Shaw,2016-04-29 Shaw addresses the ethical turn in contemporary sociological thinking by exploring the contribution of sociology and the social sciences to bioethical debates about morality and tissue exchange practices *Textbook of Palliative Medicine and Supportive Care* Eduardo Bruera,Irene Higginson,Charles F. von Gunten,Tatsuya Morita,2015-01-15 the thoroughness of the text has to be admired It is an excellent starting point for students of palliative care which makes an important contribution to any library British Journal of Hospital Medicine covers a plethora of topics ranging from the development of palliative medicine in different countries to clinical topics and bioethics an *Rediscovering the Law of Negligence* Allan Beever,2007-05-30 Rediscovering the Law of Negligence offers a systematic and theoretical exploration of the law of negligence Its aim is to re establish the notion that thinking about the law ought to and can proceed on the basis of principle As such it is opposed to the prevalent modern view that the various aspects of the law are and must be based on individual policy decisions and that the task of the judge or commentator is to shape the law in terms of the relevant policies as she sees them The book then is an attempt to re establish the law of negligence as a body of law rather than as a branch of politics The book argues that the law of negligence is best understood in terms of a relatively small set of principles enunciated in a small number of leading cases It further argues that these principles are themselves best seen in terms of an aspect of morality called corrective justice which when applied to the most important aspects of the law of negligence reveals that the law even as it now exists possesses a far greater degree of conceptual unity than is commonly thought Using this method the author is able to examine familiar aspects of the law of negligence such as the standard of care the duty of care remoteness misfeasance economic loss negligent misrepresentation the liability of public bodies wrongful conception nervous shock the defences of contributory

negligence voluntary assumption of risk and illegality causation and issues concerning proof to show that when the principles are applied and the idea of corrective justice is properly understood then the law appears both systematic and conceptually satisfactory The upshot is a rediscovery of the law of negligence

Ethics and Technology Assessment: A Participatory Approach Matthew Cotton, 2014-06-11 Whether it is nuclear power geo engineering or genetically modified foods the development of new technologies can be fraught with complex ethical challenges and political controversy which defy simple resolution In the past two decades there has been a shift towards processes of Participatory Technology Assessment designed to build channels of two way communication between technical specialists and non expert citizens and to incorporate multiple stakeholder perspectives in the governance of contentious technology programmes This participatory turn has spurred a need for new tools and techniques to encourage group deliberation and capture public values moral and choices This book specifically examines the ethical dimensions of

controversial technologies and discusses how these can be evaluated in a philosophically robust manner when the ones doing the deliberating are not ethicists legal or technical experts Grounded in philosophical pragmatism and drawing upon empirical work in partnership with citizen stakeholders this book presents a model called Reflective Ethical Mapping a new meta ethical framework and toolbox of techniques to facilitate citizen engagement with technology ethics

The Quest for Human Dignity in the Ethics of Pregnancy Termination Tom Joel Obengo, 2016-06-22 The Quest for Human Dignity in the Ethics of Pregnancy Termination describes and analyzes the problem of termination of pregnancy with special attention to its prevalence in Kenya where more than seven hundred abortions are performed daily on girls between fifteen and seventeen years of age Although pregnancy termination is illegal in Kenya its practice goes on in the rural villages in homes in urban streets and in private clinics The book focuses on the ethical quest for human dignity in the context of the church s response to the challenge of termination of pregnancy It examines the perceptions and attitudes of various cadres of Christians such as church ministers doctors and lawyers towards the problem The book proposes ways and means by which the church in Kenya can approach the challenge of termination of pregnancy including those pregnancies arising out of rape and incest Findings support the current legal framework that prohibits pregnancy termination but reveal a desire for change in the way the church deals with members who get unplanned pregnancies and those who terminate the same The book suggests in addition that the church s role should emphasize counseling teaching and pastoral care rather than ex communication and public rebuke

