Nursing Ethics Therapeutic Caring Presence:

Nursing Ethics Bishop, Anne H. Bishop, John R. Scudder, Anne H. Bishop, John R. Scudder, 1996 The author argues that because the profession of nursing consists of practical ways of fostering the well being of persons ethical considerations must arise out of the unique nature of this work This book focuses on the moral sense of nursing by developing nursing ethics as it is rooted in everyday practice rather than the application of philosophical ethics This implies a therapeutic ethic that is founded in caring two of the four primary themes of the book deal with the concept of caring In addition this book argues that such a nursing ethic has an evocative or inspirational side the decision to become a nurse implies a call to caring The interpretative nature of this brief text advances our understanding of both nursing and ethics **Nursing Ethics** Anne H.

Bishop, John R. Scudder, 2001 **Nursing Ethics Holistic Caring Practice** explores the moral practice of nursing asserting that there is an inherent moral sense in nursing practice itself This new edition of the book requires one to reconsider what it means to be a nurse Rather than someone who merely applies ethical thinking and ethical models of decision making in nursing practice the nurse is a moral being who is engaged in a moral practice **Essentials of Teaching and Learning**

in Nursing Ethics Anne Davis, Verena Tschudin, Louise Tew, 2006-02-24 This title is directed primarily towards health care professionals outside of the United States This book aims to fill a gap with an in depth exploration of nursing ethics content from the western philosophical tradition and some of the methods used in teaching this content It addresses cross cultural issues in using specific ethics content It also reveals the poverty of the present dualism model in nursing ethics and replace this with a more complex and more useful model that invites debate Its scope is both wide and deep but that is needed to enrich the basis for teaching nursing ethics Outlines and critiques all current ethical theories and considers their application to nursing practice Explores ethical issues in numerous cultures Includes case studies drawn from a range of countries Written by leading nurse educators and philosophers in the field **Nursing Ethics in Modern China** Samantha Mei-che

Pang, 2003 This book follows two lines of inquiry in understanding nursing ethics in the historical cultural context of modern China Firstly it scrutinizes the prescribed set of moral virtues for nurses in fulfilling their role requirements during different periods of nursing development over the past century Based on empirical studies the book secondly explores the nurses evaluations of their ethical responsibilities in current practice It carefully examines the particular viewpoints of nurses in their ethical appraisal of nursing practice and patient care situations Drawing upon traditional ethical outlooks international norms and the experiences of nurses as they face difficult care situations this book concludes with recommendations for improving the quality of nursing in contemporary China *The Ethic of Care: A Moral Compass for Canadian Nursing Practice (Revised Edition)* Kathleen Stephany, 2020-02-04 There is an increased use of technology and informatics heavier

workloads and constant changes in the way in which disease processes are managed Yet when compared with other health professionals nurses still spend a great deal of time in direct contact with patients and clients They stay at the bedside listen

to their stories give comfort and advocate The Ethic of Care A Moral Compass for Canadian Nursing Practice is unique from other nursing ethics textbooks in several key ways The book adds a heightened dimension to the already rich knowledge in the field of applied nursing ethics and the ethic of care The author argues that the ethic of care or the moral imperative to act justly be the guiding compass for everything that nurses do It is with passion and conviction that nurses are encouraged to embody the ethic of care as a lived virtue Nurses are also inspired to be the leaders of tomorrow by working toward achieving accountability and sustainability in the Canadian publicly funded health care system and by effectively addressing social inequities At the end of each chapter the author conveys real life case studies as derived from her experiences as a critical care nurse psychiatric nurse clinician and former Coroner These vignettes bring the subject to life and serve as a means for applying newly acquired ethical knowledge The aim of this book is to inspire nurses to be as skillful and compassionate as they can be so that they will leave every encounter with their clients better than when they first arrived The book attempts to inspire nurses to be ethical leaders for social change at the patient client community and global level This revised edition of the book includes additional information about trauma informed care to combat systemic racism and improve the health outcomes for Indigenous people ethics gender and sexual orientation is dealt with in an inclusive and sensitive way and a new Code of Conduct has been included
