## **Paths To Regionalisation:**

*Paths to Regionalisation* Sophie Boisseau Du Rocher, Bertrand Fort, 2005 The aim of this book is to explain the different experiences in region building in Europe and East the two regions of the world that are making major contributions to the experience and theory of region building Europe and East Asia have evolved in different ways with different logics and mechanisms but it does not mean they do not have common interests or things to learn from one another This book seeks to contribute to a better understanding of the experiences and challenges in both regions and to stimulate a much needed reflection of the benefits of regions to harness globalisation OECD Multi-level Governance Studies Decentralisation and Regionalisation in Portugal What Reform Scenarios? OECD, 2020-02-17 The report presents a diagnosis of Portugal multi

level governance in international perspectives and highlights the strengths and challenges of the system It then presents three potential policy paths of regional reform for Portugal As the options are not mutually exclusive they could work as complements to each other The report analyses the conditions under which the reforms may deliver more economic efficiency and regional equity *Regional Pathways to Nuclear Nonproliferation* Wilfred Wan, 2018-06-15 The contemporary nuclear landscape is rife with challenges Stagnated progress in disarmament widespread modernization plans and emergent proliferation pathways are contributing to the risk of catastrophe Meanwhile global nuclear order appears more precarious than ever This book makes a case for a regional reorientation of the nuclear nonproliferation regime arguing that a more specialized decentralized and localized arrangement could more effectively address post Cold War challenges In the process it develops a framework to analyze the conditions that would allow for more robust regional nuclear cooperation Regional Pathways to Nuclear Nonproliferation includes a series of case studies centering on Northeast Asia Southeast Asia and the Middle East It provides a comprehensive overview of existing nuclear cooperation at the regional level including in the context of nuclear weapon free zones For each case the book both analyzes the viability of a stronger regional nuclear order and considers the form such an order would likely take What is the magnitude and character of the nuclear proliferation threat across different regions What does the presence of institutions in economic environmental and human security domains suggest about the likelihood of addressing that threat A better understanding of broader regional patterns may be the key to explaining the possibility of regional nuclear cooperation It may also help identify means to effectuate the timing and scale of that cooperation bolstering regional nuclear orders and in turn ensuring the viability of global nuclear order
