*More Power to Ya* Bob Hartman, 1997-01-01      **Walking in Freedom** Neil T. Anderson, Rich Miller, 2009-01-02 God wants His children to walk in the freedom purchased for them by Christ at Calvary Every person has been given the responsibility to make right choices in life we must choose truth reject lies and forgive those who hurt us but God has not left us as orphans to fend for ourselves The Holy Spirit gives us the power to walk in the freedom that is already ours in Christ Following these 21 days of select readings will increase the liberating work that God has begun in you through the Steps to Freedom in Christ Each daily devotional provides three truths the truth about God the truth about you and the truth about freedom as well as recommended Scripture readings that affirm each of the three As readers begin to hide these truths in their hearts they will learn how to stand firm in their freedom and build a strong and holy shield against the enemy's attacks

*Resting state brain activity: Implications for systems neuroscience* Vinod Menon, Lucina Q. Uddin, Research on resting state brain activity using fMRI offers a novel approach for understanding brain organization at the systems level Resting state fMRI examines spatial synchronization of intrinsic fluctuations in blood oxygenation level dependent BOLD signals arising from neuronal and synaptic activity that is present in the absence of overt cognitive information processing Since the discovery of coherent spontaneous fluctuations within the somatomotor system Biswal et al 1995 a growing number of studies have shown that many of the brain areas engaged during various cognitive tasks also form coherent large scale brain networks that can be readily identified using resting state fMRI These studies are beginning to provide new insights into the functional architecture of the human brain This Research Topic will synthesize current knowledge about resting state brain activity and discuss their implications for understanding brain function and dysfunction from a systems neuroscience perspective This topic will also provide perspectives on important conceptual and methodological questions that the field needs to address in the next years In addition to invited reviews and perspectives we solicit research articles on theoretical experimental and clinical questions related to the nature origins and functions of resting state brain activity [Aikido](#)
