Navarro-Farr, Michelle Rich, 2015-08-15 Archaeology at El Per Waka is the first book to summarize long term research at this major Maya site The results of fieldwork and subsequent analyses

conducted by members of the El Per Waka Regional Archaeological Project are coupled with theoretical approaches treating the topics of ritual memory and power as deciphered through material remains discovered at Waka. The book is site centered yet the fifteen wide ranging contributions offer readers greater insight to the richness and complexity of Classic period Maya culture as well as to the ways in which archaeologists believe ancient peoples negotiated their ritual lives and comprehended their own pasts. El Per Waka is an ancient Maya city located in present day northwestern Peten Guatemala. Rediscovered by petroleum exploration workers in the mid 1960s it is the largest known archaeological site in the Laguna del Tigre National Park in Guatemala's Maya Biosphere Reserve. The El Per Waka Regional Archaeological Project initiated scientific investigations in 2003 and through excavation and survey researchers established that Waka was a key political and economic center well integrated into Classic period lowland Maya civilization and reconstructed many aspects of Maya life and ritual activity in this ancient community. The research detailed in this volume provides a wealth of new substantive and scientifically excavated data which contributors approach with fresh theoretical insights. In the process they lay out sound strategies for understanding the ritual manipulation of monuments, landscapes, buildings, objects and memories as well as related topics encompassing the performance and negotiation of power throughout the city's extensive sociopolitical history.

Journal of the Royal Army Medical Corps Great Britain. Army. Royal Army Medical Corps, 1960 The Archaeology of Human Bones Simon Mays, 2021-03-01. The Archaeology of Human Bones provides an up to date account of the analysis of human skeletal remains from archaeological sites introducing students to the anatomy of bones and teeth and the nature of the burial record. Drawing from studies around the world this book illustrates how the scientific study of human remains can shed light upon important archaeological and historical questions. This new edition reflects the latest developments in scientific techniques and their application to burial archaeology. Current scientific methods are explained alongside a critical consideration of their strengths and weaknesses. The book has also been thoroughly revised to reflect changes in the ways in which scientific studies of human remains have influenced our understanding of the past and has been updated to reflect developments in ethical debates that surround the treatment of human remains. There is now a separate chapter devoted to archaeological fieldwork on burial grounds and the chapters on DNA and ethics have been completely rewritten. This edition of The Archaeology of Human Bones provides not only a more up to date but also a more comprehensive overview of this crucial area of archaeology. Written in a clear style with technical jargon kept to a minimum it continues to be a key work for archaeology students. *The Juvenile Skeleton in Forensic Abuse Investigations* Ann H. Ross, Suzanne M. Abel, 2011-07-26. Juvenile homicide and fatal maltreatment remain serious and pervasive problems in the developed world and especially in the United States where in 2005 some 1 500 children died from neglect and physical abuse. Alarming statistics such as this as well as an upsurge in the media attention paid to all things forensic underscore the pressing need for the utmost rigor in the scientific investigation of child abuse cases. This well timed volume is a response to the climate of public and press interest in

such inquiries where the forensic aspects of the casework generate an enormous amount of attention The contributions cover a wide range of topics and explore many of the finer details of investigations into juvenile fatalities suspected of being abuse related The chapters reflect both the multi disciplinary nature of such investigations and also the need for law enforcement professionals to take a rounded holistic approach to the casework involved The motivational factors that lead many professionals enter this arena of investigation are of course personal and individual However at the core of their commitment and their work is a shared need for justice plain and simple Victim advocacy and protecting the rights of children both living and deceased remains a key impetus for those professionals who specialize in child abuse research At the heart of this book is the aim of providing both a vital resource for investigators and a purposeful voice for the young victims of abuse unable as they are to stand up and speak for themselves
