Moral Paradoxes Of Nuclear Deterrence:

Moral Paradoxes of Nuclear Deterrence Gregory S. Kavka, 1987-10-30 This volume examines the complex and vitally important ethical questions connected with the deployment of nuclear weapons and their use as a deterrent. A number of the essays contained here have already established themselves as penetrating and significant contributions to the debate on nuclear ethics. They have been revised to bring out their unity and coherence and are integrated with new essays. The book's exceptional rigor and clarity make it valuable whether the reader's concern with nuclear ethics is professional or personal. Part I explores the morality of nuclear deterrence from each of the two dominant traditions in moral philosophy: deontology and consequentialism, and points out a number of interesting ethical dilemmas. Part II criticizes a variety of alternatives to deterrence: unilateral nuclear disarmament, world government, strategic defense against ballistic missiles, and nuclear coercion, and argues for mutual nuclear disarmament as a realistic and desirable long-run alternative. Morality, Prudence,

and Nuclear Weapons Steven P. Lee, 1996-11-13 This 1993 book is the first post-Cold War assessment of nuclear deterrence, providing a comprehensive normative understanding of nuclear deterrence policy. 10 Moral Paradoxes Saul

Smilansky, 2008-04-30 Presenting ten diverse and original moral paradoxes, this cutting-edge work of philosophical ethics makes a focused concrete case for the centrality of paradoxes within morality. Explores what these paradoxes can teach us about morality and the human condition. Considers a broad range of subjects from familiar topics to rarely posed questions among them: Fortunate Misfortune, Beneficial Retirement, and Preferring Not To Have Been Born. Asks whether the existence of moral paradox is a good or a bad thing. Presents analytic moral philosophy in a provocative, engaging, and entertaining way, posing new questions, proposing possible solutions, and challenging the reader to wrestle with the paradoxes themselves.

Rational Commitment and Social Justice Jules L. Coleman, Christopher W. Morris, Gregory S. Kavka, 1998-11-13 Gregory S. Kavka (1947-94) was a prominent and influential figure in contemporary moral and political philosophy. The essays in this volume are concerned with fundamental issues of rational commitment and social justice to which Kavka devoted his work as a philosopher. The essays take Kavka's work as a point of departure and seek to advance the respective debates. The topics include the relationship between intention and moral action, as part of which Kavka's famous toxin puzzle is a focus of discussion; the nature of deterrence; the rationality of moral contractarian ethics; and the contemporary relevance of Hobbes' political thought. Incorporating important philosophical statements of problems and fresh contributions to the ongoing debate about rational intention, this volume will interest not just philosophers but also political scientists and economists.

Behavioral Economics and Nuclear Weapons Anne I. Harrington, Jeffrey W. Knopf, 2019-08-15 Recent discoveries in psychology and neuroscience have improved our understanding of why our decision-making processes fail to match standard social science assumptions about rationality. As researchers such as Daniel Kahneman, Amos Tversky, and Richard Thaler have shown, people often depart in systematic ways from the predictions of the rational actor model of classic economic thought.

because of the influence of emotions cognitive biases an aversion to loss and other strong motivations and values These findings about the limits of rationality have formed the basis of behavioral economics an approach that has attracted enormous attention in recent years This collection of essays applies the insights of behavioral economics to the study of nuclear weapons policy Behavioral economics gives us a more accurate picture of how people think and as a consequence of how they make decisions about whether to acquire or use nuclear arms Such decisions are made in real world circumstances in which rational calculations about cost and benefit are intertwined with complicated emotions and subject to human limitations Strategies for pursuing nuclear deterrence and nonproliferation should therefore argue the contributors account for these dynamics in a systematic way The contributors to this collection examine how a behavioral approach might inform our understanding of topics such as deterrence economic sanctions the nuclear nonproliferation regime and U S domestic debates about ballistic missile defense The essays also take note of the limitations of a behavioral approach for dealing with situations in which even a single deviation from the predictions of any model can have dire consequences

