valuable historical investigation but a useful resource for the review and consideration of our present day dilemma France is the only country which has attempted to teach an official secular morality and Stock Morton s is the first study to describe and trace the development of that effort During the nineteenth century the impetus for a practical secular moral teaching arose primarily through the concern of those who sought the liberalization of French society and politics The educational dilemma faced at that time arose from the opposition of the Catholic Church to liberal government Gradually liberals and radical reached a consensus on the necessity of teaching ethics in the schools while eliminating the presence of the clergy Their solution and its philosophical basis were anchored in the Enlightenment and the Revolution but developed in the context of nineteenth century political and philosophical change In the 1880s when the republicans were able to inaugurate universal free and secular education secular ethics became a required course for all The history of morale laique is significant at a time when our own country is rife with controversy over the role of religion and the teaching of values in the schools Stock Morton s thoughtful study represents an important contribution to the literature for those concerned with these significant issues

**Moral Education** William Kay,2025-08-05 In the early 1970s few subjects in schools had grown faster than moral education and more and more teachers were seeking guidance in a changing and developing field where a training in the traditional subjects could not always provide sufficient help Originally published in 1975 Dr Kay maintained that a study of the sociological factors involved could give considerable insight into the meaning and purpose of moral education and in this book he examines the effect on the individual pupil of the home the school and differing socio economic class structures and ideologies Using standard sociological analyses Dr Kay discloses some of the determinants of individual morality as they affect children in their homes and schools He concludes that the alleged moral superiority of the middle classes merely stresses the fact that the benefits which are currently enjoyed by this minority should become the privilege of all The analysis of home and school leads him to the view that a democratic milieu is the environment most likely to promote moral growth And his study of school systems concludes with the view that privileged elitism should be replaced by an aristocracy of service with full pupil participation in every aspect of school life Today it can be read in its historical context

conducted during 2008 in three schools in Shenzhen City and based on four major data collection instruments observation interview questionnaire and document review Wangbei Ye analyzes how power relationships have evolved in school moral education and how and why school power affects school moral education Contrary to the common belief that Chinese schools are passively impacted by external forces in moral education curriculum development this book suggests that school power is a semi emancipatory relationship that acts as a major force shaping moral education This means that although both the Chinese Communist Party and the state are positioned to control schools and moral education schools nonetheless have the power to either negotiate for more influence or partly emancipate themselves by collaborating with other external forces responding to grass root needs empowering school teachers and adjusting internal school management style This helps to explain the influence of Chinese schools in moral education and suggests a broader theory of power relationships in curriculum
