Nurses Work The Sacred And The Profane:

Nurses' Work Zane Robinson Wolf, 1988 Based on a doctoral dissertation Nursing rituals in an adult acute care hospital and ethnography Preface **Devices & Desires** Margarete Sandelowski, 2000 The author traces the relationship between nursing and technology from the 1870s to the present She argues that while technology has helped shape and intensify persistent dilemmas in nursing it has also both advanced and impeded the development of the nursing profession

Anthropology of Nursing Karen Holland, 2019-09-09 This book aims to introduce nurses and other healthcare professionals to how anthropology can help them understand nursing as a profession and as a culture Drawing on key anthropological concepts the book facilitates the understanding and critical consideration of nursing practice as seen across a wide range of health care contexts and which impacts the delivery of appropriate care for service users Considering the fields in which nurses work the book argues that in order for nurses to optimize their roles as deliverers of patient care they must not only engage with the realities of the cultural world of the patient but also that of their own multi professional cultural environment The only book currently in the field on anthropology of nursing this book will be a valuable resource for nursing students at all academic levels especially where they can pursue specific modules in the subject as well as those other students pursuing medical anthropology courses As well as this it will be an essential text for those post graduate students who wish to consider alternative world views from anthropology and their application in nursing and healthcare in addition to their undertaking ethnographic research to explore nursing in all its fields of practice *Nursing Power and Social Judgement* Martin Johnson, 2018-08-20 First published in 1997 this work makes a substantial reexamination of the social processes behind the labelling of patients in hospital care Taking an interpretive perspective the author analyzes the social construction of patient labels identifying strategies for and the consequences of giving and receipt of good and bad labels He shows how the rich data of truly participant observation in the tradition of reflexive ethnography can powerfully illuminate the experiences and actions of both patients and their nurses It is a critical analysis of key work in this field Professor Johnson demonstrates the redundancy of trait theories of social judgment offering a more complex and negotiated reality in which patient labels form a part of a rich web of unequal power relations between nurses and their clients **In the Field** Renee C. Fox, 2017-07-05 *In the Field* by Renee C Fox is a narrative account of the author's life as a sociologist It is not a memoir in the conventional sense rather it is an ethnographic autobiography Drawing on a vast reservoir of notes and documents that chronicle the span of her career this work also focuses on the places Fox's field research has carried her Propelled by a conviction to move beyond the boundaries of herself and of her native land Fox has done first hand research in Europe Central Africa and China as well as in the United States The majority of her research has centered on health illness and medicine Other recurrent themes that pervade her work include training for uncertainty the allocation of scarce resources the relationship between self and others detachment and concern the particular and the universal the harm that

can result from intended good and the questions posed by illness and accident pain and suffering and death It is Fox's commitment as a teacher and mentor of generations of students that lies at the heart of this book This volume will inspire new generations of social researchers

Bargaining for Life Barbara Bates, 1992 Tuberculosis was the most common cause of death in the nineteenth century The lingering illness devastated the lives of patients and families and by the turn of the century fears of infectiousness compounded their anguish Historians have usually focused on the changing medical knowledge of tuberculosis or on the social campaign to combat it In Bargaining for Life Barbara Bates documents the human story Using a wide range of sources especially the extensive correspondence of a Philadelphia physician Lawrence F Flick Bates portrays the lives of tuberculous men and women as they tried to cope with the illness get

treatment earn their living and maintain their social relationships Their caretakers including relatives clergy physicians and nurses all had their own reasons for providing help In ways that differed with class race gender and sometimes political influence sanatoriums hospitals and visiting nurse societies mediated various bargains between the sick and their caretakers Bates concludes that the campaign to control and cure tuberculosis had little impact on the disease but it offered care assuaged fears of infection and expanded the welfare system Choices made by the sick helped to shape the institutions and affected the results of the campaign Many of the bargains between patients and caretakers are still discernible in the U S health care system Bates has written an extraordinarily insightful book that combines social history medical history and nursing history It will interest scholars students health professionals and general readers who care about and care for chronically ill people
