V. Peter,2012-09-21

Herbs and spices are among the most versatile ingredients in food processing and alongside their sustained popularity as flavourants and colourants they are increasingly being used for their natural preservative and potential health promoting properties An authoritative new edition in two volumes Handbook of herbs and spices provides a comprehensive guide to the properties production and application of a wide variety of commercially significant herbs and spices Volume 2 begins with a discussion of such issues as the medicinal uses of herbs and spices and their sustainable production Herbs and spices as natural antimicrobials in foods and the effect of their natural antioxidants on the shelf life of food are explored before the book goes on to look in depth at individual herbs and spices ranging from ajowan to tamarind Each chapter provides detailed coverage of a single herb or spice and begins by considering origins chemical composition and classification The cultivation production and processing of the specific herb or spice is then discussed in detail followed by analysis of the main uses functional properties and toxicity With its distinguished editor and international team of expert contributors the two volumes of the new edition of Handbook of herbs and spices are an essential reference for manufacturers using herbs and spices in their products They also provide valuable information for nutritionists and academic researchers Provides a comprehensive guide to the properties production and application of a wide variety of commercially significant herbs and spices Begins with a discussion of such issues as the

medicinal uses of herbs and spices and their sustainable production Explores herbs and spices as natural antimicrobials in foods and the effect of their natural antioxidants on the shelf life of food *Raw Food Nutrition Handbook, The* Karin Dina,Rick Dina,2015-06-01 Rick and Karin Dina are both healthcare practitioners and long time followers of a raw food diet They ve provided scientific information on how to construct nutritious raw diets through their Science of Raw Food Nutrition classes to hundreds of students This book is a compendium of the latest information from peer reviewed research and their own clinical experience on why raw diets are so beneficial and how to construct a raw diet that will provide all the necessary nutrients The Raw Food Nutrition Handbook covers issues such as getting enough protein understanding calorie density and nutrient density focusing on whole plant foods hydration and food combining The Dinas provide examples of some of the most popular raw food diets and discuss the nutritional adequacies of each one They also share some of the success strategies they ve used over the years to help people stay raw over the long term make sense of conflicting nutritional information and engage family and friends in their dietary journeys

Microbial Production of Food Ingredients, Enzymes and Nutraceuticals Brian McNeil,David Archer,Ioannis Giavasis,Linda Harvey,2013-03-21 Bacteria yeast fungi and microalgae can act as producers or catalysts for the production of food ingredients enzymes and nutraceuticals With the current trend towards the use of natural ingredients in foods there is renewed interest in microbial flavours and colours food bioprocessing using enzymes and food biopreservation using bacteriocins Microbial production of substances such as organic acids and hydrocolloids also remains an important and fast changing area of research Microbial production of food ingredients enzymes and nutraceuticals provides a comprehensive overview of microbial production of food ingredients enzymes and nutraceuticals Part one reviews developments in the metabolic engineering of industrial microorganisms and advances in fermentation technology in the production of fungi yeasts enzymes and nutraceuticals Part two discusses the production and application in food processing of substances such as carotenoids flavonoids and terpenoids enzymes probiotics and prebiotics bacteriocins microbial polysaccharides polyols and polyunsaturated fatty acids Microbial production of food ingredients enzymes and nutraceuticals is an invaluable guide for professionals in the fermentation industry as well as researchers and practitioners in the areas of biotechnology microbiology chemical engineering and food processing Provides a comprehensive overview of microbial flavours and colours food bioprocessing using enzymes and food biopreservation using bacteriocins Begins with a review of key areas of systems biology and metabolic engineering including methods and developments for filamentous fungi Analyses the use of microorganisms for the production of natural molecules for use in foods including microbial production of food flavours and carotenoids

