The Second Conquest of Latin America Steven C. Topik, Allen Wells, 2010-02-01 Between 1850 and 1930 Latin America's integration into the world economy through the export of raw materials transformed the region This encounter was nearly as dramatic as the conquistadors' epic confrontation with Native American civilizations centuries before An emphasis on foreign markets and capital replaced protectionism and self sufficiency as the hemisphere's guiding principles In many ways the means employed during this period to tie Latin America more closely to western Europe and North America resemble strategies currently in vogue Much can be learned from analyzing the first time that Latin Americans embraced export led growth This book focuses on the impact of three key export commodities coffee, henequen and petroleum The authors concentrate on these rather than on national economies because they illustrate more concretely the interaction between the environment, natural and human resources and the world economy By analyzing how different products spun complex webs of relationships with their respective markets the essays in this book illuminate the tensions and contradictions found in the often conflictive relationship between the local and the global between agency and the not so invisible hand Ultimately the contributors argue that the results of the second conquest were not one sided as Latin Americans and foreigners together forged a new economic order one riddled with contradictions that Latin America is still attempting to resolve today

Reinventing the State Carol Wise, 2009-12-14 The political economic history of Latin America in the post World War II era has largely been one of underachievement and opportunities lost This all changed with the wave of market reforms that were implemented in the 1990s However the precise role of these reforms as an agent of change is still hotly debated This in depth analysis of the Peruvian case argues for an explanation that treats institutional innovation and state reconstruction as necessary conditions for the apparent success of the market in Latin America Exploring how state intervention has been both the cause of Latin America's economic downfall in the 1980s and the solution to its recovery Reinventing the State analyzes three main phases of state intervention the developmentalism that lasted until 1982 the state in retreat of the 1980s and the streamlined state of the 1990s Through a comprehensive examination of the Peruvian experience the book explains the country's impressive turnaround from the standpoint of institutional modernization and internal state reform Written for a broad academic audience the public policy community and the private sector this book is also meant as a quick primer for any journalist consultant or private sector analyst in need of an overview of the region's market reform effort and how it has played out in Peru Carol Wise is Associate Professor School of International Relations University of Southern California

Latin America John Ward, 2004 Provides an introduction to the economic and political history of the region in the last half century

Pathways from the Periphery Stephan Haggard, 1990 Pathways from the Periphery is an innovative interpretation of the development of the newly industrializing countries NICs which now dominate Third World industry and manufacturing trade While such countries as Brazil and Mexico have achieved industrialization through strategies intended to foster self reliance the East Asian NICs South Korea Taiwan Hong Kong and Singapore have grown rapidly through an aggressive policy promoting the export of manufactured goods Stephan Haggard provides the first comprehensive comparison of the politics of industrialization in these East Asian and Latin American countries and offers new evidence on current issues in comparative political economy including the implications of different growth paths for dependency equity and democracy Recognizing the influence on development strategies of external shocks such as depression war and reduced access to foreign capital Haggard emphasizes the importance of domestic political institutions for economic decision making The East Asian NICs are characterized by close but regulated business government alliances weak labor movements and politically insulated and administratively capable states factors Haggard shows that have facilitated flexible and coherent industrial policies He argues that domestic policy choices can shape the external constraints states face The author considers in detail why Latin America s long standing efforts to achieve self reliance have ironically resulted in a dependence on international capital greater than that of the East Asian countries Addressing a long standing debate on the relationship between industrialization strategy and regime type Haggard carefully assesses the connection between growth and democratic politics Despite their authoritarian growth models the Asian NICs have he observes achieved greater equity than their Latin American counterparts Although the success of export led growth has in the past been associated with authoritarian rule Haggard argues that no compelling

theoretical reasons preclude democratic governments from achieving strong economic performance Breaking new ground in theoretical inquiry and empirical research Pathways from the Periphery will be welcomed by political economists scholars and students of comparative politics historians of Asian and Latin American public policy and others concerned with the challenge of economic development
