The changing face of VR: Pushing the boundaries of experience across multiple industries Jordan Frith, Michael Saker, 2022-09-20 VR

occupies an interesting place in the media ecosystem On the one hand it is an emerging cutting edge technology backed by billions of USD by major corporations On the other hand VR is older than the World Wide Web and older than social networking sites After many years of hype and unfulfilled potential VR is now finally on the precipice of widespread adoption and has begun to be used in novel ways throughout various industries This edited collection brings together a diverse group of authors to analyse the current state of VR while recognizing that these many different use cases will likely become even more important with the increased investment in the technology To examine the current state of VR across multiple sites and industries we compiled a group of practitioners and academics to both examine VR practices and theorize new uses of VR The book also focuses on an inclusive analysis and includes authors from South America North America Europe Australia and Asia and the topics range from analyses of VR use in live events to the ethics of nature based VR apps to the social practices involved in using public VR at museum exhibits As we argue in the introduction this book is one of the first to bring together authors from different backgrounds and disciplines to chart just how widely VR has already spread And maybe most importantly the topics covered in this book will only become more relevant as VR continues to grow especially in the wake of the growth of the supposed Metaverse

Canadian point of view The finished work many years in the making and the equivalent of forty average sized books is an extraordinary storehouse of information about our country This book deserves pride of place on the bookshelf in every Canadian Home It is no accident that the cover of this book is based on the Canadian flag For the proud truth is that this volume represents a great national achievement From its formal inception in 1979 this encyclopedia has always represented a vote of faith in Canada in Canada as a separate place whose natural worlds and whose peoples and their achievements deserve to be recorded and celebrated At the start of a new century and a new millennium in an increasingly borderless corporate world that seems ever more hostile to national distinctions and aspirations this Canadian Encyclopedia is offered in a spirit of defiance and of faith in our future The statistics behind this volume are staggering The opening sixty pages list the 250 Consultants the roughly 4 000 Contributors all experts in the field they describe and the scores of researchers editors typesetters proofreaders and others who contributed their skills to this massive project The 2 640 pages incorporate over 10 000 articles and over 4 000 000 words making it the largest some might say the greatest Canadian book ever published There are of course many special features These include a map of Canada a special page comparing the key statistics of the 23 major Canadian cities maps of our cities a variety of tables and photographs and finely detailed illustrations of our wildlife not to mention the colourful informative endpapers But above all the book is encyclopedic which the Canadian Oxford Dictionary describes as embracing all branches of learning This means that with rare exceptions there is satisfaction for the reader who seeks information on any Canadian subject From the first entry A mari usque ad mare from sea to sea which is Canada's motto and a good description of this volume's range to the Zouaves who mustered in Quebec to fight for the beleaguered Papacy there is the required summary of information clearly and accurately presented For the browser the constant variety of entries and the lure of regular cross references will provide hours of fascination The word encyclopedia derives from Greek expressions alluding to a grand circle of knowledge Our knowledge has expanded immeasurably since the time that one mind could encompass all that was known Yet now Canada's finest scientists academics and specialists have distilled their knowledge of our country between the covers of one volume The result is a book for every Canadian who values learning and values Canada