Military Ethics N. Fotion, Gerard Elfstrom, 2020-12-22 Many people believe that the violent and disruptive nature of war makes a military ethic impossible The authors of this book originally published in 1986 however develop an ethical system that aims to control the military monster at least to some degree rather than one that preaches to it idealistically with little or no effect Military ethics they believe must be an ethics for peacetime as well as an ethics for war an ethics for soldiers in the field as well as an ethics for political leaders and their book is designed to meet these needs It presents a practical utilitarian approach an ethics of what is possible rather than what is ideal drawing on real military experience and different from any other work previously published The authors argue that both the pacifists who claim that the horrible and ungovernable nature of war makes it morally wrong and the realists who believe that wars must be fought but fought without moral scruple are mistaken They show that careful attention to the actual circumstances in which individual combatants function and the social institutions shaping their action allows genuine moral constraint With its emphasis on real problems Military Ethics will be of practical help to policy makers and military personnel at all levels as

well as being of great interest to students of applied philosophy and ethics *The Code for Global Ethics* Rodrigue Tremblay, 2010-12 Humanists have long contended that morality is a strictly human concern and should be independent of religious creeds and dogma This principle was clearly articulated in the two Humanist Manifestos issued in the mid twentieth century and in Humanist Manifesto 2000 which appeared at the beginning of the twenty first century Now this code for global ethics further elaborates ten humanist principles designed for a world community that is growing ever closer together In the face of the obvious challenges to international stability from nuclear proliferation environmental degradation economic turmoil and reactionary and sometimes violent religious movements a code based on the natural dignity and inherent worth of all human beings is needed more than ever In separate chapters the author delves into the issues surrounding these ten humanist principles preserving individual dignity and equality respecting life and property tolerance sharing preventing domination of others eliminating superstition conserving the natural environment resolving differences cooperatively without resort to violence or war political and economic democracy and providing for universal education This forward looking optimistic and eminently reasonable discussion of humanist ideals makes an important contribution to laying the foundations for a just and peaceable global community **Everyday Ethics** Jean P. Kirnan, 2018-06-04 This book expands the current discussion on ethics addressing the gap between headline ethics cases which are often extreme and taken from a business context and the everyday ethical challenges that we all face in school work relationships and communities Case studies throughout demonstrate concepts and provide opportunities for readers to apply theory as they consider everyday issues such as the temptation to lie about an arrest on a job application peer pressure to steal or drink and the implications of ratting out a classmate who is cheating or a co worker who is stealing By including a broad array of ethical challenges this book makes ethics more accessible to the reader Drawing from several academic disciplines including social psychology and organizational behavior this book explores the personal and environmental factors that influence our ethical decision making The book is appropriate for ethics courses in an array of disciplines as well as anyone interested in ethical challenges *The Nigerian Health System's Debacle and Failure!* Daniel M. N. Mcdikkoh, 2010 **Cambodia and the Politics of Aesthetics** Alvin Cheng-Hin Lim, 2013 Illuminating developments in contemporary Cambodia with political and aesthetic theory this book analyses the country's violent transition from socialism to capitalism through an innovative method that combines the aesthetic approach and critical theory To understand the particularities of the country's transition and Cambodia's unfolding encounter with neoliberal capitalism the book pursues the circuits of desire connecting the constellation of objects and relations which is identified as Cambodia Chapters focus on the pre colonial empire of Angkor the invasions of Siam and Vietnam in the nineteenth century the devastation of the Khmer Rouge genocide and the subsequent Vietnamese occupation and the present rapacity of Hun Sen's neoliberal government A creative combination of auto ethnography critical theory and area studies and the analysis of a historical moment the book is of interest to academics working on comparative politics

Forrester, 2015-04-29 This work represents an attempt to show that standard systems of deontic logic taken as attempts to codify normal deontic reasoning run into a number of difficulties It also presents a new system of deontic logic and argues that it is free from the shortcomings of standard systems **Moral Reasoning** Victor Grassian, 1992 道德的推理, 2013-04-30 2012 7 6 2012 10 Director of MA in Ethics and Public Affairs HKBU Director of Centre for Sino Christian Studies HKBU The Rainbow of Experiences Critical Trust and God A Defense of Holistic Empiricism New York Continuum 2011 Aesthetics and Business Ethics Daryl Koehn, Dawn Elm, 2013-09-03 Ludwig Wittgenstein famously said Ethics is aesthetics It is unclear what such a claim might mean and whether it is true This book explores contentious issues arising at the interface of ethics and aesthetics The contributions reflect on the status of aesthetic and ethical judgments the relation of aesthetic beauty and ethical goodness and art and character development The book further considers the potential role art could play in ethical analysis and in the classroom and explores in what respects aesthetics and ethics might be intertwined and even mutually supportive