The War That Must Not Occur Jean-Pierre Dupuy, 2023-09-19 The possibility of a nuclear war that could destroy civilization has influenced the course of international affairs since 1945 suspended like a sword of Damocles above the heads of the world's leaders The fact that we have escaped a third world war involving strategic nuclear weapons indeed that no atomic weapon of limited power has yet been used under battlefield conditions seems nothing short of a miracle Revisiting debates on the effectiveness and ethics of nuclear deterrence Jean Pierre Dupuy is led to reformulate some of the most difficult questions in philosophy He develops a counterintuitive but powerful theory of apocalyptic prophecy once a major catastrophe appears to be possible one must assume that it will in fact occur Dupuy shows that the contradictions and paradoxes riddling discussions of deterrence arise from the tension between two opposite conceptions of time one in which the future depends on decisions and strategy and another in which every occurring event is one that could not have failed to occur Considering the immense destructive power of nuclear warheads and the almost unimaginable ruin they are bound to cause Dupuy reaches a provocative conclusion whether they bring about good or evil does not depend on the present or future intentions of those who are in a position to use them The mere possession of nuclear weapons is a moral abomination

Applied Ethics in a Troubled World Edgar Morscher, Otto Neumaier, Peter M. Simons, Peter Simons, 1998-03-31 The 23 papers that were prepared for a 1991 symposium that was cancelled beneath the weight of public and professional protests at some of the speakers invited particularly Peter Singer They analyze the application of theoretical considerations arising from philosophical reflection to particular concrete cases and situations of moral conflict in such fields as the environment biology and medicine business and professions politics law and society Among the topics are a philosophical critique of legal rights for natural objects comparing the value of human and nonhuman life business ethics as a goal rights system liberal society and planned morality and moral philosophy and its function No subject index Annotation copyrighted by Book News Inc Portland OR

Reasons and Intentions Bruno Verbeek, 2016-12-05 There are a number of problems in philosophy that seem to share a similar possible solution Why do promises and contracts bind Why ought citizens and judges obey the law and Can we realize the gains to be made from cooperation All three problems as well as some others share a possible solution in the form of rational internal commitment Reasons and Intentions is a state of the art overview of the relevant positions on the possibility of such commitment including critical ones The introduction provides a survey of the central problem of the volume how the will can bind itself and still be instrumental in nature and the various positions which are further examined in the contributions Addressing the question of the relation between intentions and action the considerations which make an intention rational and how this translates into our conception of moral agency this book brings together specially commissioned essays by the leading scholars in the field

Moral Constraints on War Bruno Coppieters, N. Fotion, 2008-01-01 This second edition of Moral Constraints on War offers a principle by principle presentation of the trans cultural roots of the ethics of war in an age defined by the increasingly international nature of military intervention Parts one and two trace the evolution of Just War Theory analyzing the principles of jus ad bellum and jus in bello the principles that determine under what conditions a war may be started and then conducted Each chapter provides a historical background of the principle under discussion an explanation of the principle and numerous historical examples of its application In Part three case studies apply the theories discussed to NATO s humanitarian mission in Kosovo terrorism and the Iraq War Bringing together an international coterie of philosophers and political scientists this accessible and practical guide offers students of military ethics and international relations rich up to the minute insight into the pluralistic character of Just War Theory

Cyberwar Jens David Ohlin, Kevin Govern, Claire Oakes Finkelstein, 2015 Cyber warfare has become more pervasive and more complex in recent years It is difficult to regulate as it holds an ambiguous position within the laws of war This book investigates the legal and ethical ramifications of cyber war considering which sets of laws apply to it and how it fits into traditional ideas of armed conflict

Thinking through Science and Technology Glen Miller, Helena Mateus Jerónimo, Qin Zhu, 2023-03-27 Groundbreaking in its range of disciplines and cultural backgrounds Thinking through Science and Technology explores how individual and societal beliefs values and actions are transformed by science technology and engineering Practical and theoretical insights from philosophers policymakers STS scholars and engineers illuminate the promise perils and paradoxes that arise with technoscientific change This collection of original research develops a philosophical understanding of technology and its inscription in a wider web of social and political meanings values and civilizational change It explores foundational beliefs at the core of engineering education and practice with an emphasis on the movement of ideas between Western and Chinese scholars as well as the complex interwoven relationship between ideas from religion science and technology as they have

