Evans Ph.D.,2010-06-01 Where were Venetian blinds invented What color is the black box on a commercial airplane Where did India ink originate Most of us know more than we think we know We also think we know more than we actually do because some of what we think we know simply ain't so We all harbor misconceptions that are accepted not only because they are popular but also because they make sense It makes sense to believe for example that German chocolate originated in Germany rather than the truth that German chocolate is so named because it was created by Sam German It seems logical to believe that Mercury is the hottest planet because of its proximity to the sun or that buttermilk contains butter that Danish pastry is from Denmark and that the boat race America's Cup was named after the United States of America In *Sorry Wrong Answer* Rod Evans takes readers on a tour of misleading trivia debunking commonly held assumptions and sharing surprising right answers

**The Rhetoric of the Right** David L. George, 2013 This study seeks to demonstrate the subtle ways in which changes in the language associated with economic issues are reflective of a gradual but quantifiable conservative ideological shift In this rigorous analysis David George uses as his data a century of word usage within *The New York Times* starting in 1900 It is not always obvious how the changes

identified necessarily reflect a stronger prejudice toward laissez faire free market capitalism and so much of the book seeks to demonstrate the subtle ways in which the changing language indeed carries with it a political message This analysis is made through exploration of five major areas of focus economics rhetoric scholarship and the growing behavioral economics school of thought the discourse of government and taxation the changing meaning of competition and competitive changing attitudes toward labor and the celebration of growth relative to the decline in attention to economic justice and social equality

**Needful Things** Stephen King, 2016-01-01 Set in the fictional town of Castle Rock Maine Master storyteller Stephen King presents the classic New York Times bestseller about a mysterious store that can sell you whatever you desire but not without exacting a terrible price in return The town of Castle Rock Maine has seen its fair share of oddities over the years but nothing is as peculiar as the little curio shop that's just opened for business here Its mysterious proprietor Leland Gaunt seems to have something for everyone out on display at Needful Things interesting items that run the gamut from worthless to priceless Nothing has a price tag in this place but everything is certainly for sale The heart's desire for any resident of Castle Rock can easily be found among the curiosities in exchange for a little money and at the specific request of Leland Gaunt a whole lot of menace against their fellow neighbors Everyone in town seems willing to make a deal at Needful Things but the devil is in the details And no one takes heed of the little sign hanging on the wall Caveat emptor In other words let the buyer beware

The Big Smallness Michelle Ann Abate, 2016-02-12 This book is the first full length critical study to explore the rapidly growing cadre of amateur authored independently published and niche market picture books that have been released during the opening decades of the twenty first century Emerging from a powerful combination of the ease and affordability of desktop publishing software the promotional marketing and distribution possibilities allowed by the Internet and the tremendous national divisiveness over contentious socio political issues these texts embody a shift in how narratives for young people are being creatively conceived materially constructed and socially consumed in the United States Abate explores how titles such as *My Parents Open Carry* about gun laws *It's Just a Plant* about marijuana policy and *My Beautiful Mommy* about the plastic surgery industry occupy important battle stations in ongoing partisan conflicts while they are simultaneously changing the landscape of American children's literature The book demonstrates how texts like *Little Zizi* and *Me Tarzan You Jane* mark the advent of not simply a new commercial strategy in texts for young readers they embody a paradigm shift in the way that narratives are being conceived constructed and consumed Niche market picture books can be seen as a telling barometer about public perceptions concerning children and the social construction of childhood as well as the function of narratives for young readers in the twenty first century At the same time these texts reveal compelling new insights about the complex interaction among American print culture

children's reading practices and consumer capitalism Amateur authored self published and specialty subject titles reveal the way in which children childhood and children's literature are both highly political and heavily politicized in the United States The book will be of interest to scholars and students in the fields of American Studies children's literature childhood studies popular culture political science microeconomics psychology advertising book history education and gender studies
