Hardison, 2009 Because of its strong interest in providing airmen with the cross cultural skills that have grown ever more essential to successful mission accomplishment in foreign environments the Air Force asked RAND to provide a foundation for the design of a comprehensive Air Force program of cross cultural training and education RAND researchers responded by first creating a taxonomy covering all behaviors relevant to cross cultural performance after the need for such a taxonomy became evident from a review of the literature on cross cultural performance and discussions with Air Force personnel From this taxonomy the researchers developed a framework of 14 categories of cross cultural behaviors nine categories of enabling behaviors and five of goal oriented behaviors This framework was then used in designing a survey for 21 000 recently deployed airmen that asked them to rate the importance of the behaviors to their deployed performance and the helpfulness of training they had received in the behaviors both over their careers and just prior to deployment Respondents were also asked to indicate how much training they had received Recommendations and suggestions for the design of a comprehensive program of cross cultural training and education and for further research steps were made based on extensive analyses of the results which included determining whether training needs differed by AFSC grade enlisted officer and deployment location Reflections on Persian Grammar Abe

Soheili,2017-08-21 This book is the first authoritative survey of the historical developments of Persian grammar from the first attested work some 200 years ago to the present day It examines the development of Persian linguistic thought in five different periods and analyses the underlying assumptions of the grammars belonging to each period in light of contemporary ideas on the nature of grammar and new frameworks for grammatical analysis This historical survey shows the profound influence of Arabic and Western linguistic thinking on the development of Persian grammar as well as a dramatic shift of perspective from a traditional grammatical analysis to new and divergent procedures adopted by more recent schools of linguistics The end result of this transition has culminated in less reliance on foreign influence and the emergence of more self motivated independent researchers in the uncharted territory of Persian grammar and its sub components The two comprehensive Persian and English glossaries at the end of the book will enable readers to better understand the grammatical concepts covered here
