*Pseudoscience and the Paranormal* Terence Hines,2010-09-30 Television the movies and computer games fill the minds of their viewers with a daily staple of fantasy from tales of UFO landings haunted houses and communication with the dead to claims of miraculous cures by gifted healers or breakthrough treatments by means of fringe medicine The paranormal is so ubiquitous in one form of entertainment or another that many people easily lose sight of the distinction between the real and the imaginary or they never learn to make the distinction in the first place In this thorough review of pseudoscience and the paranormal in contemporary life psychologist Terence Hines teaches readers how to carefully evaluate all such claims in terms of scientific evidence Hines devotes separate chapters to psychics life after death parapsychology astrology UFOs ancient astronauts cosmic collisions and the Bermuda Triangle faith healing and more New to this second edition are extended sections on psychoanalysis and pseudopsychologies especially recovered memory therapy satanic ritual abuse facilitated communication and other questionable psychotherapies There are also new chapters on alternative medicine which is now marketed in our drug stores and on environmental pseudoscience with special emphasis on the evidence that certain technologies like cell phones or environmental agents like asbestos cause cancer Finally Hines discusses the psychological causes for belief in the paranormal despite overwhelming evidence to the contrary This valuable highly interesting and completely accessible analysis critiques the whole range of current paranormal claims **The Secret**

**Influence of the Moon** Louis Proud,2013-12-01 The Moon is not a cold dead rock but a rich fascinating world just as alive as Earth Investigates the Moon as the home of an alien intelligence who controls humanity Examines several of NASA s Apollo missions and the findings they concealed Reveals the many holes in the Giant Impact theory about the Moon s origins and the evidence for a hollow artificial Moon Explores the deep influence of the Moon on the collective mind of humanity and occult teachings about the Moon from the Qabbalah tarot and other sources Despite being the most prominent celestial body after the Sun the Moon has many qualities that science has yet to explain Lunar rock samples reveal the Moon once had a magnetic field like the Earth and seismic experiments by NASA suggest the Moon is at least partially hollow For centuries

people have observed lights moving clouds and shadows and even the disappearance of entire craters via telescope Apollo astronauts repeatedly felt the presence of a non human intelligence during their Moon visits and many indigenous traditions speak of malevolent visitors from the Moon A growing body of astrophysical and geological evidence shows the Moon is not an entirely natural world that someone or something altered it long ago Louis Proud explores the phases and movements of the Moon along with its ancient and mysterious features its craters maria rilles tunnels and domes He examines several of NASA s Apollo missions showing not that NASA faked the Moon expeditions but that they concealed what the astronauts found there He explains the many holes in the commonly accepted Giant Impact theory of the Moon s origins and reveals the evidence for a hollow artificial Moon placed in orbit eons ago to observe Earth Examining the deep influence of the Moon on the collective mind of humanity Proud looks at what the Qabbalah the tarot and other occult traditions say about the Moon and interprets G I Gurdjieff s teachings that we are food for the Moon He investigates the Moon as a gateway to another realm as the Purgatory of Christianity and as the home of an alien intelligence who controls and exploits humanity Examining the Moon from both scientific and esoteric perspectives Proud shows the Moon is not a cold dead rock but a rich fascinating world just as alive as Earth

Myths, Symbols and Legends of Solar System Bodies Rachel Alexander,2014-11-04 This book is an amateur astronomer s guide to the mythology and symbolism associated with the celestial bodies in the Solar System and even includes some of the legendary tales of people who had or have a connection with these objects It explores different cultures for example the Greco Roman and the Norse and different times and how stories were used to explain the worlds they saw above them You d

be amazed how much of our world today reflects the myths and stories of these cultures Most amateur astronomers are familiar with the various Solar System objects but they will be only peripherally aware of what ancient cultures thought of these other worlds In fact the mythology of the planets challenges many twenty first century concepts and beliefs There are other books available on astromythology but this one focuses mostly on our own Solar System as opposed to the constellations and deep sky objects Alexander offers a new angle on timeless subjects and is exciting informative and dramatic as well as surprisingly relevant to everyday life Find out for yourself how our modern world is steeped in the bygone worlds of yesteryear      **Sorcery** J. Anthropocene underscores the limits of human agency and it foregrounds destructive impact of human actions on the ecosystem In a posthuman context therefore Petrucci problematises the human nonhuman binary by representing the erosion of the anthropocentric worldview in the face of environmental crises such as deforestation global warming and the Chernobyl nuclear disaster in *Bosco* 1999 *Heavy Water A Poem for Chernobyl* 2004 and *Half Life Poems for Chernobyl* 2004 In these collections challenging the perception of nonhuman matter as passive Petrucci emphasises the agency of trees and radioactive particles Similarly Alice Oswald moves the reader beyond the human centred treatment of the natural world Rejecting human exceptionalism Oswald's *Dart* 2002 presents a polyphonic meshwork where the voices of alternating human speakers and the River Dart interweave within a posthuman space Representing the intersubjective and dialogic exchanges between the human and nonhuman inhabitants of the Severn Estuary and the lunar cycle Oswald's *A Sleepwalk on the Severn* 2009 further problematises the subject object binary by creating a posthuman space of becoming grounded in a communicative framework Hence bringing Petrucci and Oswald together this study draws attention to trans corporeal and polyphonic entanglements of human nonhuman subject object and self other non binaries and it aims to show how poetry as a literary medium can contribute to questioning and transforming the anthropocentric vision of humankind in the contemporary world
