Patterns Of Fertility In Low Fertility Settings Population Studies:

PATTERNS OF FERTILITY IN LOW-FERTILITY SETTINGS. United Nations. Department of International Economic and Social Affairs, Patterns of Fertility in Low-fertility Settings, 1992 *The Changing Face of Canada* Roderic P. Beaujot, Donald W. Kerr, 2007 Canadian society is rapidly changing This concise up to date volume masterfully captures this change Edited by two of Canada's leading demographers Roderic Beaujot and Don Kerr this book is an exciting entry in Canadian population studies drawing from a variety of disciplines including sociology geography economics history and epidemiology *The Changing Face of Canada* is an essential text for demography courses across the country Each reading has been meticulously edited and concisely ordered into five essential sections fertility mortality international migration domestic migration and population distribution population aging population composition Vital issues include the role of immigration in Canada's future the deteriorating economic welfare of immigrants globalization undocumented migration and unwanted refugees Aboriginal population change implications of unprecedented low fertility and the astonishing demographic transformation of Canadian cities Partnership and Reproductive Behaviour in Low-fertility Countries United Nations. Department of Economic and Social Affairs. Population Division, 2003 The number of countries where the total fertility rate is below 2.1 children per woman increased more than ten fold during the last four decades This report focuses on the influence of marital or partnership behaviour on fertility levels and trends resulting in below replacement fertility Social trends considered include increasing cohabitation higher age of first marriage higher proportions of never married women over age 30 and the rapid fall in the marriage rate in the 1990s While all low fertility societies share fundamental societal features many of their socio economic and cultural features vary and thus shape the differences of demographic characteristics

Low Fertility, Institutions, and their Policies Ronald R. Rindfuss, Minja Kim Choe, 2016-06-16 This volume examines ten economically advanced countries in Europe and Asia that have experienced different levels of fertility decline It offers readers a cross country perspective on the causes and consequences of low birth rates and the different policy responses to this worrying trend The countries examined are not only diverse geographically historically and culturally but also have different policies and institutions in place They include six very low fertility countries Austria Czech Republic Hungary Italy Spain and Taiwan and four that have close to replacement level fertility United Kingdom Norway Canada and France Although fertility has gone down in all these countries over the past 50 years the chapters examine the institutional policy and cultural factors that have led some countries to have much lower fertility rates than others In addition the final chapter provides a cross country comparison of individual perceptions about obstacles to fertility based on survey data and government support for families This broad overview along with a general introduction helps put the specific country papers in context As birth rates continue to decline there is increasing concern about the fate of social welfare systems including healthcare and programs for the elderly This book will help readers to better understand the root causes of such problems

with its insightful discussion on how a country's institutions policies and culture shape fertility trends and levels

Contemporary Issues in Family Studies Angela Abela, Janet Walker, 2013-10-02 This volume tackles key issues in the changing nature of family life from a global perspective and is essential reading for those studying and working with families. The Oxford Handbook of Evolutionary Psychology and Parenting Viviana A. Weekes-Shackelford, Todd K. Shackelford, 2021-09-10

The Oxford Handbook of Evolutionary Psychology and Parenting provides a comprehensive resource for state of the art research on how our evolutionary past informs current parenting roles and practices. Featuring chapters from leaders in the field the Handbook is designed for advanced undergraduates graduates and professionals in psychology anthropology biology sociology and demography as well as many other social and life science disciplines. It is the first resource of its kind that brings together empirical and theoretical contributions from scholarship at the intersection of evolutionary psychology and parenting

Household Demography and Household Modeling Evert van Imhoff, Anton Kuijsten, Pieter Hooimeijer, Leo J.G. van Wissen, 2013-03-09

In 1992 a summer course Demographic Perspectives on Living Arrangements as well as a one day workshop Recent Issues in Household Modelling were held in Wassenaar The Netherlands. This volume is based on the lectures delivered during the summer course as well as on the presentations made in the workshop. As such the present volume combines the two elements of transfer of knowledge on the one hand and updating the state of the art in the field of household demography especially in household modelling on the other hand. In organizing the contents and structure of this volume we have aimed at creating a book that covers the field of household demography and household modelling in a certain logical and comprehensive way. The purpose of this book is to offer a comprehensive treatment of recent developments in various aspects of the growing field of household demography. Since these recent developments have particularly occurred in household analysis and modelling

these topics will receive special emphasis The book was written for demographers social scientists and planners who are involved in the study and projection of population in general and of households in particular

