The Himalayas and India-China Relations Devendra Nath

Panigrahi, 2016-04-14 This book provides a systematic analysis of China's rise to power. It traces the complex contours of its relation with India with the Himalayas prominently figuring in the discourse. Drawing on myths, legends, classical literature, archival resources, and contemporary political and international affairs, it brings to the fore several critical issues integral to India-China relations. It also studies the two nations in terms of trade across borders, exchange of ideas, and confluence of diverse cultures, imperial strategic rivalries in the colonial period, and recent military skirmishes and diplomatic interaction. Lucid and explanatory, this volume will interest scholars and researchers in international relations, history, political science, and area studies, especially those interested in the geopolitics of India and China.

Social Value, Climate Change and Environmental Stewardship: Insights from Theory and Practice William

Nikolakis, Renata Moura da Veiga, 2023-02-02 This book provides insight on the concept of social value and social return on investment (SROI) or measures to evaluate the social outcomes from interventions beyond simply jobs and income. It offers a new and holistic perspective on the values generated from environmental stewardship and forest governance and focuses on the methods, approaches, and outcomes for understanding social value and SROI. The book offers new directions in social value and SROI, including cultural and spiritual outcomes, gender equity, and health and well-being, and provides pathways for implementing interventions and measuring social impact. It includes state-of-the-art approaches from diverse and interdisciplinary experts drawn from academia and professional practice, including the voices and perspectives of Indigenous Peoples and local communities involved in programs with a focus on environmental stewardship. Social value and SROI are increasingly used to assess outcomes from conservation, and this book broadens the conversation on the impact and business case for these interventions. The book offers practical guidance to readers in pursuing social value and those seeking to measure it.

Effects of Climate Change on Agriculture, Land Resources, Water Resources, and Biodiversity in the United States Peter Backlund, 2009-05 This report by the National Science and Technology Council's U.S. Climate Change Science Program (CCSP) is part of a series of 21 reports aimed at providing current assessments of climate change science to inform public debate, policy, and operational decisions. These reports are also intended to help the CCSP develop future program research priorities. The CCSP's guiding vision is to provide the Nation and the global community with the science-based knowledge needed to manage the risks and capture the opportunities associated with climate and related environmental changes. This report assesses the effects of climate change on U.S. land resources, water resources, agriculture, and biodiversity. It was developed with broad scientific input.
