Black Folklore and the Politics of Racial Representation Shirley

Moody-Turner,2013-10-02 Before the innovative work of Zora Neale Hurston folklorists from the Hampton Institute collected studied and wrote about African American folklore Like Hurston these folklorists worked within but also beyond the bounds of white mainstream institutions They often called into question the meaning of the very folklore projects in which they were engaged Shirley Moody Turner analyzes this output along with the contributions of a disparate group of African American authors and scholars She explores how black authors and folklorists were active participants rather than passive observers in conversations about the politics of representing black folklore Examining literary texts folklore documents cultural performances legal discourse and political rhetoric **Black Folklore and the Politics of Racial Representation** demonstrates how folklore studies became a battleground across which issues of racial identity and difference were asserted and debated at the turn of the twentieth century The study is framed by two questions of historical and continuing import What role have representations of black folklore played in constructing racial identity And how have those ideas impacted the way African Americans think about and creatively engage black traditions Moody Turner renders established historical facts in a new light and context taking figures we thought we knew such as Charles Chesnutt Anna Julia Cooper and Paul Laurence Dunbar and recasting their place in African American intellectual and cultural history Long Black Song Houston A. Baker,1990

Houston Baker maintains that black American culture grounded in a unique historical experience is distinct from any other and that it has produced a body of literature that is equally and demonstrably unique in its sources values and modes of expression He argues that black American literature is rooted in black folklore animal tales trickster slave tales religious tales folk songs spirituals and ballads and that a knowledge of this tradition is essential to the understanding of any individual black author or work To demonstrate the continuity of this tradition Baker examines themes that appear in folklore and persist throughout contemporary black literature *Freedom and Apocalypse* for example traces the idea that black Americans are a chosen people who will by some violent means overthrow the white man's tyranny The essays culminate in an examination of the life and work of Richard Wright Baker's treatment of Wright as a black American artist who recorded the black man's shift from an agrarian to an urban setting places Wright and the tradition of black literature and culture in a fresh perspective Encyclopedia of the Harlem Renaissance Cary D. Lever of Riches Joel Mokyr, 1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation's creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity The Lever of Riches with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential *Black Authors and Illustrators of Books for Children and Young Adults* Barbara Thrash Murphy, 1999 The Third Edition of this renowned reference work illuminates African American contributions to the genre of books for children and young adults with the biographies of 274 authors and artists including 121 new biographies not included in previous editions