Catalogue of United Nations Publications, 1995 **India's Perception, Society, and Development** Arup Maharatna, 2013-05-09 There has been of late a growing realisation that the pace and pattern of economic development of a country can hardly be understood and explained comprehensively in terms of the straitjacket of economics discipline alone India is a prime example of the importance of the part played by a country's history culture sociology and socio cultural religious norms values and institutions in its development process This book with its assorted essays of varying depths of scholarship and insightful reflections attempts to drive home this point more forcefully than ever before In its search for the non economic roots of India's overall sloth and murky progress in its broad based economic and human development the book illuminates major oddities deep inside a unique mental make up full of perceptual and ideational dilemmas many of which are arguably shaped by the long lasting and dominant influence of what could be called the Brahminical lines of thinking and discourse With India's hazy and dodgy world of perceptions as a backdrop the book also addresses through its intelligent essays the deep and sometimes dire ramifications of the historic advent and the dramatic advance of neoliberal market ideology today United Nations Publications, 1997 Understanding Family Change and Variation Jennifer A. Johnson-Hanks, Christine A.

Bachrach, S. Philip Morgan, Hans-Peter Kohler, 2011-08-27 Fertility rates vary considerably across and within societies and over time Over the last three decades social demographers have made remarkable progress in documenting these axes of variation but theoretical models to explain family change and variation have lagged behind At the same time our sister disciplines from cultural anthropology to social psychology to cognitive science and beyond have made dramatic strides in understanding how social action works and how bodies brains cultural contexts and structural conditions are coordinated in that process Understanding Family Change and Variation Toward a Theory of Conjunctural Action argues that social demography must be reintegrated into the core of theory and research about the processes and mechanisms of social action and proposes a framework through which that reintegration can occur This framework posits that material and schematic structures profoundly shape the occurrence frequency and context of the vital events that constitute the object of social demography Fertility and family behaviors are best understood as a function not just of individual traits but of the structured contexts in which behavior occurs This approach upends many assumptions in social demography encouraging demographers to embrace the endogeneity of social life and to move beyond fruitless debates of structure versus culture of agency versus structure or of biology versus society *The Demography of Europe* Gerda Neyer, Gunnar Andersson, Hill Kulu, Laura Bernardi, Christoph Bühler, 2013-04-22 Over the past decades Europe has witnessed fundamental changes of its population dynamics and population structure Fertility has fallen below replacement level in almost all European countries while childbearing behavior and family formation have become more diverse Life expectancy has increased in Western Europe for

both females and males but has been declining for men in some Eastern European countries Immigration from non European countries has increased substantially as has mobility within Europe These changes pose major challenges to population studies as conventional theoretical assumptions regarding demographic behavior and demographic development seem unfit to provide convincing explanations of the recent demographic changes This book derived from the symposium on The Demography of Europe held at the Max Planck Institute for Demographic Research in Rostock Germany in November 2007 in honor of Professor Jan M Hoem brings together leading population researchers in the area of fertility family migration life expectancy and mortality The contributions present key issues of the new demography of Europe and discuss key research advances to understand the continent s demographic development at the turn of the 21st century *Demographic Research, Volume 17: Book II* Demographic Research,2008 Research Awards Index ,1986 **Demography** Willem Petrus Mostert,1998 Demography is the scientific study of the size composition and change in human population It studies empirical phenomena and describes them as precisely as possible **Routledge Handbook of Asian Demography** Zhongwei Zhao,Adrian C. Hayes,2017-12-14 Home to close to 60 per cent of the world s population Asia is the largest and by far the most populous continent It is also extremely diverse physically and culturally Asian countries and regions have their own distinctive histories cultural traditions religious beliefs and political systems and they have often pursued different routes to development Asian populations also present a striking array of demographic characteristics and stages of demographic transition This handbook is the first to provide a comprehensive study of population change across the whole of Asia Comprising 28 chapters by more than 40 international experts this handbook examines demographic transitions on the continent their considerable variations their causes and consequences and their relationships with a wide range of social economic political and cultural processes Major topics covered include population studies and sources of demographic data historical demography family planning and fertility decline sex preferences mortality changes causes of death HIV AIDS population distribution and migration urbanization marriage and family human capital and labour force population ageing demographic dividends political demography population and environment and Asia s demographic future This handbook provides an authoritative and comprehensive reference for researchers policymakers academics students and anyone who is interested in population change in Asia and the world **Research Grants Index** National Institutes of Health (U.S.).
