Cognitive Vulnerability to Emotional Disorders Lauren B. Alloy, John H. Riskind, 2006-04-21 Emotional disorders such as anxiety depression and dysfunctional patterns of eating are clearly among the most devastating and prevalent confronting practitioners and they have received much attention from researchers in personality social cognitive and developmental psychology as well as in clinical psychology and psychiatry A major recent focus has been cognitive vulnerability which seems to set the stage for recurrences of symptoms and episodes In the last five years there has been a rapid proliferation of studies In this book leading experts present the first broad synthesis of what we have now learned about the nature of cognitive factors that seem to play a crucial role in creating and maintaining vulnerability across the spectrum of emotional disorders An introductory chapter considers theory and research design and methodology and constructs a general conceptual framework for understanding and studying the relationships between developmental and cognitive variables and later risk and the difference between distal cognitive antecedents of disorders e.g. depressive inferential styles dysfunctional attitudes and proximal ones e.g. schema activation or inferences Subsequent chapters are organized into three sections on mood anxiety and eating disorders Each section ends with an integrative overview chapter that offers both incisive commentary and insightful suggestions for further systematic research A rich resource for all those professionally concerned with these problems Cognitive Vulnerability to Emotional Disorders advances both clinical science and clinical practice

Targeting the Broadly Pathogenic Kynurenine Pathway Sandeep Mittal, 2015-11-18 Tryptophan metabolism via kynurenine pathway plays a critical role in both health and a variety of human diseases This book highlights the known associations between kynurenine pathway and various disease states as well as examines the current status of drug development and clinical trials of compounds known to alter tryptophan metabolism The research plays a critical role in molecular targeted therapies directed at altering the kynurenine pathway of tryptophan metabolism The initial and rate limiting step of tryptophan metabolism is mediated by one of two enzymes tryptophan 2,3-dioxygenase (TDO) predominantly in the liver but also in the brain and indoleamine 2,3-dioxygenase (IDO) in a host of tissues in response to immune activation Targeting the enzymes IDO and TDO as well as other downstream effectors would therefore be likely to generate novel treatment options that would be helpful in a wide variety of clinical settings This book provides a unique bridge between basic mechanistic understanding of the role of

the kynurenine pathway with translational applications and clinical relevance It will explore the indications that tryptophan metabolism is a potential biomarker of disease activity can contribute to local and possibly systemic immune suppression in cancer and is an attractive target for which a variety of inhibitors are readily available **Tea in Health and Disease**

Prevention Victor R Preedy, 2012-10-01 While there have been many claims of the benefits of teas through the years and while there is nearly universal agreement that drinking tea can benefit health there is still a concern over whether the lab generated results are representative of real life benefit what the risk of toxicity might be and what the effective level thresholds are for various purposes Clearly there are still questions about the efficacy and use of tea for health benefit This book presents a comprehensive look at the compounds in black green and white teas their reported benefits or toxicity risks and also explores them on a health condition specific level providing researchers and academics with a single volume resource to help in identifying potential treatment uses No other book on the market considers all the varieties of teas in one volume or takes the disease focused approach that will assist in directing further research and studies Interdisciplinary presentation of material assists in identifying potential cross over benefits and similarities between tea sources and diseases Assists in identifying therapeutic benefits for new product development Includes coverage and comparison of the most important types of tea green black and white **The Search for Biomarkers in Psychiatry** Jorge Manzanares, Maria S.
