Journeys West Virginia Kerns,2010-03-01 Journeys West traces journeys made during seven months of fieldwork in 1935 and 1936 by Julian Steward a young anthropologist and his wife Jane Virginia Kerns identifies the scores of Native elders whom they met throughout the Western desert men and women previously known in print only by initials and thus largely invisible as primary sources of Steward s classic ethnography Besides humanizing Steward s cultural informants revealing them as distinct individuals and also as first generation survivors of an ecological crisis caused by American settlement of their lands Kerns shows how the elders worked with Steward Each helped to construct an ethnographic portrait of life in a particular place in the high desert

of the Great Basin The elders memories of how they and their ancestors had lived by hunting and gathering a sustainable way of life that endured for generations richly illustrated what Steward termed cultural adaptation It later became a key concept in anthropology and remains relevant today in an age of global environmental crisis Based on meticulous research this book draws on an impressive array of evidence from interviews and observations to census data correspondence and the field journal of the Stewards Journeys West illuminates not only on the elders who were Steward s guides but also the practice of ethnographic fieldwork a research method that is both a journey and a distinctive way of looking listening and learning

New Boundaries in Political Science Fiction Donald M. Hassler, Clyde Wilcox, 2008. This book offers an interpretation of the evolution of a growing genre in literary, film, and television. As a follow-up to their 1997 collection *Political Science Fiction*, Hassler and Wilcox have assembled twenty-four noted international scholars representing diverse fields of inquiry to assess the influential voices and trends from the past decade in *New Boundaries in Political Science Fiction*. The terrors and technologies that permeate our daily lives have changed radically in the past decade, further highlighting the underlying speculations on our contested future that remain the core of this genre. In surveying the vast expanse of politically charged science fiction of recent years, the editors posit that the defining dilemma for these tales rests in whether identity and meaning germinate from progressive linear changes or progress or from a continuous return to primitive realities of war.
