Dunton, Helen Malkin, 2008 A Guidebook to Contemporary Architecture of Montreal showcases 65 important and in some cases award winning buildings in this vibrant city These are structures that have changed how architecture is thought of in Montreal inspired transformations in neighborhoods around them used materials innovatively or been built with notable economy A two page spread covers each project with a concise descriptive text alongside photos drawings and floor plans Each building is presented by quarter or neighborhood encouraging readers to develop their own self guided walking tours The front and back flaps fold out into maps to guide visitors through the highlighted quarters **Montreal Architecture** François Rémillard, Brian Merrett, 1990 *Artificial Islands* Owen Hatherley, 2022-08-09 Should Britain form a new union with its old Dominions in Canada Australia and New Zealand Are they really our closest allies and relations And is there any reason why they should want to unite again with us Great Britain has just left one Union after years of bitter argument and divisive posturing But what if the island's future lies in another Union altogether with some of its former colonial kith and kin across the seas Why be in a Union with your immediate neighbours when you could instead be in a trans oceanic super state with our old friends in Canada Australia and New Zealand Welcome to the strange world of the CANZUK Union the name for a quixotic but apparently serious plan to reunify the white majority Dominions of the British Empire under the flag of low taxes strong borders and climate change denialism *Artificial Islands* tests the idea that Britain's natural allies and closest relations are in these three countries in North America and the Antipodes through a good look at the histories townscapes and spaces of several cities across the settler zones of the British Empire These are some of the most purely artificial and modern landscapes in the world British designed cities that were built with extreme rapidity in forcibly seized territories on the other side of the world from Britain Were these places really no more than just a reproduction of British Values planted in unlikely corners of the globe How are people in Auckland Melbourne Montreal Ottawa and Wellington re imagining their own history or their countries role in the British Empire and their complicity in its crimes And do they have any interest in a union with us **Ulysses Travel Guide Montreal** Ulysses travel guides, 2006 This guidebook contains 18 walking cycling or driving tours to help you discover the city's hidden treasures star rated so you can better organize your time More than 250 restaurants and 70 hotels with our favourites clearly indicated More than 30 maps to help you get your bearings and make sure you don't miss a thing Entire chapters devoted to entertainment with 70 of the best nightspots and shopping including everything from hip second hand stores to upscale boutiques *Montreal, City of Spires* Clarence Epstein, 2012-03-19T00:00:00-04:00 Of the fifty religious buildings discussed

in this book only a precious few remain standing despite the fact that Montreal boasts one of the largest and most eclectic groupings of Georgian and Victorian structures of any city in North America Following the British conquest of New France in 1759 a remarkable series of transformations took place in the small Catholic trading town of Montreal Given the diversity of settlers forced to live side by side the new church buildings that were to rise became strategic public spaces meeting places as well as power bases It was no wonder that by the time Mark Twain toured Canada's first metropolis in the 1880s he found that one could not throw a brick in the place without breaking a church window By addressing the social religious and architectural issues surrounding these colonial era structures it will become apparent that Montreal was at once a shining jewel in England's imperial crown a chief outpost of Catholicism in the New World as well as the British North American headquarters for more than a dozen independent congregations

*Architecture of Great Expositions 1937-1959* Rika Devos,Alexander Ortenberg,2016-03-09 This book investigates architecture as a form of diplomacy in the context of the Second World War at six major European international and national expositions that took place between 1937 and 1959 The volume gives a fascinating account of architecture assuming the role of the carrier of war related messages some of them camouflaged while others quite frank The famous standoffs between the Stalinist Russia and the Nazi Germany in Paris 1937 or the juxtaposition of the USSR and USA pavilions in Brussels 1958 are examples of very explicit shows of force The book also discusses some less known and more subtle messages revealed through an examination

of several additional pavilions in both Paris and Brussels of a series of expositions in Moscow of the Universal Exhibition in Rome that was planned to open in 1942 and of London's South Bank Exposition of 1951 all of them related in one way or another to either an anticipation of the global war or to its horrific aftermaths A brief discussion of three pre World War II American expositions that are reviewed in the Epilogue supports this point It indicates a significant difference in the attitude of American exposition commissioners who were less attuned to the looming war than their European counterparts The book provides a novel assessment of modern architecture's involvement with national representation Whether in the service of Fascist Italy or of Imperial Japan of Republican Spain or of the post war Franquista regime of the French Popular Front or of socialist Yugoslavia of the arising FRG or of capitalist USA of Stalinist Russia or of post colonial Britain exposition architecture during the period in question was driven by a deep faith in its ability to represent ideology The book argues that this widespread confidence in architecture's ability to act as a propaganda tool was one of the reasons why Modernist architecture lent itself to the service of such different masters
