Patterns And Policies In Higher Education Penguin Education Specials:

Patterns and Policies in Higher Education George Brosan, 1971 **Life and Death in Higher Education** Clare Debenham, 2021-01-28 This study is the result of many years of research but is topical because of the current teacher shortage At its peak in 1961 there were 40 000 men and women who entered colleges of education in Britain compared to 50 000 who entered traditional universities There have been interesting histories of individual colleges but this book takes a holistic approach which was supported by the historian Professor Asa Briggs This controversial study is packed with fascinating facts that will intrigue and inform readers As well as the relationship between colleges and schools social issues are analysed such as the role of working class teachers and the battles of women staff and students New evidence is provided for the colleges expansion and their sudden closure The study draws on undiscovered official and local archival sources An important feature is the testimony drawn from interviews from former college students the oldest being 101 years This immensely readable book appeals to general readers as well as specialist historians of education It is of particular interest to teachers especially those whose institutions were originally colleges of education Political scientists and sociologists will find much of relevance as will feminists who have enjoyed Debenham's last two published books Higher Education for All? (RLE Edu G) Gordon Roderick, Michael Stephens, 2012-04-27 The rapid expansion of higher education provision particularly in Europe and North America during the 1960s opened up for the first time the question whether everyone should have the opportunity to experience the benefits of higher university and other institutions The contributors are economists sociologists and politicians and all have different assumptions commitments and postures Policy and the Polytechnics Lex Donaldson, 1975 **Patterns and Policies in Higher Education [by] George Brosan [and Others].**, 1971 *Cost and Finance of Higher Education in Mizoram* Abdul Hannan Barbhuiya, 2014-01-01 For a positive change in the society and sustained economic growth education plays a pivotal role Expenditure on education is now viewed as investment expenditure as it brings in economic returns to the individuals as well as to the society Financing of education has thus emerged as an important area of concern for researchers and economists The present book examines the growth of higher education in Mizoram and the trend of public expenditure on it More emphatically it deals with the estimation of per unit public cost and private cost of higher education in the state along with an analysis of the various sources of finance for education Determination of optimum enrolment size in various types of higher educational institutions has also been tried *The European Universities 1975 - 1985* Sam Stuart, 2014-05-18 The European Universities 1975 1985 examines the problems faced by universities in Europe their different proposed solutions and the preparation of the future of higher education at both a national and international level The social role of the university and its conception in different European countries are discussed along with issues related to university training research government and financing Comprised of 25 chapters this book begins with an overview of the role of the university in the new society university entrance and how the university can

help improve prospects for continuing education and address manpower needs The reader is then introduced to the purpose of university training teaching methods and evaluation of results the learning process at the university level and the role of research in the university Subsequent chapters focus on university autonomy financial planning budgeting and control in universities and the financing of students This monograph will be of interest to university students faculty and administrators
