Morality Mortality Death And Whom To Save From It:

Morality, mortality Frances Myrna Kamm,1993 Why is death bad for us even on the assumption that it involves the absence of experience Is it worse for us than prenatal nonexistence Kamm begins by considering these questions critically examining some answers other philosophers have given She explores in detail suggestions based on our greater concern over the loss of future versus past goods and those based on the insult to persons which death involves In the second part Kamm deals with the question Whom should we save from death if we cannot save everyone She considers whether and when the numbers of lives we can save matter in our choice and whether the extra good we achieve if we save some lives rather than others should play a role in deciding whom to save Issues such as fairness solidarity the role of random decision procedures and the relation between subjective and objective points of view are discussed with an eye to properly incorporating these into a nonconsequentialist ethical theory In conclusion the book examines specifically what differences between persons are relevant to the distribution of any scarce resource discussing for example the distribution and acquisition of bodily organs for transplantation Kamm provides criticism of some current procedures for distribution and acquisition of a scarce resource and makes suggestions for alternatives

Cost-Effectiveness in Health and Medicine Peter J. Neumann,Gillian D. Sanders,Louise B. Russell,Joanna E. Siegel,Theodore G. Ganiats,2016-10-03 A COMPLETE UPDATE AND REVISION OF THE CLASSIC TEXT Bat last a manual of operations for comparing the cost effectiveness of a preventive service with a treatment intervention American Journal of Preventive Medicine Twenty years after the first edition of COST EFFECTIVENESS IN HEALTH AND MEDICINE established

the practical benchmark for cost effectiveness analysis this completely revised edition of the classic text provides an essential resource to a new generation of practitioners students researchers and policymakers *Medical Benefit and the Human Lottery* Duff R. Waring, 2008-01-18 Bioethicists moral philosophers and social policy analysts have long debated about how we should decide who shall be saved with scarce lifesaving resources when not all can be saved It is often claimed that it is fairer to save younger persons and that age is an ethically relevant consideration in such tragic decisions Medical benefit should be maximized and final selection should aim to minimize the contaminating influence of chance These claims are challenged by Duff R Waring in *Medical Benefit and the Human Lottery* one of the few books that attempts a sustained defence of random patient selection This book combines ethics and political philosophy in its novel and strict egalitarian approach to patient selection for transplantable organs Waring addresses the question of whether we should choose between lives on the basis of fair chances or best outcomes He argues that final selection criteria should be based on fair chances that equalize opportunity as opposed to best outcomes His defence of hardy egalitarianism aims to show that random selection by lottery can affirm both a common humanity and the equal value of lives The notion of patient selection by lottery has not fared well in bioethics and has been regarded by some as a moral affront Waring argues that a human selection lottery may be neither as crude nor as ethically anomalous as some have supposed Indeed it can reflect a familiar conception of equality as a political and moral ideal This conception abstracts from many undeniable differences between patients and claims that scarce resources should be allocated on the principled assumption that each of their lives is equally worth saving The book is also notable for its critiques of some recent utilitarian notions of medical benefit which can have an age biased impact on elderly patients Waring then argues against the leading contemporary age based approaches to patient selection He explores the way random selection by lottery can affirm his egalitarian ethos in cases where eligible transplant candidates have each passed a threshold level of prospective medical benefit that has been set by democratic deliberation Taming chance with a human lottery is defended as the most lucid means of ensuring equal opportunity In so doing Waring argues that we give the principle of equal concern and respect a radical expression above a noncomparative threshold of medical benefit each candidate can have an equal claim to life

Transplantation Ethics Robert M. Veatch, 2000 Three decades after the first heart transplant surgery stunned the world organs including eyes lungs livers kidneys and hearts are transplanted every day But despite its increasingly routine nature or perhaps because of it transplantation offers enormous ethical challenges A medical ethicist who has been involved in the organ transplant debate for many years Robert M Veatch explores a variety of questions that continue to vex the transplantation community offering his own solutions in many cases Ranging from the most fundamental questions to recently emerging issues *Transplantation Ethics* is the first complete and systematic account of the ethical and policy controversies surrounding organ transplants Veatch structures his discussion around three major topics the definition of death the procurement of organs and the allocation of organs He lobbies for an allocation system

administered by nonphysicians that considers both efficiency and equity that takes into consideration the patient's age and previous transplant history and that operates on a national rather than a regional level Rich with case studies and written in an accessible style this comprehensive reference is intended for a broad cross section of people interested in the ethics of transplantation from either the medical or public policy perspective patients and their relatives transplantation professionals other health care professionals and administrators social workers members of organ procurement organizations and government officials involved in the regulation of transplants

