The Art of Management and the Aesthetic Manager John Dobson, 1999-03-30 Businesses that tend to flourish during any given time period usually reflect the aspirations and attitudes of the prevailing culture More specifically the managers within these businesses reflect these characteristics The challenge to management therefore is to read and interpret subtle cultural shifts and to understand how these shifts impact the role of business in society These facts beg the questions What is the prevailing culture of the twenty first century going to be and How is this culture going to be reflected in the attitudes and aspirations of business management The author of this remarkable book argues that the dominant culture will best be described as aesthetic in nature The manager views his or her role as essentially artistic seeking excellence in the craft rather than the pursuit of profit as the highest good Parts one and two describe the existing models of management the technical manager and the moral manager and explain why they are no longer suitable Then incorporating business ethics postmodern theory virtue ethics theory and examples drawn from industry Dobson convincingly argues the emergence of a new management paradigm Part three describes the new model of management as artistic and aesthetic enterprise and the manager as artisan Business scholars and theorists practicing

managers and students will all find this book fascinating and useful in preparing for business in the coming century

Business and Human Rights Wesley Cragg, 2012-01-01 The relationship between business and human rights has emerged in the last two decades as one of the most pressing issues in the field of business ethics. Do corporations have human rights responsibilities? If so, what is that nature of those responsibilities, and do they differ in any significant way from those of governments? Is it reasonable or realistic to expect corporations to respect human rights in environments where governments, particularly in the developing and underdeveloped world, need economic development and have a limited capacity and/or interest in enforcing human rights standards and laws? The contributors to this groundbreaking volume take up these questions, examining them from both theoretical and practical perspectives. Topics discussed include the debates leading to the creation of the ISO 26000 standard and the United Nations human rights framework for business entities, as well as the nature and limits of the human rights responsibilities of business, the roles and responsibilities of international trade bodies like the World Trade Organization in protecting human rights, and the implications of the current debate for international trade agreements and trade with China. The contributors also explore the effectiveness of voluntary human rights standards in the textile and clothing trade, mining, advertising, and the pharmaceutical industry. Scholars and students in management, philosophy, political science, sociology, and law will find this volume a great resource, as will activists, managers, and policy makers.
