Taylor-Pickard, P.

Spring, 2023-08-28 Globally pork and poultry production has become an extremely competitive industry There is now more pork consumed in the world than any other meat yet there is still intense competition for the industry to attract and retain consumers Consumers continue to demand safe high quality pork and poultry products at competitive prices compared to other high protein food alternatives To ensure sustainability of both the pig and poultry industries producers must endeavour to seek new technologies to improve production efficiency whilst lowering the cost of production and producing a quality product This edited collection of articles is taken from a series of seminars that brought together some of the world s leading authorities in the field of pig and poultry nutrition and production The fundamental theme is to re examine the current trends in productivity within the pig and poultry industries and to identify nutritional and managerial means to improve

competitiveness as well as the quality of the end product The importance of animal health together with novel strategies for disease control and ways to minimise the environmental impact of pig and poultry production are covered Gaining the edge in pork and poultry production is aimed at nutritionists and animal producers as well as students and researchers studying animal and applied biological sciences

**Current advances in selenium research and applications** Peter F. Surai, Jules A. Taylor-Pickard, 2023-08-28 Selenium Se is an essential dietary trace element participating in the regulation of various physiological functions in both animals and humans through its incorporation into selenoproteins as the amino acid selenocysteine Among many minerals Se has a special place being the most controversial trace element with a narrow gap between essentiality and toxicity Indeed there are important environmental issues considering selenium as a pollutant from the one hand and global selenium deficiency on the other In fact Se deficiency is considered as a risk factor for the development of various diseases in human and animals Decreased Se availability from soils as a result of low soil pH and usage of synthetic fertilizers is the major concern in European countries causing inadequate Se levels in food and feeds Furthermore it seems likely that sodium selenite used for the last 30 years as a feed supplement is not an optimal form of Se and the usage of organic selenium in animal diets could help to maintain optimal Se status as well as high immunocompetence productive and reproductive performance The aim of the present volume is to provide updated information on several important Se related subjects including Se status in Europe and ways of its improvement advances in Se analysis and speciation in biological material roles of selenium in poultry pig and ruminant nutrition Production of functional Se enriched food the relationship between selenium and mycotoxins polyunsaturated fatty acids as well as reoviruses are also addressed This collection of articles will provide nutritionists veterinarians human doctors researchers and any other readers with new insights into the exciting world of the goddess of the moon SELENIUM