The Contribution of Natural Law Theory to Moral and Legal Debate Concerning Suicide, Assisted Suicide, and Euthanasia Craig Paterson, 2010-05-13 *Bioethics* Udo Schüklenk, Peter Singer, 2021-09-08 The new edition of the classic collection of key readings in bioethics fully updated to reflect the latest developments and main issues in the field For more than two decades *Bioethics An Anthology* has been widely regarded as the definitive single volume compendium of seminal readings on both traditional and cutting edge ethical issues in biology and medicine Acclaimed for its scope and depth of coverage this landmark work brings together compelling writings by internationally renowned bioethicists to help readers develop a thorough understanding of the central ideas critical issues and current debate in the field Now fully revised and updated the fourth edition contains a wealth of new content on ethical questions and controversies related to the COVID 19 pandemic advances in CRISPR gene editing technology physician assisted death public health and vaccinations transgender children medical aid in dying the morality of ending the lives of newborns and much more Throughout the new edition carefully selected essays explore a wide range of topics and offer diverse perspectives that underscore the interdisciplinary nature of bioethical study Edited by two of the field's most respected scholars *Bioethics An Anthology* Covers an unparalleled range of thematically organized topics in a single volume Discusses recent high profile cases debates and ethical issues Features three brand new sections Conscientious Objection Academic Freedom and Research and Disability Contains new essays on topics such as brain death life and death decisions for the critically ill experiments on humans and animals neuroethics and the use of drugs to ease the pain of unrequited love Includes a detailed index that allows the reader to easily find terms and topics of interest *Bioethics An Anthology Fourth Edition* remains a must have resource for all students lecturers and researchers studying the ethical implications of the health related life sciences and an invaluable reference for doctors nurses and other professionals working in health care and the biomedical sciences

Principles of Biomedical Ethics Tom L. Beauchamp, James F. Childress, 2001 For many years this has been a leading textbook of bioethics It established the framework of principles within the field This is a very thorough revision with a new chapter on methods and moral justification

Health, Luck, and Justice Shlomi Segall, 2010 Luck egalitarianism the idea that justice requires correcting disadvantages resulting from brute luck has gained ground in recent years and is now the main rival to John Rawls's theory of distributive justice *Health Luck and Justice* is the first attempt to systematically apply luck egalitarianism to the just distribution of health and health care Challenging

Rawlsian approaches to health policy Shlomi Segall develops an account of just health that is sensitive to considerations of luck and personal responsibility arguing that people's health and the health care they receive are just only when society works to neutralize the effects of bad luck Combining philosophical analysis with a discussion of real life public health issues Health Luck and Justice addresses key questions What is owed to patients who are in some way responsible for their own medical conditions Could inequalities in health and life expectancy be just even when they are solely determined by the natural lottery of genes and other such factors And is it just to allow political borders to affect the quality of health care and the distribution of health Is it right on the one hand to break up national health care systems in multicultural societies And on the other hand should our obligation to curb disparities in health extend beyond the nation state By focusing on the ways health is affected by the moral arbitrariness of luck Health Luck and Justice provides an important new perspective on the ethics of national and international health policy

Doing Good Better William MacAskill, 2015 MacAskill and his colleagues developed effective altruism a practical data driven approach to doing good that allows us to make a tremendous difference regardless of our resources Effective altruists operate by asking certain key questions which force them to think differently overcome biases and use evidence and careful reasoning rather than act on impulse Page 4 of cover

Bioethics Helga Kuhse, Udo Schüklenk, Peter Singer, 2015-10-19 Now fully revised and updated Bioethics An Anthology 3rd edition contains a wealth of new material reflecting the latest developments This definitive text brings together writings on an unparalleled range of key ethical issues compellingly presented by internationally renowned scholars The latest edition of this definitive one volume collection now updated to reflect the latest developments in the field Includes several new additions including important historical readings and new contemporary material published since the release of the last edition in 2006 Thematically organized around an unparalleled range of issues including discussion of the moral status of embryos and fetuses new genetics neuroethics life and death resource allocation organ donations public health AIDS human and animal experimentation genetic screening and issues facing nurses Subjects are clearly and captivantly discussed by globally distinguished bioethicists A detailed index allows the reader to find terms and topics not listed in the titles of the essays themselves

Rationing and Resource Allocation in Healthcare Ezekiel Emanuel, Harald Schmidt, Andrew Steinmetz, 2018-05-10 Budgets of governments and private insurances are limited Not all drugs and services that appear beneficial to patients or physicians can be covered Is there a core set of benefits that everyone should be entitled to If so how should this set be determined Are fair decisions just impossible if we know from the outset that not all needs can be met While early work in bioethics has focused on clinical issues and a narrow set of principles in recent years there has been a marked shift towards addressing broader population level issues requiring consideration of more demanding theories in philosophy political science and economics At the heart of bioethics new orientation is the goal of clarity on a complex set of questions in rationing and resource allocation Rationing and Resource Allocation in Healthcare Essential Readings provides

key excerpts from seminal and pertinent texts and case studies about these topics contextualized by original introductions

