Practitioners Lydia Burke, 2008 Practice nurses and nurse practitioners working alongside general practitioners are required to see and treat patients with a variety of minor and complex conditions. They therefore need skills in history taking, physical assessment, diagnosing, prescribing and managing long-term conditions. It is assumed that nurses who read this book will have experience in managing the care of babies, children, well young people, people for whom English is not their first language, people with mental health problems and older people with multiple health problems. These case studies are loosely based on interactions that the author has had with patients in Primary Care.

**Clinical Diagnosis** Philip Jevon, 2011-02-16 The role and function of the nurse is rapidly changing. Some nurses are now required to undertake clinical diagnosis of the patient, a responsibility traditionally undertaken by a doctor. Clinical Diagnosis helps prepare nurses to fulfill this role, providing them with the skills and underpinning knowledge to make clinical diagnoses of patients effectively. Each chapter follows the same layout for each symptom or sign, exploring the definition, causes, history, precipitating factors, associated signs and symptoms, important considerations, relevant clinical examination and investigations, and tests. The first UK text to explore clinical diagnosis from a nursing perspective. In the Essential Clinical Skills for Nurses series. Written by an authority in the field. Concise, accessible and evidence-based.
