Dejection Ode completes J C C Mays analysis of Coleridge s poetry following Coleridge s Ancient Mariner Palgrave 2016 and Coleridge s Experimental Poetics Palgrave 2013 Dejection An Ode stands alone in Coleridge s oeuvre written at a time of personal crisis it reaches far back and deeply into his thinking in an attempt to find a poetic solution to ideas and problems he had mulled over for a long time Mays reveals how the poem also marks the opening of the second half of Coleridge s career as both poet and thinker In three central chapters Mays examines the new style that evolved in the process of writing the Ode the technical means of metrics rhyme and grammar language and allusion and symbol and structure He recounts the complex sometimes controversial critical history of the Ode and suggests an editorial solution to the problem created by the Letter to Sara Hutchinson re evaluates the position of Wordsworth in the poem apropos the political statement it makes clarifies the distinction between the views on Imagination expressed and those contained in Biographia Literaria and traces the links of the concept dejection as it underpins Coleridge s late poems      Further

centuries of art history      *Choice* ,2006      **Weltmeere** Alexander Kraus,Martina Winkler,2014-03-12 This volume presents pathbreaking studies on diverse human approaches to the ocean Focusing on the era from the late eighteenth through the early twentieth centuries the authors explore numerous fields of the oceans cultural history They describe in depth not only the process of scientification but also the modern wish to domesticate and aestheticize the sea to structure it and put it to economic use To describe these processes also means to challenge a fundamental assumption of a general and almost universal human perception of the seas as other different and empty The chapters of this volume advocate a different and non traditional approach to the history of the sea An approach based less on the well known myths of othering but rather on a genuine interest in a pluralistic concept of cultural history This claim is supported by both systematic and empirical arguments The range of topics explored in this volume includes among others the development of the aquarium Japanese whaling soundscapes of the polar seas psychological theories on humans and the sea the oceans in fiction oceanography in late nineteenth century and Russian maritime expansion