Consumer-Driven Innovation in Food and Personal Care Products S R Jaeger,Hal MacFie,2010-08-30 Experts from around the world present changes in the global marketplace and developments in research methodologies underpinning new product development NPD in this essential collection The business and marketing aspects of NPD sometimes neglected in books of this type are addressed alongside methods for

product testing Trends processes and perspectives in consumer driven NPD in the food and personal care product industries are addressed in the opening chapters of the book Specific topics include evolution in food retailing and advances in concept research Hedonic testing is the focus of the next section Different viewpoints on consumer research methods and statistics for NPD are reviewed in later chapters The final part of the book looks towards the future of innovation covering the implications for NPD of topics such as human genetic variation in taste perception and neuroimaging Several chapters are not standard scientific articles Rather they are written records of conversations between two people on a particular topic related to consumer driven innovation in foods and personal care products In them the interviewees speak freely about their views and experiences in NPD providing unique insights Consumer driven innovation in food and personal care products will broaden readers understanding of the many approaches available to NPD personnel and ways in which they can be used to support innovation activities Provides expert insight into the changes in the global market place and developments in research methodologies underpinning NPD Examines the business and marketing aspects of NPD sometimes neglected in books of this type are addressed alongside methods for product testing Chapters review the different viewpoints on consumer research methods and statistics for NPD

Fibre-Rich and Wholegrain Foods Jan A Delcour, Kaisa Poutanen, 2013-03-26 Consumers are increasingly seeking foods that are rich in dietary fibre and wholegrains but are often unwilling to compromise on sensory quality Fibre rich and wholegrain food reviews key research and best industry practice in the development of fibre enriched and wholegrain products that efficiently meet customer requirements Part one introduces the key issues surrounding the analysis definition regulation and health claims associated with dietary fibre and wholegrain foods The links between wholegrain foods and health the range of fibre dietary ingredients and a comparison of their technical functionality are discussed as are consumption and consumer challenges of wholegrain foods Part two goes on to explore dietary fibre sources including wheat and non wheat cereal dietary fibre ingredients vegetable fruit and potato fibres Improving the quality of fibre rich and wholegrain foods including such cereal products as wholegrain bread muffins pasta and noodles is the focus of part three Fibre in extruded products is also investigated before part four reviews quality improvement of fibre enriched dairy products meat products seafood beverages and snack foods Companion animal nutrition as affected by dietary fibre inclusion is discussed before the book concludes with a consideration of soluble and insoluble fibre in infant nutrition With its distinguished editors and international team of expert contributors Fibre rich and wholegrain foods provides a comprehensive guide to the field for researchers working in both the food industry and academia as well as all those involved in the development production and use of fibre enriched and wholegrain foods Reviews key research and best industry practice in the development of fibre enriched and wholegrain products Considers analysis definition regulation and health claims associated with dietary fibre and wholegrain foods Explores sources of dietary fibre including wheat and non wheat cereal vegetable fruit and potato fibres

Encapsulation Technologies and Delivery Systems for Food

Ingredients and Nutraceuticals Nissim Garti,D. Julian McClements,2012-10-19 Improved technologies for the encapsulation protection release and enhanced bioavailability of food ingredients and nutraceutical components are vital to the development of future foods Encapsulation technologies and delivery systems for food ingredients and nutraceuticals provides a comprehensive guide to current and emerging techniques Part one provides an overview of key requirements for food ingredient and nutraceutical delivery systems discussing challenges in system development and analysis of interaction with the human gastrointestinal tract Processing technologies for encapsulation and delivery systems are the focus of part two Spray drying cooling and chilling are reviewed alongside coextrusion fluid bed microencapsulation microencapsulation methods based on biopolymer phase separation and gelation phenomena in aqueous media Part three goes on to investigate physicochemical approaches to the production of encapsulation and delivery systems including the use of micelles and microemulsions polymeric amphiphiles liposomes colloidal emulsions organogels and hydrogels Finally part four reviews characterization and applications of delivery systems providing industry perspectives on flavour fish oil iron micronutrient and probiotic delivery systems With its distinguished editors and international team of expert contributors Encapsulation technologies and delivery systems for food ingredients and nutraceuticals is an authoritative guide for both industry and academic researchers interested in encapsulation and controlled release systems Provides a comprehensive guide to current and emerging techniques in encapsulation technologies and delivery systems Chapters in part one provide an overview of key requirements for food ingredient and nutraceutical delivery systems while part two discusses processing technologies for encapsulation and delivery systems Later sections investigate physicochemical approaches to the production of encapsulation and delivery systems and review characterization and applications of delivery systems

Advances in Food and Beverage
