and Collective Knowledge in 18th Century Britain John Regan, 2023-07-27 An in depth digital investigation of several 18th century British corpora this book identifies shared communities of meaning in the printed British 18th century by highlighting and analysing patterns in the distribution of lexis There are forces of attraction between words some are more likely to keep company than others and how words attract and repel one another is worthy of note Charting these forces this book demonstrates how distant reading 18th century corpora can tell us something new methodologically defensible and crucially interesting about the most common constructions of word meanings and epistemes in the printed British 18th century In the case studies in this book computation brings to light some remarkable facts about collectively produced forms

of meaning without which the most common meanings of words and the ways of knowing that they constituted would remain matters of conjecture rather than evidence Providing the first investigation of collective meaning and knowledge in the British 18th century this interdisciplinary study builds on the existing stores of close reading praxis and history of ideas presenting a view constructed at scale rather than at the level of individual texts

Presupposition and the Delimitation of Semantics Ruth M. Kempson, 1975-07-17 In this book first published in 1975 Dr Kempson argues that previous work on presupposition whether in philosophy or linguistics has been mistakenly based on a conflation of two different disciplines semantics the study of the meanings assigned to the formal system which constitutes a language and pragmatics the study of the use of that system in communication The first part of the book deals generally with the nature of semantics in linguistic theory and its formal representation within a transformational grammar Dr Kempson argues against incorporating the relation of presupposition within such a grammar The second part provides a pragmatic account of the foundations of a theory of communication and its detailed application to the problems raised by presupposition The book is intended for those studying both philosophy and linguistics and also for those sociolinguists and psychologists with a more general interest in the theory of communication

Deeply Broken A. R. Wile, 2022-06-26 Reimagined and Expanded with 10 000 more words than the original The torture was meant to break her but it was the truth that made her heart bleed She left this world believing she wasn't my everything It's the thought that replays in my head as I stare at the image of the life gone from her body her tangled brown hair fanning around her face as it hangs listless I didn't get to tell her that I didn't knowingly betray her before she was killed That I still loved her Now she'll never know and the whispered words on her last breath will never belong to me but the man she grew to love in my place He teeters on his knees next to me Inconsolable Both of us are in pieces on the floor And the only thing that keeps us from completely crumbling is the promise of finding her killer and making him pay _____ PLEASE NOTE This book contains sensitive subject matter If you are affected by triggers or have experienced serious trauma it may not be for you Not recommended for persons under 18 years of age _____

The Choreographic Jenn Joy,2014-10-17 An investigation of dance and choreography that views them not only as artistic strategies but also as intrinsically theoretical and critical practices The choreographic stages a conversation in which artwork is not only looked at but looks back it is about contact that touches even across distance The choreographic moves between the corporeal and cerebral to tell the stories of these encounters as dance trespasses into the discourse and disciplines of visual art and philosophy through a series of stutters steps trembles and spasms In *The Choreographic* Jenn Joy examines dance and choreography not only as artistic strategies and disciplines but also as intrinsically theoretical and critical practices She investigates artists in dialogue with philosophy describing a movement of conceptual choreography that flourishes in New York and on the festival circuit Joy offers close readings of a series of experimental works arguing for the choreographic as an alternative model of aesthetics She explores constellations of works artists writers philosophers and dancers in conversation with theories of gesture language desire and history She choreographs a revelatory narrative in which Walter Benjamin Pina Bausch Francis Al s and Cormac McCarthy dance together she traces the feminist and queer force toward desire through the choreography of DD Dorvillier Heather Kravas Meg Stuart La Ribot Miguel Gutierrez luciana achugar and others she maps new forms of communicability and pedagogy and she casts science fiction writers Samuel R Delany and Kim Stanley Robinson as perceptual avatars and dance partners for Ralph Lemon Marianne Vitali James Foster and Janet Cardiff and George Bures Miller Constructing an expanded notion of the choreographic Joy explores how choreography as critical concept and practice attunes us to a more productively uncertain precarious and ecstatic understanding of aesthetics and art making
