Bauer,2012-05-11 Like UFO s Big Foot and the Bermuda Triangle the Loch Ness monster continues to fascinate us by the persistence of its mystery While many authors have focused upon the search for Nessie Bauer is the first to present a detailed and balanced look at the history of the controversy surrounding this search Bauer is much more concerned with examining the sociological psychological and philosophical aspects of the Loch Ness controversy than with proving or disproving Nessie s existence He shows that the Nessie phenomenon has much to tell us about how we acquire our beliefs about the nature of the scientific enterprise and about the adversarial relationship between mainstream science and fringe subjects such as Nessie The result of more than a decade of research Bauer s study includes both famous and little known photos and illustrations the most complete bibliography yet compiled on the subject and a list of close to 800 reported sightings Whether you believe in Nessie or laugh at the mere thought of believing you ll find The Enigma of Loch Ness both entertaining and enlightening **Time Restored** Jonathan Betts,2011-05-19 This is the story of Rupert T Gould 1890 1948 the polymath and horologist A remarkable man Lt Cmdr Gould made important contributions in an extraordinary range of subject areas throughout his relatively short and dramatically troubled life From antique clocks to scientific mysteries from typewriters to the first systematic study of the Loch Ness Monster Gould studied and published on them all With the title The Stargazer Gould was an early broadcaster on the BBC s Children s Hour when with his encyclopaedic knowledge he became known as The Man Who Knew Everything Not surprisingly he was also part of that elite group on BBC radio who formed The Brains Trust giving on the spot answers to all manner of wide ranging and difficult questions With his wide learning and photographic memory Gould awed a national audience becoming one of the era s radio celebrities During the 1920s Gould restored the complex and highly significant marine timekeepers constructed by John Harrison 1693 1776 and wrote the unsurpassed classic The Marine Chronometer its History and Development Today he is virtually unknown his horological contributions scarcely mentioned in Dava Sobel s bestseller Longitude The TV version of Longitude in which Jeremy Irons played Rupert Gould did at least introduce Gould s name to a wider public Gould suffered terrible bouts of depression resulting in a number of nervous breakdowns These coupled with his obsessive and pedantic nature led to a scandalously reported separation from his wife and cost him his family his home his job and his closest friends In this first ever biography of Rupert Gould Jonathan Betts the Royal Observatory Greenwich s Senior Horologist has given us a compelling account of a talented but flawed individual Using hitherto unknown personal journals the family s extensive collection of photographs and the polymath s surviving records and notes Betts tells the story of how Gould s early life his naval career and his celebrity

status came together as this talented Englishman restored part of Britain's and the world's most important technical heritage John Harrison's marine timekeepers **The Info Journal**, 1987 **Puzzles, Problems, and Enigmas** John M. The Great Fossil Enigma Simon J. Knell, 2012-11-06 Stephen Jay Gould borrowed from Winston Churchill when he described the conodont animal as a riddle wrapped in a mystery inside an enigma This animal confounded science for more than a century Some thought it a slug others a fish a worm a plant even a primitive ancestor of ourselves The list of possibilities grew and yet an answer to the riddle never seemed any nearer Would the animal that left behind these miniscule fossils known as conodonts ever be identified Three times the animal was found but each was quite a different animal Were any of them really the one Simon J Knell takes the reader on a journey through 150 years of scientific thinking imagining and arguing Slowly the animal begins to reveal traces of itself its lifestyle its remarkable evolution its witnessing of great catastrophes its movements over the surface of the planet and finally its anatomy Today the conodont animal remains perhaps the most disputed creature in the zoological world

Invisible Residents Ivan T. Sanderson, 2005 This book is a groundbreaking contribution to the study of the UFO enigma originally published over 30 years ago In this book Sanderson a renowned zoologist with a keen interest in the paranormal puts forward the curious theory that a oeOINTS Other Intelligences live under the Earth's oceans This underwater parallel civilization may be twice as old as Homo sapiens he proposes and may have a oedeveloped what we call space flight Sanderson postulates that the OINTS are behind many UFO sightings as well as the mysterious disappearances of aircraft and ships in the Bermuda Triangle What better place to have an impenetrable base than deep within the oceans of the planet Yet if UFOs or at least some of them are coming from beneath our oceans or lakes does it necessarily mean that there is another civilization besides our own that is responsible In fact could it be that since WWII a number of underwater UFO bases have been constructed by the very human governments of our planet Whatever their source Sanderson offers here an exhaustive study of USOs Unidentified Submarine Objects observed in nearly every part of the world He presents many well documented and exciting case studies of these unusual sightings more