evolved in the West Contributors also critically examine the forces and frameworks that shape the development and evaluation of scientific practice and the innovation and adoption of technology with an emphasis on national and global policy The volume offers a critical and timely reflection on science and technology that counters trends toward technological optimism on the one hand and disciplinary and cultural regionalization on the other Chapters written by prominent and promising scholars from around the world make this a global resource its breadth and clarity make it a superb introduction for those new to its fields It serves as an essential reference for established scholars as well as anyone seeking a more comprehensive understanding of social and technoscientific entanglements that permeate contemporary life List of contributors Gordon Akon Yamga Jennifer Karns Alexander Andoni Alonso Pamela Andanda Larry Arnhart Li Bocong Albert Borgmann Adam Briggie Jose A L pez Cerezo Mark Coeckelbergh Daniel C r zuelle Neelke Doorn Jean Pierre Dupuy Andrew Feenberg Jose Lu s Garcia Tricia Glazebrook Janna van Grunsven J Britt Holbrook Helena Jer nimo Tong LI Yongmou LIU Lavinia Marin Glen Miller Carl Mitcham Suzanne Moon Byron Newberry Jean Robert Sabine Roeser Taylor Stone Sajay Samuel Daniel Sarewitz Jen Schneider Jos Antonio Ullate Carlos Verdugo Serna Nan WANG The Ethics of War and Peace Nigel Dower, 2013-08-26 This book presents a clear and comprehensive introduction to the diverse and wide ranging ethical aspects of war and peace In a fair minded and engaging analysis Nigel Dower introduces the different ethical theories in traditional and contemporary debates realism just war theory and pacifism and subjects each to detailed critical scrutiny He frames these debates within a related but distinct framework of three approaches to international relations namely skeptical realism internationalism and cosmopolitanism The book also identifies and evaluates two further important perspectives militarism and pacificism Whilst analyzing the advantages and disadvantages of the different outlooks Dower makes a strong case for a cosmopolitan pacifist position arguing that we need to see peace in more positive terms than merely the absence of war The book uses a wide range of examples from across the world and includes discussion of nuclear weapons new wars terrorism humanitarian intervention and human security Written as a textbook for students who have no prior knowledge of philosophical ethics The Ethics of War and Peace is designed to help students understand and see the relevance of how a professional philosopher can engage ethically with the world Each chapter contains a helpful survey of its contents at the beginning and a set of questions for individual reflection or group discussion at the end This book will be essential reading for students of security studies conflict resolution peace studies philosophy and political theory and anyone interested in the ethical questions which arise from the study of war and peace **The Sword and the Cross** James H. Toner, 1992-01-30 The Sword and the Cross is a study of the relationships that exist between politics and ethics Its intention is to point out that moral convictions conceived and implemented without political wisdom can be bankrupt and that geopolitical strategy formulated and effected without ethical character can be disastrous Toner contends that politics and ethics are different sides of the same coin Therefore commanders that is leaders in politics and government in diplomacy and in the military

must develop both strategic sense and ethical intuition A study of the relationship between the sacred and the profane this book promotes an understanding of the ways in which power and purpose can and must be complementary This study concludes that violence and conflict are part of human existence and that full and final redemption from our struggles is the gift of grace and not of human artifice At the same time we have the burden and the glory of doing all we can to achieve our own safety and happiness which requires political and military prudence The reconciliation of faith or conscience with power or command is the task of leaders who are informed by civic virtue In turn civic virtue is the product of wise education rooted in serious study of what ought to be as well as of what is but ethically impoverished modern education too rarely asks questions about visions of the Good Because these conclusions are rooted in a controversial religious and philosophical tradition they will generally challenge the accepted views in the field

