Ussher, Jane Ussher, 2011-03-28 Nominated for the 2012 Distinguished Publication Award of the Association for Women in Psychology Why are women more likely to be positioned or diagnosed as mad than men If madness is a social construction a gendered label as many feminist critics would argue how can we understand and explain women s prolonged misery and distress In turn can we prevent or treat women s distress in a non pathologising women centred way The Madness of Women addresses these questions through a rigorous exploration of the myths and realities of women s madness Drawing on academic and clinical experience including case studies and in depth interviews as well as on the now extensive critical literature in the field of mental health Jane Ussher presents a critical multifactorial analysis of women s madness that both addresses the notion that madness is a myth and yet acknowledges the reality and multiple causes of women s distress Topics include The genealogy of women s madness incarceration of difficult or deviant women Regulation through treatment Deconstructing depression PMS and borderline personality disorder Madness as a reasonable response to objectification and sexual violence Women s narratives of resistance This book will be of great interest to students and scholars of psychology gender studies sociology women s studies cultural studies counselling and nursing The SAGE Handbook of Mental Health and Illness David Pilgrim, Bernice Pescosolido, Anne Rogers, 2011 This title integrates the conceptual empirical and evidence based threads of mental health as an area of study research and practice It approaches mental health from two perspectives firstly as a positive state of well being and secondly as psychological difference or abnormality in its social context Women Writing Trauma in the Global South Annemarie Pabel, 2022-09-08 Through exploring complex suffering in the writings of Aminatta Forna Isabel Allende and Anuradha Roy Women Writing Trauma in the Global South dismantles conceptual shortcomings and problematic imbalances at the core of existing theorizations around psychological trauma The global constellation of women writers from Sierra Leone Chile and India facilitates a productive analysis of how the texts navigate intertwined experiences of individual and systemic trauma

The discussion departs from a recent critical turn in literary and cultural trauma studies and transgresses many interrelated boundaries of geocultural contexts language and genre Discovering the role of literary forms in reparative articulation and empathic witnessing this critical intervention develops new ideas for an inclusive conceptual expansion of trauma from the global peripheries and contributes to the ongoing debate on marginalized suffering **Handbook of Counselling**

**Emotional Disorders** E. Deidre Pribram, 2016-01-13 In her latest contribution to the growing field of emotion studies Deidre Pribram makes a compelling argument for why culturalist approaches to the study of emotional disorders continue to be eschewed even as the sociocultural and historical study of mental illness flourishes The author ties this phenomenon to a tension between two fundamentally different approaches to emotion an individualist approach which regards emotions as the property of the individual whether biologically or psychologically and a culturalist approach which regards emotions as collective social processes with distinctive histories and meanings that work to produce particularized subjects While she links a strong preference for the individualist construct in Western culture to the rise of the psychological and psychiatric disciplines at the turn of the twentieth century Pribram also engages with a diverse set of case studies tied to psychological and aesthetic discourses on emotions These range from Van Gogh's status as emotionally disordered to the public emotional aesthetics of 19th century melodrama to the diagnostic categories of the DSMs and the fear of globalizing emotional disorders in the 21st century This genuinely interdisciplinary approach makes for a text with potential application in a wide range of disciplines within cultural studies including sociocultural and historical analysis of psychiatry and psychology gender theory subject and identity theory popular culture studies and history and theory of the arts *Salman Rushdie and*
