Moral Issues In International Affairs The Problems Of European Integration:

Moral Issues in International Affairs Bill McSweeney, 2016-07-27 A number of eminent international scholars have come together in this volume to address the question of morality in international affairs and to explore some of the central normative issues which arise in the context of European integration The essays examine the general question of morality and address specific areas of concern in the proposals for further integration Debates on European Integration Mette Sangiovanni, 2017-09-16 This is a major new reader that brings together and assesses the most influential scholarly contributions that have fashioned the debate on European integration over the past 50 years It includes an original contribution reflecting on key issues in integration theory by Ben Rosamond *Rethinking Ethical Foreign Policy* David Chandler, Volker Heins, 2006-11-28 This new volume moves beyond the limits of current debate to show how today's foreign policy is increasingly about values rather than interests and why ethics are now playing a central role Rather than counterposing interests and ethics trying to find hidden agendas or emphasizing the double standards at play in ethical foreign policy this book brings together leading international theorists and a variety of stimulating approaches to develop a critical understanding of the rise of ethical foreign policy and to analyze the limits of ethical policy making on its own terms They deal with the limits of ethical foreign policy both in the light of the internal dynamic of these policies themselves and with regard to the often unintended consequences of policies designed to better the world This book also shows how the transformation of both the domestic and the international spheres of politics means that ethics has become a rallying point for non state actors and experts who gather around values and norms in order to force institutions to justify their behavior This process results from different structural changes and the transformation of the international system the individualization of Western societies and the growing importance of expertise in the justification of decisions in risk adverse societies It leads to a transformation of norms and to a redefinition of a global ethical framework that needs to be clarified This book will be of great interest to all students and researchers of foreign policy formation politics and international relations **The Social Construction of Europe** Thomas Christiansen, Knud Erik Jørgensen, Antje Wiener, 2001-06-01 This book is the first to systematically introduce and apply a social constructivist perspective to the study of European integration Social constructivism is carefully located in terms of its philosophical and methodological origins The wider debates and contribution of constructivist approaches to international relations are reviewed and the insights that might then be afforded to European studies fully explored Highlights include new theoretical contributions to the debate by Ernst B Haas Andrew Moravcsik and Steve Smith research on key aspects of European integration and EU governance applying a variety of constructivist approaches The Social Construction of Europe provides new and important in **The European Union and Europe's New Regionalism** Boyka M. Stefanova, 2017-10-24 This book presents a new approach to studying the European Union's regional and global relevance It recasts into a dynamic perspective the three most significant systemic processes

that define the EU as a regionalist project its enlargement neighborhood and mega regional policies The book argues that these processes collectively demonstrate a dynamic shift of the core tenets of European regionalism from an inward looking process of region building to an open selective system of global interactions Ethics and Foreign Policy Karen E.

Values and Principles in European Union Foreign Policy Sonia Lucarelli, Ian Manners, 2006-08-21 This book presents a fresh examination of the values and principles that inform EU foreign policy exploring the implications of these values and principles on the construction of European Union identity today The authors show how current debates on European Union foreign policy and on European identity tend to be kept separated as if the process of identity formation had only an internal dimension or it was not related to the external behaviour of an international actor Conceiving EU foreign policy in its broadest context as a set of political actions that are regarded by external actors as EU actions the book focuses on both Pillar I and Pillar II policies involving EU and member state actions and material political actions and less material ones such as speech acts Adopting a multidisciplinary perspective and drawing on political science political economy sociology environmental science and women s studies this book will be of great interest to students and scholars of European studies and politics European Security Culture Monica Gariup, 2017-05-15 Grounded on tenets of cultural realism and social constructivism Monica Gariup develops a theoretical framework to enhance our understanding of security culture at the European Union level She employs tools from political theory linguistic analysis and international relations theory to examine the implications of discourse and practice in European Security and Defense Policy ESDP Innovative in scope the volume analyzes whether elaborating a structurationist solution and proposing a discursive syntax of security makes it possible to identify and compare different types of security actors Providing a comprehensive and objective analysis on the links and

implications between the discourse and actual policy of the ESDP this is essential reading for scholars and researchers in European politics international relations security and cultural studies

ASEAN and Power in International Relations Jamie Stacey, 2020-09-07 This book analyses the Association of Southeast Asian Nations ASEAN as a powerful actor in International Relations by examining how the ASEAN community has evolved looking specifically at its relationship with the EU with regards to human rights The book adds to important contemporary debates within constructivist theory shedding light on the need for critical constructivism that emphasises language and contestation and what that may entail On an empirical level it challenges the idea of an EU centrism demonstrating how ASEAN is the major driving force behind its human rights and community aspirations as well as within the ASEAN EU relationship Furthermore this book engages with the introspection surrounding constructivism by addressing the trouble with norms and instead unpacking the relationship between ASEAN and the EU to show language power in play In particular the book looks at how language or rather coercive language helps us see contestation in action something that researchers sympathetic towards the idea of ASEAN's resistance have been unable to show through a focus on norms Tracing the evolution of the ASEAN community and human rights aspirations in a new light showing how exactly the EU remains an inspiration but not a model and more interestingly how ASEAN demonstrates power in the relationship the book will be of interest to academics working on Asian Studies European Studies International Relations Theory and human rights

