Moral Matters Ethical Issues In Medicine And The Life Sciences:

Moral Matters Arthur L. Caplan, 1995 Discussion of key medical ethical issues of this decade abortion medical and surgical test tube babies waste of resources euthanasia AIDS violence homosexuality gene scares nicotine and other drugs diets lying and fraud research among others *Biology Fundamentals and Caplan's Moral Matters* Gil Brum, Arthur Caplan, Larry McKane, 1995-01-01 **Medical Ethics** Robert M. Veatch, 1997 A collection of readings on topics such as abortion organ transplantation and HIV Valuable for practitioners and students of medical ethics **Bioethics and Moral Content: National Traditions of Health Care Morality** H. Tristram Engelhardt Jr., L.M. Rasmussen, 2013-11-11 This volume explores the plurality of moral perspectives shaping bioethics It is inspired by Kazumasa Hoshino's critical reflections on the differences in moral perspectives separating Japanese and American bioethics It offers a rich perspective of the range of approaches to bioethics and brings into question whether there is unambiguously one ethics for bioethics to apply **The Perfect Baby** Glenn McGee, 2000 The Perfect Baby is the most popular introduction to ethical issues in genetics This new edition has been updated to discuss and debate advances in high tech reproduction genetic testing gene therapy human cloning and stem cell research It includes a new epilogue by cloning pioneer Ian Wilmut and Glenn McGee *The Fountain of Youth* Stephen G. Post, Robert H. Binstock, 2004-04-08 A wide variety of ambitions and measures to slow stop and reverse phenomena associated with aging have been part of human culture since early civilization From alchemy to cell injections to dietary supplements the list of techniques aimed at altering the processes of aging continues to expand Charlatans quacks and entrepreneurs proffering anti aging products and practices have always exploited uninformed customers and instilled doubt and apprehension toward practices intended to extend life Recently however the pursuit of longevity has developed into a respectable scientific activity Many biologists are substantially funded by the government and the private sector to conduct research that they believe will lead to effective anti aging interventions While many embrace this quest for prolongevity extended youth and long life others fear its consequences If effective anti aging interventions were achieved they would likely bring about profound alterations in the experiences of individual and collective life What if aging could be decelerated to the extent that both average life expectancy and maximum life span would increase by forty percent What if all humans could live to be centenarians free of the chronic diseases and disabilities now commonly associated with old age What if modern scientists could find the modern equivalent to the Fountain of Youth that Ponce de Leon sought This book addresses these questions by exploring the ramifications of possible anti aging interventions on both individual and collective life Through a series of essays it examines the biomedical goal of prolongevity from cultural scientific religious and ethical perspectives offering a sweeping view into the future of aging Medical Benefit and the Human Lottery Duff R. Waring, 2008-01-18 Bioethicists moral philosophers and social policy analysts have long debated about how we should decide who shall be saved with scarce lifesaving resources when not all can be saved It is often claimed that it is fairer to save

younger persons and that age is an ethically relevant consideration in such tragic decisions Medical benefit should be maximized and final selection should aim to minimize the contaminating influence of chance These claims are challenged by Duff R Waring in *Medical Benefit and the Human Lottery* one of the few books that attempts a sustained defence of random patient selection This book combines ethics and political philosophy in its novel and strict egalitarian approach to patient selection for transplantable organs Waring addresses the question of whether we should choose between lives on the basis of fair chances or best outcomes He argues that final selection criteria should be based on fair chances that equalize opportunity as opposed to best outcomes His defence of hardy egalitarianism aims to show that random selection by lottery can affirm both a common humanity and the equal value of lives The notion of patient selection by lottery has not fared well in bioethics and has been regarded by some as a moral affront Waring argues that a human selection lottery may be neither as crude nor as ethically anomalous as some have supposed Indeed it can reflect a familiar conception of equality as a political and moral ideal This conception abstracts from many undeniable differences between patients and claims that scarce resources should be allocated on the principled assumption that each of their lives is equally worth saving The book is also notable for its critiques of some recent utilitarian notions of medical benefit which can have an age biased impact on elderly patients Waring then argues against the leading contemporary age based approaches to patient selection He explores the way random selection by lottery can affirm his egalitarian ethos in cases where eligible transplant candidates have each passed a threshold level of prospective medical benefit that has been set by democratic deliberation Taming chance with a human lottery is defended as the most lucid means of ensuring equal opportunity In so doing Waring argues that we give the principle of equal concern and respect a radical expression above a noncomparative threshold of medical benefit each candidate can have an equal claim to life

Health, Disease, and Illness Arthur L. Caplan, James J. McCartney, Dominic A. Sisti, 2004 Drapetomania was a little known disease found among black slaves in the United States in the 1850s The main symptom according to medical opinion The desire to run away from slave masters In earlier centuries gout was understood as a metabolic disease of the affluent so much so that it became a badge of upper crust honor and a medical excuse to avoid hard work Today is there such a thing as mental illness or is mental illness just a myth Is Alzheimer's really a disease What is menopause A biological phenomenon or a social construction In this successor volume to the 1981 *Concepts of Health and Disease* the three editors Caplan McCartney and Sisti explore how society understands and determines health disease and illness The 28 classic essays are divided into four parts Historical Discussions Characterizing Health Disease and Illness Clinical Applications of Health and Disease and Normalcy Genetic Disease and Enhancement The Future of the Concepts of Health and Disease Drawing on a wide variety of sources from Galen 150 CE to Maimonides 1150 to contemporary bioethicists and philosophers the editors demonstrate how concepts of health and disease evolve from generation to generation and remain despite claims of scientific objectivity culture and value laden Foreword by Edmund Pellegrino M D