The volume is divided into three broad sections

Conceptual Distinctions and Ethical Theory Rationing and Resource Allocation Containing the most important and classic articles surrounding the theoretical and practical issues related to rationing and how to allocate scarce medical resources this collection aims to assist and inform those who wish to be a part of bioethics 21st century shift including practitioners and policy makers and students and scholars in the health sciences philosophy law and medical ethics

The Ends of Harm Victor Tadros, 2011-09-15 How can the brutal and costly enterprise of criminal punishment be justified This book makes a provocative original contribution to the philosophical literature and debate on the morality of punishing arguing that punishment is justified in the duties that offenders incur as a result of their wrongdoing

Prevention and the Limits of the Criminal Law Andrew Ashworth, Lucia Zedner, Patrick Tomlin, 2013-01-31 Exploring the principles and values that should guide and limit the state's use of preventive techniques that involve coercion against the individual this volume arises from a three year study of Preventive Justice The contributions examine whether and when preventive measures are justified whether within or without the criminal law and whether they signal a larger change in the architecture of security Preventive measures include controversial crime control approaches such as pre-arrest offences pre-trial detention restraining orders and prevention detention of the dangerous There are good reasons to justify state use of coercion to protect the public from harm but while the rationales and justifications for state punishment have been extensively explored the scope limits and principles of preventive justice have not received the same attention This volume written by world renowned scholars from different disciplinary backgrounds and jurisdictions redresses the balance assessing the foundations for the range of coercive measures that states now take in the name of prevention and public protection

The Human Predicament David Benatar, 2017-05-05 Are our lives meaningful or meaningless Is our inevitable death a bad thing Would immortality be an improvement Would it be better all things considered to hasten our deaths by suicide Many people ask these big questions and some people are plagued by them Surprisingly analytic philosophers have said relatively little about these important questions about the meaning of life When they have tackled the big questions they have tended like popular writers to offer comforting optimistic answers The Human Predicament invites readers to take a clear-eyed and unfettered view of the human condition David Benatar here offers a substantial but not unmitigated pessimism about the central questions of human existence He argues that while our lives can have some meaning we are ultimately the insignificant beings that we fear we might be He maintains that the quality of life although less bad for some than for others leaves much to be desired in even the best cases Worse death is generally not a solution in fact it exacerbates rather than mitigates our cosmic meaninglessness While it can release us from suffering it imposes another cost annihilation This state of affairs has nuanced implications for how we should think about many things including immortality and suicide and how we should think about the possibility of deeper meaning in our lives Ultimately

this thoughtful provocative and deeply candid treatment of life's big questions will interest anyone who has contemplated why we are here and what the answer means for how we should live

Inherent and Instrumental Values G. John M. Abbarno, 2014-12-10 The essays in this book range broadly over different aspects of value theory and include contributions by Nicholas Rescher Frances Kamm Barry Smith and Jan Narveson Portions examine the theoretical foundations of values and valuation exploring the rational groundwork for judgments Other aspects appealing to value distinctions of inherent intrinsic and instrumental drawn most notably by C I Lewis bring to light matters of aesthetic social political ethical and ontological issues Throughout **Inherent and Instrumental Values** the authors address questions assessing the intrinsic worth of utility of actions and whether manual or professional labor can hold an equal value rating and the implications of this assessment In other portions of the anthology authors explore the extent to which such value categories above help clarify and assess moral issues we encounter in everyday life Among some analyzed in this book are racism and affirmative action abortion euthanasia homelessness care and friendship The theme of the nature of value and the role of valuation we encounter in the days of our life provide a basis for examining other aspects of axiology that lie beyond the scope of this work

The Contribution of Natural Law Theory to Moral and Legal Debate Concerning Suicide, Assisted Suicide, and Voluntary Euthanasia Craig Paterson, 2001

Private Law and the State Andrew Robertson, Jason W Neyers, 2024-10-31 This collection explores the relationship between the state and private law It does this by addressing four overlapping questions beginning by asking why states recognise and enforce private law obligations and liabilities It goes on to ask how the state as a legal actor is subject to private law The third question explored relates to the relationship between private law and public law Finally it examines the role of the public interest in private law With the perspectives of world leading commentators from both academia and the judiciary this book provides a fascinating assessment of a crucial but complex relationship