Deconstructing "Ideal Power Europe" Münevver Cebeci, 2018-12-31 Deconstructing Ideal Power Europe The EU and Arab Change criticizes the dominant discourse on European foreign policy which represents the EU as a force for good in world politics Using a poststructuralist approach it deconstructs the EU's representation as an ideal power through an analysis of European foreign policy on the Southern Mediterranean before and after the Arab uprisings In this endeavor it displaces three major discourses which construct the EU as ideal the postmodern and post sovereign EU the EU as a model a virtuous example and the EU as a normative power discourses The major argument of the book is that the ideal power Europe meta narrative is especially produced and reproduced in the EU's approach towards the Southern Mediterranean and it manifests itself through the rhetoric of responsibility and universality in the aftermath of the Arab uprisings The book also provides an analysis of how the ideal power Europe meta narrative feeds into and legitimizes European governmentality in the world in general and in the case of the Southern Mediterranean after the Arab uprisings in particular Arguing that the depiction of the EU as postmodern post sovereign as a model an exemplar and as a normative power pertains to the representation of a regulatory ideal it elucidates how the EU pursues hegemonic practices in the Southern Mediterranean It further manifests how the EU's governmentality is marked by a securitized depoliticizing and technocratic approach which feeds into and gets legitimized by the dominant discourse on European foreign policy reproducing the EU's ideal identity vis vis its imperfect Arab other

Constitutionalism in Islamic Countries: Between Upheaval and Continuity Rainer Grote, Tilmann Röder, 2012-01-11 Constitutionalism in Islamic

Countries Between Upheaval and Continuity examines the question of whether something similar to an Islamic constitutionalism has emerged out of the political and constitutional upheaval witnessed in many parts of North Africa the Middle East and Central and Southern Asia In order to identify its defining features and to assess the challenges that Islamic constitutionalism poses to established concepts of constitutionalism this book offers an integrated analysis of the complex frameworks in Islamic countries drawing on the methods and insights of comparative constitutional law Islamic law international law and legal history European and North American experiences are used as points of reference against which the peculiar challenges and the specific answers given to those challenges in the countries surveyed can be assessed The book also examines ways in which the key concepts of constitutionalism including fundamental rights separation of powers democracy and rule of law may be adapted to an Islamic context thus providing valuable new insights on the prospects for a genuine renaissance of constitutionalism in the Islamic world in the wake of the Arab spring

Governing Europe William Walters, Jens Henrik Haahr, 2004-08-02 *Governing Europe* is the first book to systematically link Michel Foucault's hypotheses on power and governmentality with the study of European integration Through a series of empirical encounters that spans the fifty year history of European integration it explores both the diverse political dreams that have framed means and ends of integration and the political technologies that have made Europe a calculable administrable domain The book illustrates how a genealogy of European integration differs from conventional approaches By suspending the assumption that we already know what where Europe is it opens a space for analysis where we can ask how did Europe come to be governed as this and not that The themes covered by this book include the different constructions of Europe within discourses of modernization democratization insecurity and governance the imprint of modernism liberalism ordoliberalism neoliberalism and crime on the identity of the European Community European Union the historical relationship between European government and specific technologies of power technologies as diverse as planning price control transparency and benchmarking

The Politics of Unsustainability Ingolfur Bluhdorn, Ian Welsh, 2013-10-18 Two decades after its launch by the UN Brundtland Commission the paradigm of sustainability seems to have reached its limits Whilst the concept figures more prominently in public debate and policy making than ever before the ecological footprint of advanced liberal consumer societies continues to grow and the forceful economic development of countries such as China and India reinforces concerns that the world is moving further away from rather than closer towards the ideal of sustainability Given the proven failure of ecological modernisation strategies to secure sustainability the traditional question How may our established lifestyles and socio economic practices be made more sustainable needs to be supplemented by a second equally important question How do advanced modern consumer democracies try and manage to sustain what is known to be unsustainable Put differently traditional research into the politics of sustainability needs to be supplemented by a new line of research into the politics of unsustainability Exploring the recent transformation of eco political discourses and a variety of ways in which the unfolding

paradox of sustaining the unsustainable is being managed the present volume pioneers this new research agenda This book was previously published as a special issue of Environmental Politics

Security, Identity and Interests Bill

McSweeney,1999-11-04 Bill McSweeney addresses the central problem of international relations security and constructs a novel framework for its analysis He argues for the unity of the interpersonal societal and international levels of human behaviour and outlines a concept of security which more adequately reflects the complexity and ambiguity of the topic This book introduces an alternative way of theorizing the international order within which the idea of security takes on a broader range of meaning inviting a more critical and interpretative approach to understanding the concept and formulating security policy The recent shift to sociology in international relations theory has not as yet realized its critical potential for the study of security Drawing on contemporary trends in social theory Dr McSweeney argues that human agency and moral choice are inherent features of the construction of the social and thus international order and hence of our conception of security and security policy

The Ashgate Research Companion to Ethics and International Relations Patrick Hayden,2016-04-01 While skepticism about the role of moral considerations in international politics has been influential within the discipline of international relations IR those writing on topics such as war peace rights and trade up until the twentieth century took seriously the importance of ethical values and moral debates The 1990s and 2000s have seen a substantial growth of attention to the ways in which IR conceives and analyzes themes of an ethical nature and how issues problems and policies involving ethics are addressed by a variety of actors within the international system This indispensable research companion widens the perspective from ethics and international relations to ethics in international relations redressing the mis perception that ethical concepts principles norms and rules are not in part constitutive of the international system and the agents acting within that system Necessarily cross disciplinary expertise is drawn from IR and also philosophy political theory religious studies history and law making this an ideal volume for any library reference collection