Advocating Weapons, War, and Terrorism Ian E. J. Hill, 2018-08-28 Techn s Paradox a frequent theme in science fiction is the commonplace belief that technology has both the potential to annihilate humanity and to preserve it Advocating Weapons War and Terrorism looks at how this paradox applies to some of the most dangerous of technologies population bombs dynamite bombs chemical weapons nuclear weapons and improvised explosive devices Hill s study analyzes the rhetoric used to promote such weapons in the nineteenth and twentieth centuries By examining Thomas R Malthus s Essay on the Principle of Population the courtroom address of accused Haymarket bomber August Spies the army textbook Chemical Warfare by Major General Amos A Fries and Clarence J West the life and letters of Manhattan Project physicist Leo Szilard and the writings of Ted Unabomber Kaczynski Hill shows how contemporary societies are equipped with abundant rhetorical means to describe and debate the extreme capacities of weapons to both destroy and protect The book takes a middle way approach between language and materialism that combines traditional rhetorical criticism of texts with analyses of the persuasive force of weapons themselves as objects irrespective of human intervention Advocating Weapons War and Terrorism is the first study of its kind revealing how the combination of weapons and rhetoric facilitated the magnitude of killing in the nineteenth and twentieth centuries and illuminating how humanity understands and acts upon its propensity for violence This book will be invaluable for scholars of rhetoric scholars of science and technology and the study of warfare

Patriotism, Morality, and Peace Stephen Nathanson, 1993 Is patriotism a worthy ideal one that we ought to promote and support Or is it a dangerous and destructive notion that leads to war and hostility Patriotism Morality and Peace provides the first sustained philosophical treatment of these questions distinguishes different forms of patriotism and shows why some forms are indeed dangerous while others can be valuable and constructive

Evolutionary Ethics Neil Levy, 2017-03-02 Might human morality be a product of evolution An increasing number of philosophers and scientists believe that moral judgment and behaviour emerged because it enhanced the fitness of our distant ancestors This volume collects some recent explorations of the evidence for this claim as well as papers examining its implications Is an evolved morality a genuine morality Does an evolutionary origin deflate the

pretensions of morality or strip it of its force in guiding behaviour Is an evolutionary approach compatible with realism about morality All sides of these debates are represented in this volume **How to Think About Catastrophe** Jean-Pierre Dupuy, 2022-11-01 During the last century humanity acquired the ability to destroy itself The direct approach to destruction can be seen in such facts as the ever present threat of nuclear war but we have also developed the capacity to do indirect harm by altering conditions necessary for survival including the looming cloud of climate change How can we look forward and work past the dire position we now find ourselves in to achieve a sustainable future This volume presents a new way of thinking about the future as it examines catastrophe and the human response It examines different kinds of catastrophes that range from natural e g earthquakes to industrial e g Chernobyl and concludes that the traditional distinctions between them are only becoming blurrier by the day This book aims to build a general theory of catastrophes a new form of apocalyptic thinking that is grounded in science and philosophy An ethics for the sake of the future is what is required which in turn necessitates a new metaphysics of temporality If a way out of the imminent danger in which we find ourselves is to be found we must first look to radically alter our ethics **Terrorism and the Ethics of War** Stephen Nathanson, 2010-05-13 Most people strongly condemn terrorism yet they often fail to say how terrorist acts differ from other acts of violence such as the killing of civilians in war Stephen Nathanson argues that we cannot have morally credible views about terrorism if we focus on terrorism alone and neglect broader issues about the ethics of war His book challenges influential views on the ethics of war including the realist view that morality does not apply to war and Michael Walzer's defence of attacks on civilians in supreme emergency circumstances It provides a clear definition of terrorism an analysis of what makes terrorism morally wrong and a rule utilitarian defence of noncombatant immunity as well as discussions of the Allied bombings of cities in World War II collateral damage and the clash between rights theories and utilitarianism It will interest a wide range of readers in philosophy political theory international relations and law **Messy Morality** C. A. J. Coady, 2008-11-06 Tony Coady explores the challenges that morality poses to politics He confronts the complex intellectual tradition known as realism which seems to deny any relevance of morality to politics especially international politics He argues that although realism has many serious faults it has lessons to teach us in particular it cautions us against the dangers of moralism in thinking about politics and particularly foreign affairs Morality must not be confused with moralism Coady characterizes various forms of moralism and sketches their distorting influence on a realistic political morality He seeks to restore the concept of ideals to an important place in philosophical discussion and to give it a particular pertinence in the discussion of politics He deals with the fashionable idea of dirty hands according to which good politics will necessarily involve some degree of moral taint or corruption Finally he examines the controversial issue of the role of lying and deception in politics Along the way Coady offers illuminating discussion of historical and current political controversies This lucid book will provoke and stimulate anyone interested in the interface of morality and politics
