*Western Theological Imagination* Miles Leeson,Frances White,2025-07-26 Scholarly interest in theological aspects of Murdoch s fiction and philosophy took off slowly It was thirty years after her writing debut that the first work taking detailed notice of the theological language deployed by this overtly atheist author appeared and it was a further decade before theologians began to engage with Murdoch s work together But it was not until the twenty first century that this aspect of Murdoch s thought and imagination began to receive sustained attention This collection seeks to build on this foundation begun forty years ago and to expand the work in this area of Murdoch studies which has lately been gathering momentum This project consolidates earlier discussion of the vital part theology plays in Murdoch s thought and then takes the debate in new directions Contributors include a wide range of current Murdoch scholars from diverse disciplines who develop debate about this subject in a variety of innovative and fruitful ways to inspire future works in this area of Murdoch studies Kant, Schopenhauer and Morality: Recovering the Categorical Imperative M. Walker,2011-12-01 Addressing the perennial question why should we be moral this book argues that we can only give a truly and morally satisfying answer to that question by radically reconfiguring our conception of the self and the way it relates to others **God and Humanity in Auschwitz**

Donald Dietrich, 2017-07-12 *God and Humanity in Auschwitz* synthesizes the findings of research developed over the last thirty years on the rise of anti-Semitism in our civilization. Donald J. Dietrich sees the Holocaust as a case study of how prejudice has been theologically enculturated. He suggests how it may be controlled by reducing aggressive energy before it becomes overwhelming. Dietrich studies the recent responses of Christian theologians to the Holocaust and the Jewish theological response to questions concerning God's covenant with Israel which were provoked by Auschwitz. Social science has dealt with the psychosocial dynamics that have supported genocide and helps explain how ordinary persons can produce extraordinary evil. Dietrich shows how this research combined with theological analyses can help reconfigure theology itself. Such an approach may serve to help dissolve anti-Semitism to aid in constructing such positive values as respect for human dignity and to point the way to restricting future outbreaks of genocide. *God and Humanity in Auschwitz* surveys which religious factors created a climate that permitted the Holocaust. It also illuminates what social science has to tell us about developing a strategy that when institutionally implemented can channel our energies away from sanctioned murder toward a more compassionate society. The book has proven to be an essential resource for theologians, sociologists, historians, and political theorists.

Nature, Truth, and Value George Allan, Merle Frederick Allshouse, 2005-01-01. In this thorough compendium, nineteen accomplished scholars explore in some manner the values they find inherent in the world, their nature, and relevance through the thought of Frederick Ferré. These essays, informed by the insights of Ferré and coming from manifold perspectives—ethics, philosophy, theology, and environmental studies—advance an ambitious challenge to current intellectual and scholarly fashions.

**Feminist Ethics and Natural Law** Cristina L. H. Traina, 1999-04-28. Heated debates over such issues as abortion, contraception, ordination, and Church hierarchy suggest that feminist and natural law ethics are diametrically opposed. Cristina L. H. Traina now reexamines both Roman Catholic natural law tradition and Anglo-American feminist ethics and reconciles the two positions by showing how some of their aims and assumptions complement one another. After carefully scrutinizing Aquinas's moral theology, she analyzes trends in both contemporary feminist ethics, theological as well as secular, and twentieth-century Roman Catholic moral theology. Although feminist ethics reject many of the methods and conclusions of the scholastic and revisionist natural law schools, Traina shows that a truly Thomistic natural law ethic nonetheless provides a much needed holistic foundation for contemporary feminist ethics. On the other hand, she offers new perspectives on the writings of Josef Fuchs, Richard McCormick, and Gustavo Gutierrez, arguing that their failure to catch the full spirit of Thomas's moral vision is due to inadequate attention to feminist critical methods. This highly original book proposes an innovative union of two supposedly antagonistic schools of thought: a new feminist natural law that would yield more comprehensive moral analysis than either existing tradition alone. This is a provocative book not only for students of moral theology but also for feminists who may object to the very notion of natural law ethics, suggesting how each might find insight in an unlikely place.
