tradition of CWUAAT we have solicited and accepted contributions over a wide range of topics both within individual themes and also across the workshop s scope We ultimately hope to generate more inter disciplinary dialogues based on focused usage cases that can provide the discipline necessary to drive further novel research leading to better designs The aim is to impact industry and end users as well governance and public design thereby effectively reducing exclusion and difficulty in peoples daily lives and society
