Pathways To Freedom:

Generations of Freedom Nik Ribianszky, 2021-03-31 In *Generations of Freedom* Nik Ribianszky employs the lenses of gender and violence to examine family community and the tenacious struggles by which free blacks claimed and maintained their freedom under shifting international governance from Spanish colonial rule 1779-95 through American acquisition 1795 and eventual statehood established in 1817 and finally to slavery's legal demise in 1865 Freedom was not necessarily a permanent condition but one separated from racial slavery by a permeable and highly unstable boundary This book explicates how the interlocking categories of race class and gender shaped Natchez Mississippi's free community of color and how implicit and explicit violence carried down from one generation to another To demonstrate this Ribianszky introduces the concept of generational freedom Inspired by the work of Ira Berlin who focused on the complex process through which free Africans and their descendants came to experience enslavement generational freedom is an analytical tool that employs this same idea in reverse to trace how various generations of free people of color embraced navigated and protected their tenuous freedom This approach allows for the identification of a foundational generation of free people of color those who were born into slavery but later freed The generations that followed the conditional generations were those who were born free and without the experience of and socialization into North America's system of chattel racial slavery Notwithstanding one's status at birth as legally free or unfree though each individual's continued freedom was based on compliance with a demanding and often unfair system *Generations of Freedom* tells the stories of people who collectively inhabited an uncertain world of qualified freedom Taken together by exploring the themes of movement gendered violence and threats to their property and indeed their very bodies these accounts argue that free blacks were active in shaping their own freedom and that of generations thereafter Their successful navigation of the shifting ground of freedom was dependent on their utilization of all available tools at their disposal securing reliable and influential allies maintaining their independence and using the legal system to protect their property including that most precious themselves

The Struggle for Freedom from Fear Alison Brysk,2018-08-08 How can we understand and contest the global wave of violence against women In this book Alison Brysk shows that gender violence across countries tends to change as countries develop and liberalize but not in the ways that we might predict She shows how liberalizing authoritarian countries and transitional democracies may experience more shifting patterns and greater levels of violence than less developed and democratic countries due to changes and uncertainties in economic and political structures Accordingly Brysk analyzes the experience of semi liberal developing countries at the frontiers of globalization Brazil India South Africa Mexico the Philippines and Turkey to map out patterns of gender violence and what can be done to change those patterns As the book shows gender violence is not static nor can it be attributed to culture or individual pathology rather it varies across a continuum that tracks economic political and social change While a combination of international action law public policy civil society mobilization and changes in social values work to decrease gender violence Brysk assesses the potential limits and balance of these measures Brysk shows that a human rights approach is necessary but not sufficient to address gender violence and that insights from feminist and development approaches are essential

Tobacco Use Among United States Racial/ethnic Minority Groups United States. Department of Health and Human Services, 1998 This Surgeon General's report on tobacco use summarizes current information on risk factors and patterns related to tobacco use among members of four major racial and ethnic minority groups in the United States African Americans American Indians and Alaska Natives Asian Americans and Pacific Islanders and Hispanics In addition this report presents information on national and regional efforts to curtail consumption of tobacco products among members of these four groups Previous Surgeon General's reports on smoking and health have briefly summarized findings related to one or more of the racial ethnic groups covered in this report but this is the first Surgeon General's report to concentrate specifically on the four major racial ethnic groups in the United States Several factors prompted the development of this report First the information in this report has never before been compiled in one source Consequently policymakers community leaders researchers and public health workers have had difficulty determining the extent of the problem identifying gaps in information regarding tobacco use among members of the four

groups or being aware of existing tobacco control programs that have demonstrated effectiveness. Thus incorporating such information into the design and implementation of culturally appropriate services has been difficult. Second, the four racial/ethnic groups currently constitute about one fourth of the population of this country, and the Bureau of the Census projects that by 2050 the non-Hispanic white population in the United States will total only 53 percent. Day 1996 Preventing health problems related to tobacco use among the individuals in racial and ethnic groups will be integral to achieving U.S. public health objectives such as those proposed in Healthy People 2000. National Health Promotion and Disease Prevention Objectives. U.S. Department of Health and Human Services. USDHHS 1991-1995. National Center for Health Statistics. NCHS 1994. This report contributes essential knowledge that must be incorporated into efforts to accomplish the Healthy People 2000 objectives.