author of numerous books on philosophy and medicine *Bioethics: Asian Perspectives* Ren-Zong Qiu, 2013-06-29 *Bioethics Asian Perspectives* A Quest for Moral Diversity is the first volume on bioethics all contributors of which are exclusively non western scholars unfolds a rich and colourful picture addresses thorny bioethical issues from comprehensive Asian perspectives and different from the western paradigm of bioethics covers many topics including the intellectual foundation of Asian bioethics bioethics and Asian culture life and death euthanasia and end of life care in Asia shows in its discussions moral diversity in Asia sheds light on the debate about universal ethics global ethics and moral diversity The book is intended for senior undergraduate and graduate students interested in bioethics as well as for bioethicists philosophers physicians scholars of Asian and culture studies geneticists sinologists medical anthropologists health administrators health officials for relations with Asia foundation officers for health programs in Asia western journalists in Asia and officers of international organizations for Asia **Existentialism, Feminism and Simone de Beauvoir** J. Mahon, 2015-12-17 Simone de Beauvoir made her own distinctive contribution to existentialism in the form of an ethics which diverged sharply from that of Jean Paul Sartre In her novels and philosophical essays of the 1940s she produced not just a recognizably existentialist ethics but also a character ethics and an ethics for violence These concerns stemming from her own personal philosophical background give a vital contemporary resonance to her work De Beauvoir's feminist classic *The Second Sex* reflects her earlier philosophical interests and is considerably strengthened by this influence This book defends her existentialist feminism against the many reproaches which have been levelled against it over several decades not least the criticism that it is steeped in Sartrean masculinism Retrieving the Natural Law J. Daryl Charles, 2008-04-14 J Daryl Charles argues that a traditional metaphysics of natural law lies at the heart of the present reconstructive project and that a revival in natural law thinking is of the highest priority for the Christian community as we contend in rather than abdicate the public square Nowhere is this more on display than in the realm of bioethics where the most basic moral questions human personhood human rights versus responsibilities the reality of moral evil the basis of civil society are being debated from publisher description *A Death Retold* Keith Wiloo, Julie Livingston, Peter Guarnaccia, 2009-09-15 In February 2003 an undocumented immigrant teen from Mexico lay dying in a prominent American hospital due to a stunning medical oversight she had received a heart lung transplantation of the wrong blood type In the following weeks Jesica Santillan's tragedy became a portal into the complexities of American medicine prompting contentious debate about new patterns and old problems in immigration the hidden epidemic of medical error the lines separating transplant haves from have nots the right to sue and the challenges posed by foreigners crossing borders for medical care This volume draws together experts in history sociology medical ethics communication and immigration studies transplant surgery anthropology and health law to understand the dramatic events the major players and the core issues at stake Contributors view the Santillan story as a morality tale about the conflicting values underpinning American health care about the politics of transplant medicine about how a nation debates deservedness

The Company Doctor Elaine Draper, 2003-01-30 To limit the skyrocketing costs of their employees health insurance companies such as Dow Chevron and IBM as well as many large HMOs have increasingly hired physicians to supervise the medical care they provide As Elaine Draper argues in *The Company Doctor* company doctors are bound by two conflicting ideals serving the medical needs of their patients while protecting the company's bottom line Draper analyzes the advent of the corporate physician both as an independent phenomenon and as an index of contemporary culture reaching startling conclusions about the intersection of corporate culture with professional autonomy Drawing on over 100 interviews with company physicians scientists and government and labor officials as well as historical legal and statistical sources and medical trade association data Draper presents an illuminating overview of the social context and meaning of professional work in corporations Draper finds that while medical journals speeches and ethical codes proclaim the independent professional judgment of corporate physicians the company doctors she interviewed often expressed anguish over the tightrope they must walk between their patients health and the corporate oversight they face at every turn Draper dissects the complex position occupied by company doctors to explore broad themes of doctor patient trust employee loyalty privacy issues and the future direction of medicine She addresses such controversial topics as drug screening and the difficult position of company doctors when employees sue companies for health hazards in the workplace Company doctors are but one example of professionals who have at times ceded their autonomy to corporate management Physicians provide the prototypical professional case for exploring this phenomenon due to their traditional independence extensive training and high levels of prestige But Draper expands the scope of the book tracing parallel developments in the law science and technology to draw insightful conclusions about changing conditions in the professional workplace as corporate cultures everywhere adapt to the new realities of the global economy *The Company Doctor* provides a compelling examination of the corporatization of American medicine with far reaching implications for professionals in many other fields Smart Mice,

Not-so-smart People Arthur L. Caplan, 2008 Famed bioethicist Arthur Caplan shares his provocative opinions on all things bioethical

Organ and Tissue Transplantation David Price, 2017-05-15 Organ transplantation has been one of the miracles of modern day medicine but in addition to presenting enormous technical and clinical challenges it throws up major ethical and legal issues principally from the perspective of the donor Evolving capabilities in the spheres of both organ and tissue transplantation coupled with rapidly escalating demand assert consistent and critical pressure on our ethical and legal principles and frameworks including the expansion of the potential donor pool beyond the conventional categories of donor This volume brings together seminal papers analyzing such matters in the context of an ever increasingly important area of clinical practice

Inalienable Rights Terrance McConnell, 2000-10-19 This book explains what inalienable rights are and how they restrict the behavior of their possessors McConnell develops compelling arguments to support the inalienability of the right to life the right of conscience and a competent person's right not to have medical treatment administered without consent Yet surprisingly he argues that the inalienability of the right to life does not entail that voluntary euthanasia or assisted suicide are wrong This distinctive defense of inalienable rights will appeal to medical ethicists and other applied ethicists political theorists and philosophers of law
